# Streamlining for greater freedom in motion

## A BRILLIANT NEW STYLING INTERPRETATION

Unusual lowness with up-swept lines, sculptured body surfaces and unpretentious ornamentation merge into an over-all effect of grace and poised power in the new Chrysler and Plymouth models.

Clear, functional lines emphasize the sleek, taut look and feeling of motion. A sense of direction and eager action is captured with the up-swept rear fender fins. Magnificent movement is in every line of these cars—in the thin-appearing roof line . . . the swept-back lines of glass area . . . the forward thrust of distinctively-styled headlights . . . the sloping hood and rear deck.

Chrysler front-end styling is especially pleasing. The grille motif is of a refreshing, simple, horizontal design. Massive, but graceful bumper has depressed center section incorporating parking lights. The entire effect emphasizes the width and lowness of these proud, new cars. As a distinctively-new feature, dual headlights are available for each headlight enclosure.

The dramatic styling of Plymouth front end is of predominantly horizontal lines. Broad, forward-thrusting headlight brow,

full-width grille and wrap-under grille below bumper, accent its wide, stable appearance. Positioning of parking-turn-signal light next to headlight produces dual-headlight appearance.

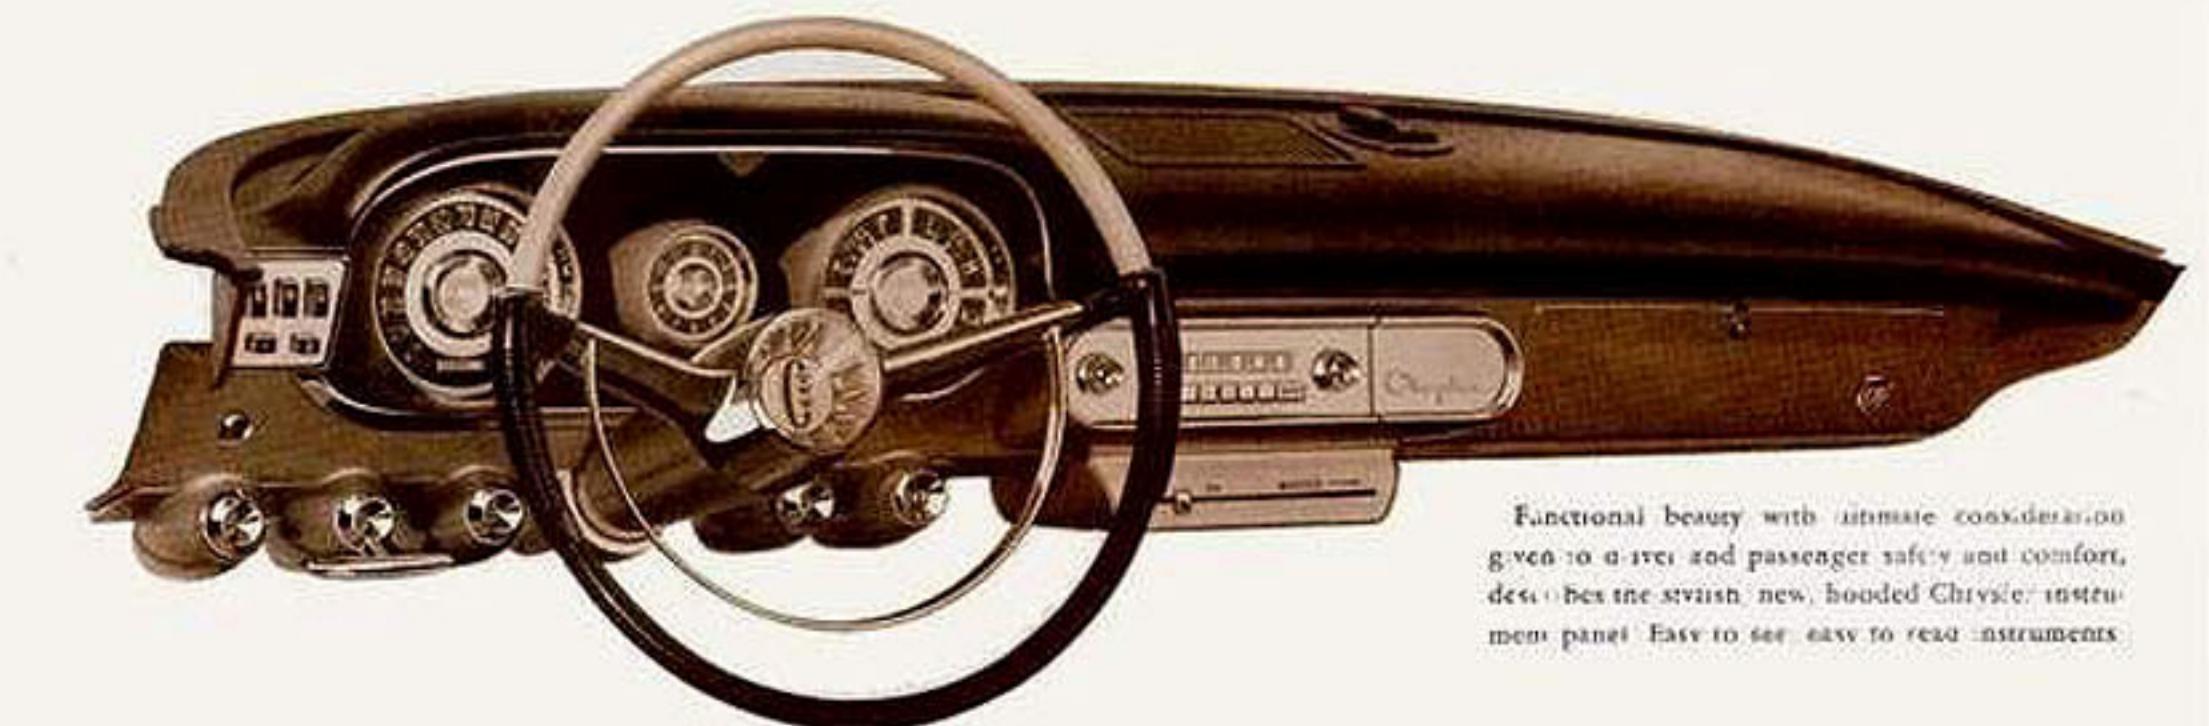

Comfortable, roomy interiors, tastefully designed for safety and convenience reflect the modern mode of living. Soft, durable and luxurious fabrics, vinyls and leathers have been especially made for the beautiful '57 Chrysler and Plymouth vehicles. Seats are cradled lower providing maximum comfort, safety and visibility.

There are muscles of steel in these magnificent cars to match their mighty engines . . . to give you the joy of new heights of power, new responsiveness—a whole new world of motoring pleasure. Exclusive Chrysler-engineered TORSION-AIRE RIDE

will thrill you with its new, soft, flat ride, no dip or front-end raise on braking and accelerating, race-car-quality cornering characteristics, easier and surer steering—and so quiet and vibrationless with new rubber-isolation mountings.

With the extremely versatile Torque-Flite and PowerFlite automatic transmissions, shifting becomes as effortless as pointing your finger. By simply pushing a button, smooth, quiet, surging acceleration is instantly yours with unequalled sureness, ease and positive safety.

A complete range of models and body styles is offered in the new '57 Plymouths and Chryslers . . . Plymouth Belvedere, Savoy and Plaza—Chrysler New Yorker, Saratoga and Windsor models.

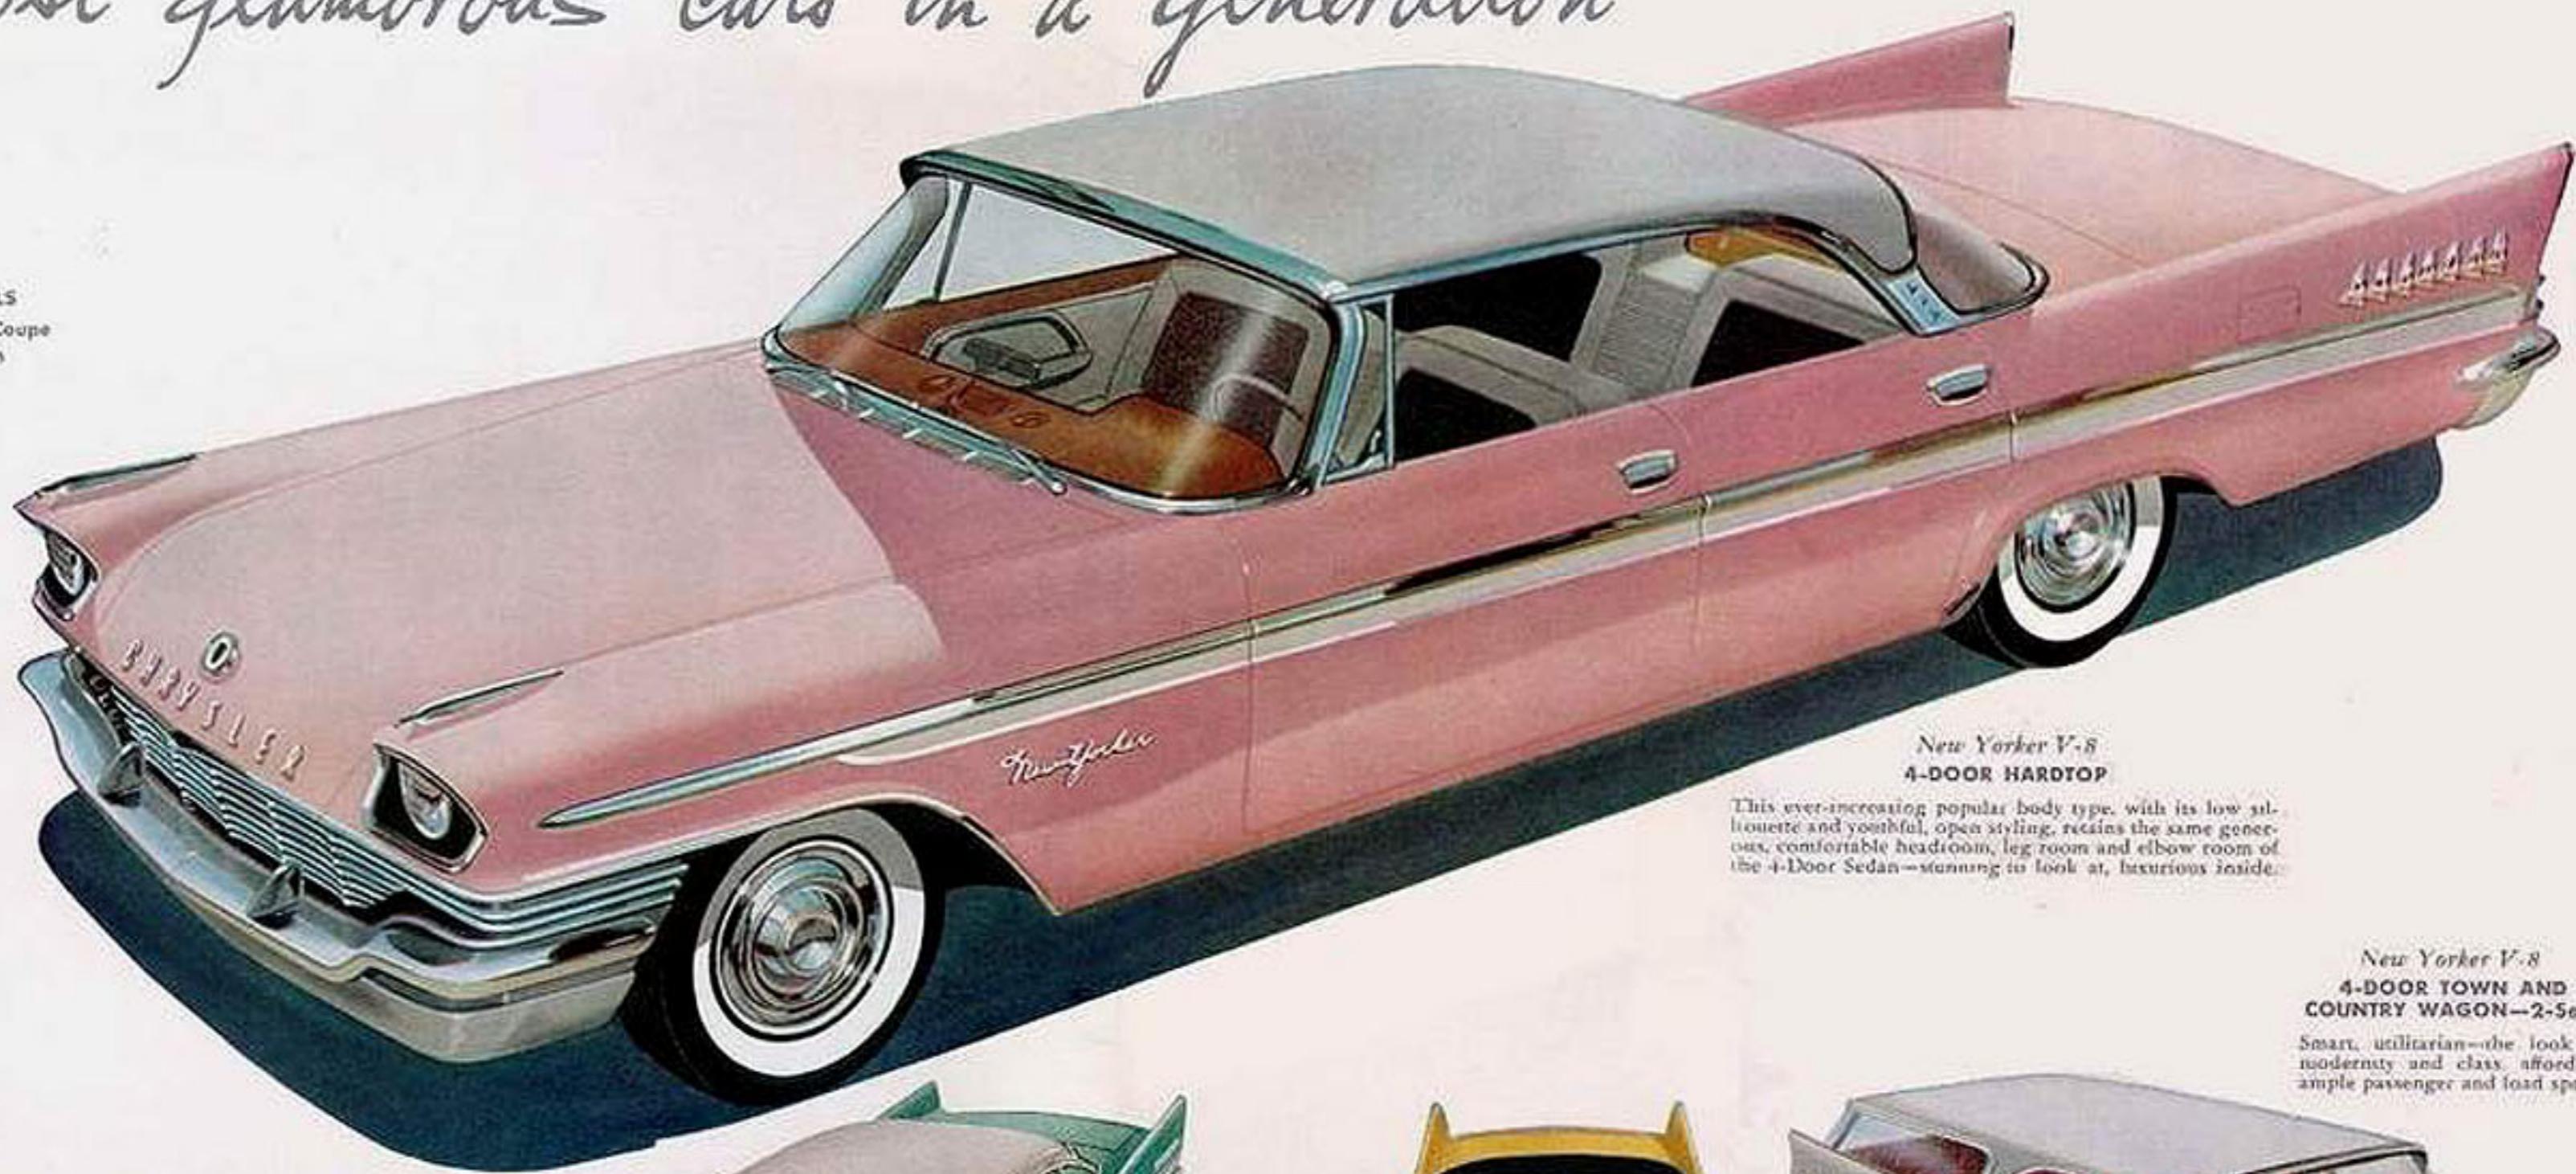

Functional beauty with ultimate consideration given to driver and passenger safety and comfort describes the stylish, new, hooded Chrysler instrument panel. Easy to see, easy to read instruments.

# The most glamorous cars in a generation

CHRYSLER NEW YORKER V-8 MODELS

Belvedere  
4-DOOR SEDAN

The new '57 Plymouth instrument panel is in complete style and color harmony with the tailored perfection of this beauty. Hooded, cockpit-compact instrument cluster and switch are directly in front of driver. Push-Button controls are to the driver's left and at his fingertips. Rear-view mirror and fresh-air-and defroster ducts are mounted on top of the instrument panel. Every maximum safety and comfort feature has been considered.

Plaza  
BUSINESS COUPE

Here is a car synonymous with savings . . . low in cost, economical in operation—yet you can travel in the fleet, forward style.

Just to see the beautiful, completely-new, low silhouette of the '57 Plymouth models from forward-thrusting headlight brow to high-sweeping fins is a thrill. Bright stainless steel trim enhances windshield and rear windows on all models. Every line suggests spirited, responsive power—yet inside and out every detail has been tailored in the modern trend to appeal to the most fastidious person.

Soft, supple, modern fabrics and vinyls, in an array of patterns and colors are color-keyed perfectly to exterior finishes. You will see fresh and luxurious interiors that are practical and durable.

Plaza  
COMMERCIAL UTILITY

Here is the perfect vehicle for modern suburban or city living . . . ideal for the business man, too.

These new Commercial Utilities and Suburbans, larger and lower, combine all the fresh, in-motion styling of Plymouth with its fleet exterior lines.

Matching its distinctive exterior design, you have big car comfort . . . big car roominess, inside—and more space than ever for carrying passengers or extra cargo on a greatly increased wheelbase, now 122-inches.

Look at some of the many new features available in these '57 Suburbans not found in higher priced makes: *Observation Car 3rd Seat*—faces rear, *Secret Luggage Compartment*—locked out of sight, *Easy-to-Enter Rear Steps*, *Space-Saving Spare Tire Storage*—outside, in right-rear side panel, *Tailgate Rear Window*—disappears into tailgate and can be operated either from inside or outside, *Air Conditioning*—under the hood, *Split 1 3-2/3 Front Seats*—for easy entry.

Years-ahead engineering also gives you—new torsion bar front springs, new ball-joint suspension, new rear springs, complete rubber isolation mountings, 8-point lubrication, more powerful "V-8" and "6" engines, greatly increased glass area, plus many other important features which mean—the finest handling car and the smoothest ride . . . TORSION-AIRE RIDE.

# Exhilarating sport styling with sedan roominess

*Belvedere*

**SPORT SEDAN (HARDTOP)**

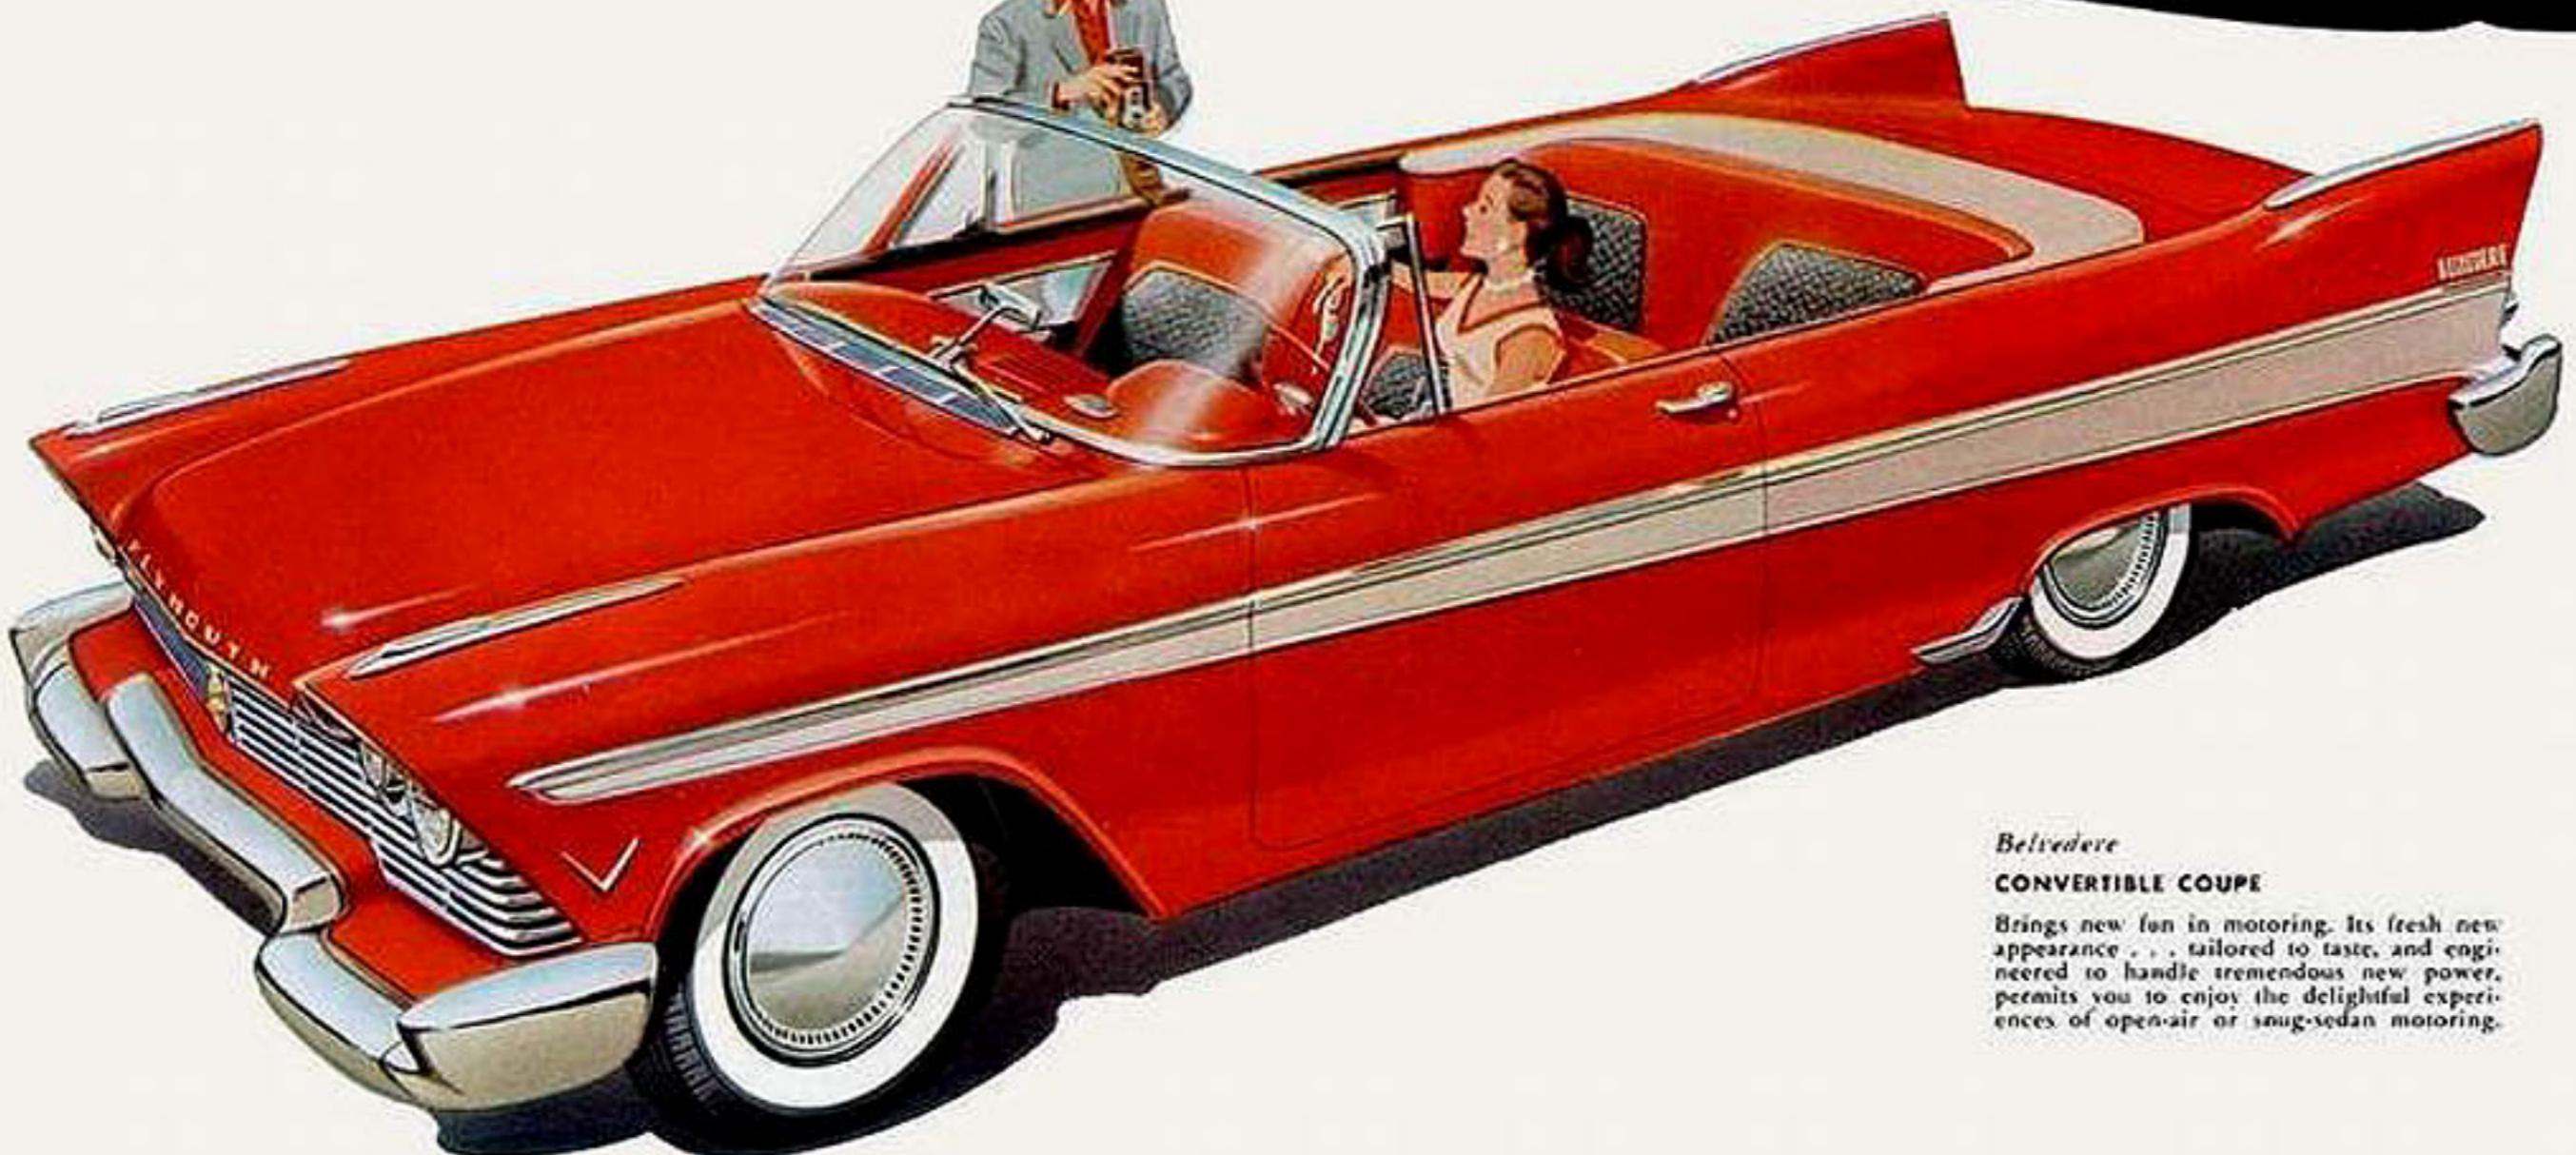

Wherever you go, pride is your constant companion with this, the most beautiful of "hardtop" automobiles . . . with all the steadiness, cornering ability and handling ease of costly sports cars. And, it has 4-Door Sedan roominess with easy entry and exit.

*Belvedere*

**SPORT COUPE (HARDTOP)**

Be prepared to gasp with delight when you first open the door to these all-new '57 sport models—the new shape-in-motion, long and low with wide, comfortable and luxurious interiors.

*Belvedere*

**CONVERTIBLE COUPE**

Brings new fun in motoring. Its fresh new appearance . . . tailored to taste, and engineered to handle tremendous new power, permits you to enjoy the delightful experiences of open-air or snug-sedan motoring.

# Engineering—Traditionally the Finest... Exclusively Yours

Chrysler Corporation, traditionally the industry leader in automotive engineering advancements... incorporates in the new '57s the most sweeping changes ever introduced by the Company in a single year.

New TORSION-AIRE RIDE is engineered on entirely new design principles. Riding and handling qualities are unprecedented. A unique suspension system makes steering easier and surer than ever before. Cornering characteristics rival those of even the finest custom-built sports cars. And in the new Chrysler and Plymouth your ride is safely cushioned in steel.

The best ideas from years of engineering design and research have been carefully blended together in these new models. New V-8 engines are bigger and mightier. They are the most rugged passenger car power plants ever built. Look at all these new features: Bigger displacement, a new, quieter cam-shaft, new, jet-flow carburetor, new, paper-element air filter—dirt cannot enter engine, improved Push-Button Driving, and the dependable "6", easy to maintain, is more powerful and more economical.

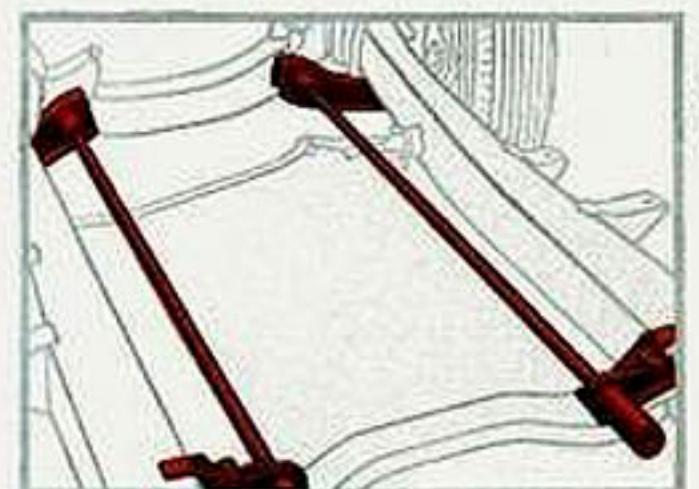

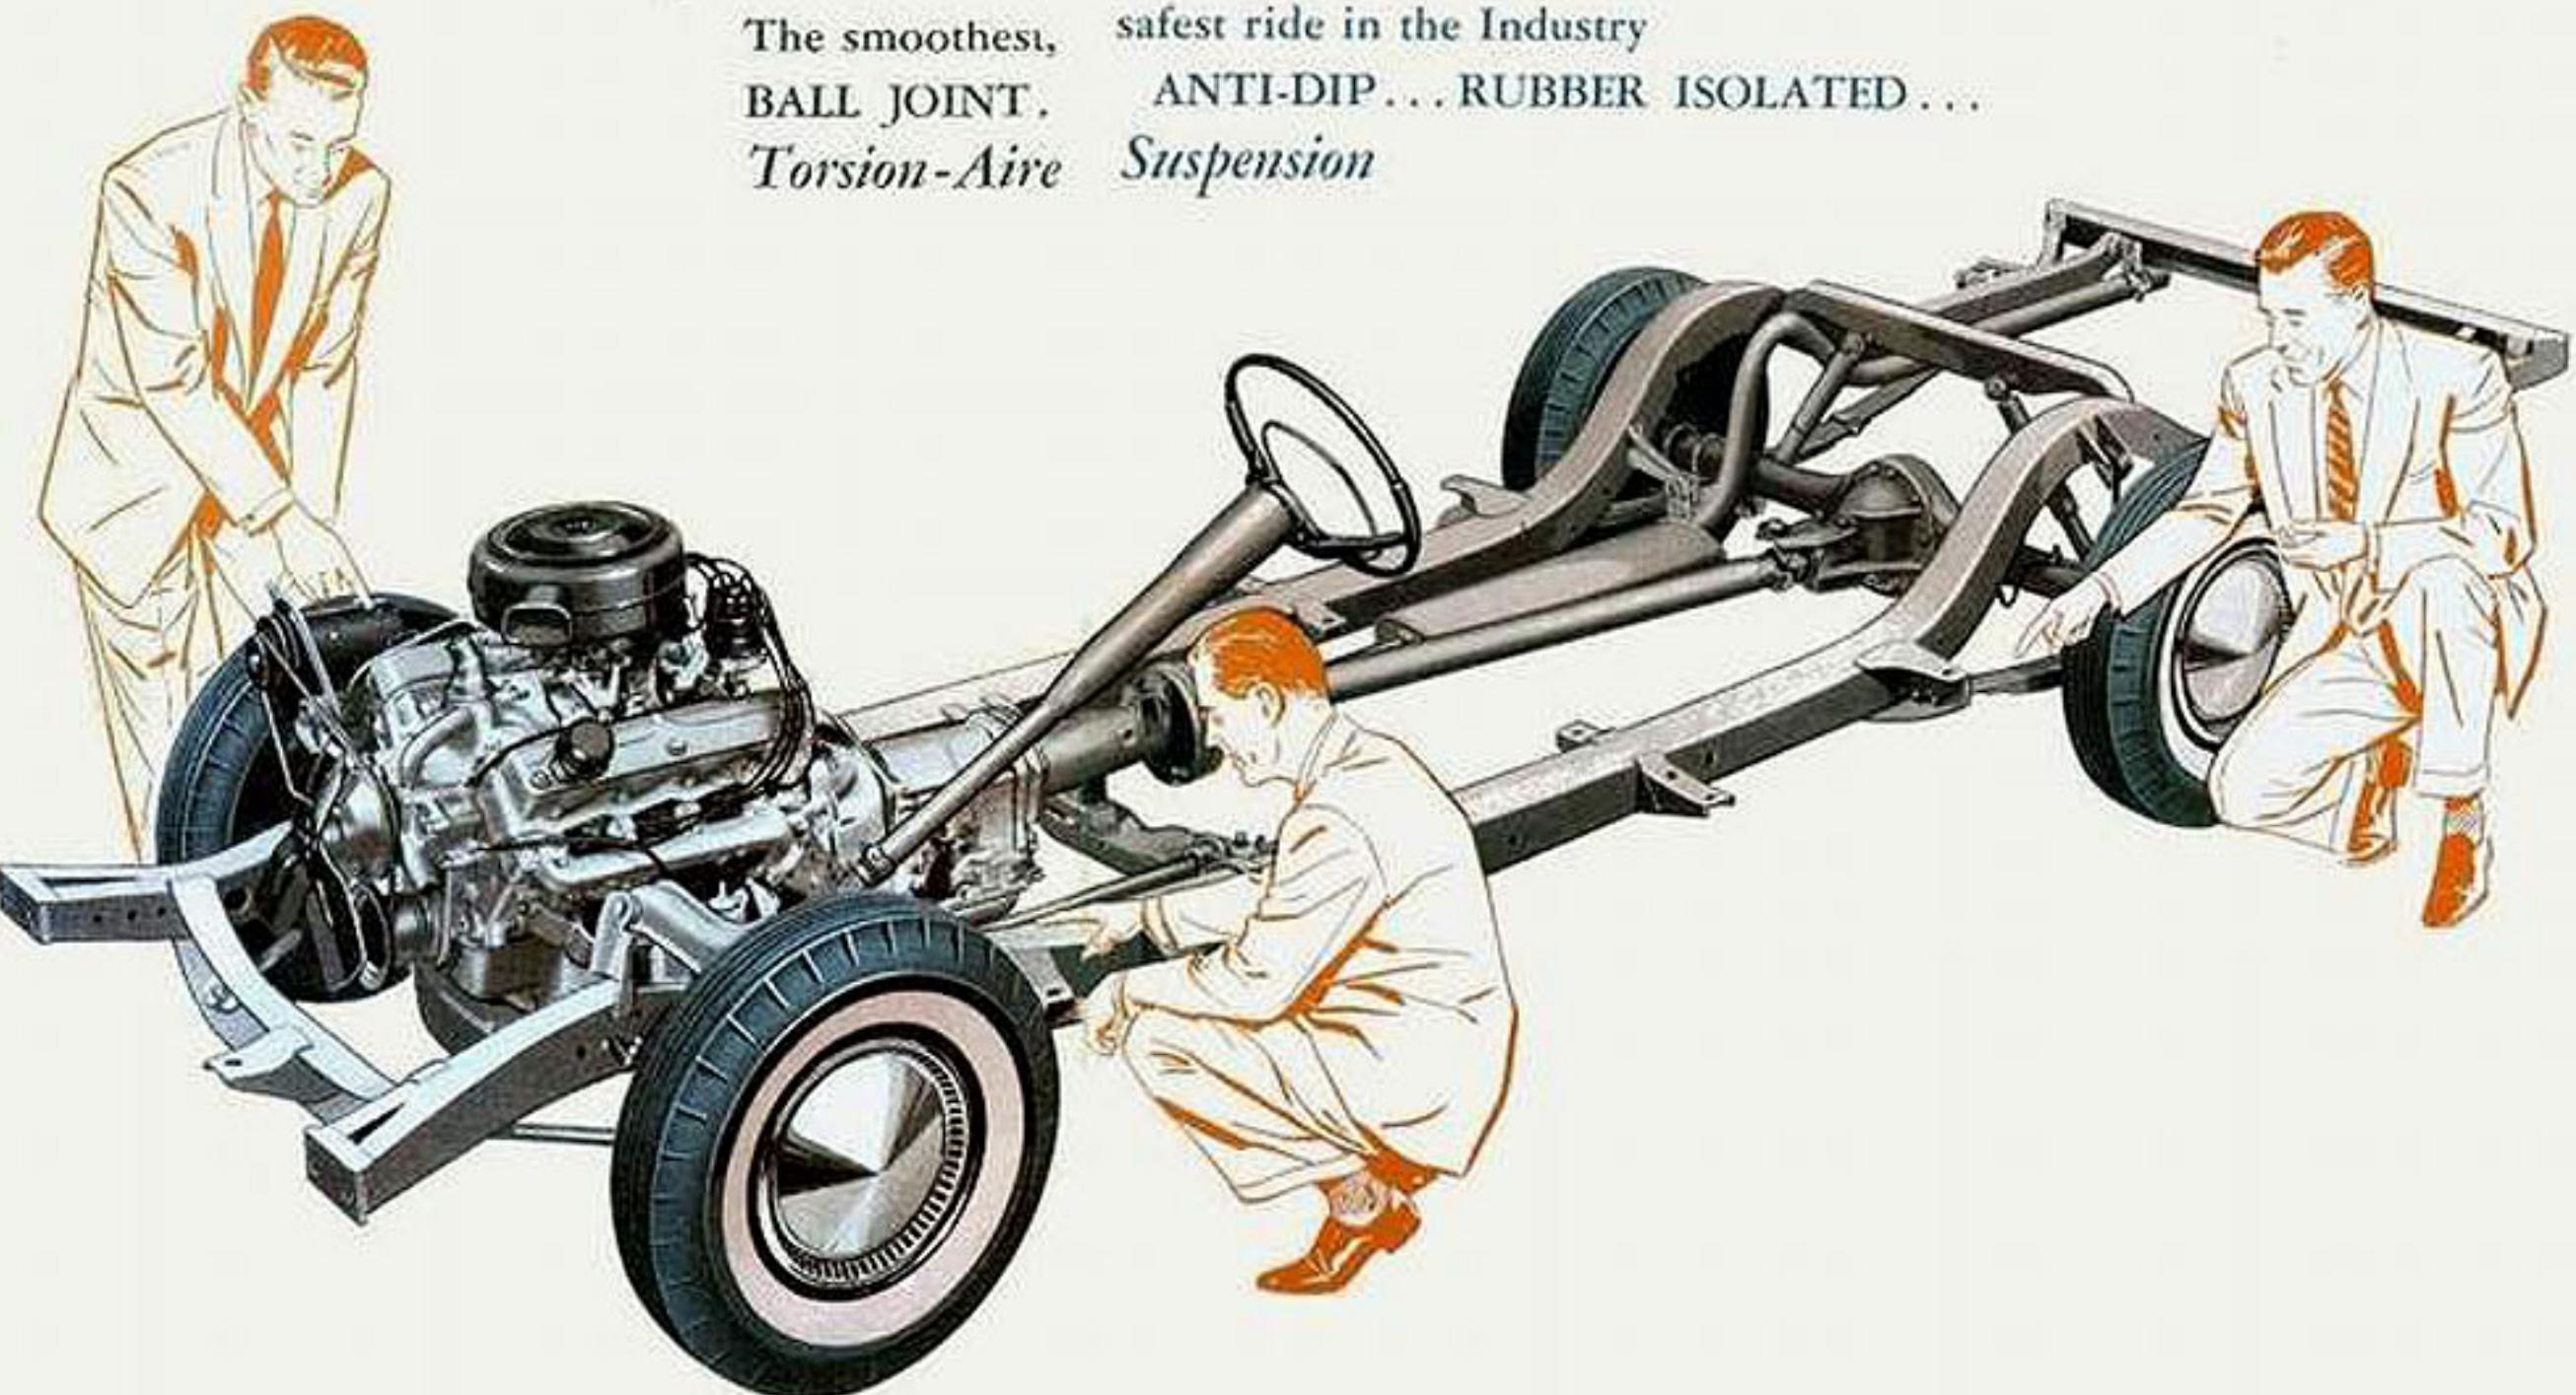

Available for added comfort . . . a remarkable new air conditioner, completely under the hood, assures refreshing temperature inside regardless of the weather outside.

Here, is a completely new car—from the road up, designed to give you the most wonderful riding comfort and driving ease you have ever experienced.

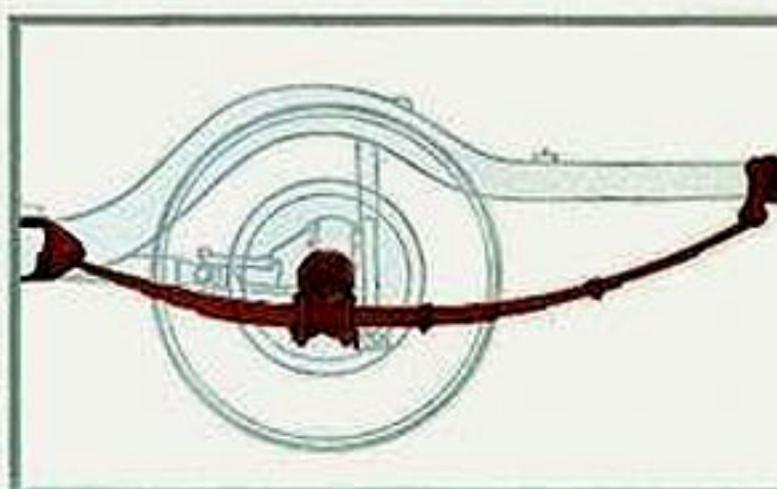

The smoothest,  
BALL JOINT,  
*Torsion-Aire*

safest ride in the Industry  
ANTI-DIP... RUBBER ISOLATED...  
*Suspension*

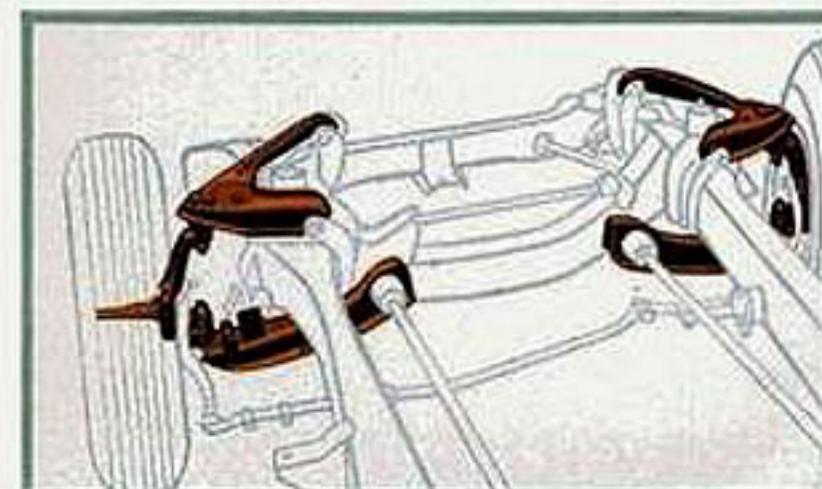

- New Torsion-Bar Front Springs
- New Ball-Joint Suspension
- New Anti-Broke Dip Principle
- New Steering Mountings
- New Shear-Type Engine Mountings
- New Oilflow Shocks
- New Rear Spring Design
- New 14" Low-Pressure Tires
- Chassis Lubrication Points—Now 8
- New Center-Plane Brakes
- New Straight-Side Frames
- New Rubber Isolation Mountings
- New Engines—Greater Torque
- New 3-Speed Automatic Transmission
- New Cooling System Pressure

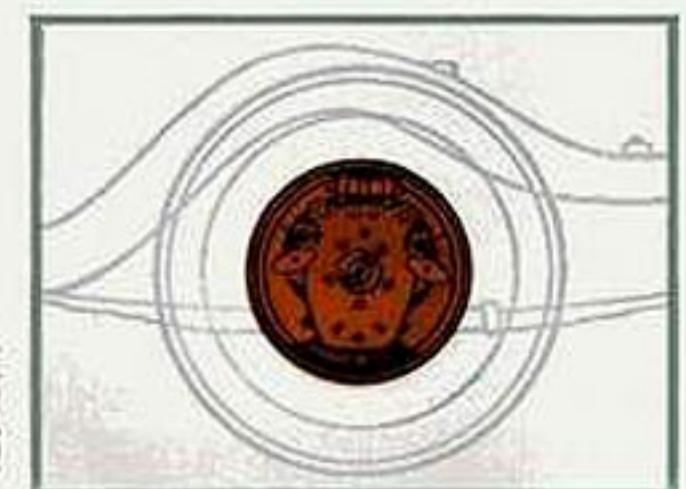

New Torsion-Bar Front Springs give you twisting action, adjusting safely and instantly to keep the car level and cushioned, providing a smoother, safer ride with roadability greatly improved. Racing cars use torsion bars. You will find it the finest ride ever!

New Rear Springs are longer, wonderfully soft . . . yet rear wheels hug the road, won't jounce or dip on braking. Rear springs are mounted "outboard" of frame with rear axle clamped closer to front of spring. Cornering and stability are greatly improved, too.

New Ball-Joint Suspension. You ride in luxurious level ease over any road. Front wheel action bows through velvet-smooth ball-and-socket joints. There is no sag or jolt on the car body—more positive steering is experienced.

New Center-Plane Brakes. All new—the finest brakes engineered. These total-contact brakes take hold with a sure, husky grip over the whole surface area. You stop longer with one-quarter less pedal pressure. Linings last 30% longer and adjustments are fewer.
