MPG*

2.0L DOHC 16V DUAL VARIABLE VALVE TIMING (VVT) I-4 ENGINE

The standard 2.0L DOHC 16V dual VVT I-4 engine mated with the five-speed manual transmission delivers an outstanding 4x2 EPA-estimated 30 mpg on highways and 23 mpg[†] in the city, and shows off with 158 hp and 141 lb-ft of torque. It can also be paired with the available CVT2 automatic transaxle. With numbers like these, you have the freedom to extend the adventure and travel more than 400 miles on a full tank of gas.[‡]

2.4L DOHC 16V DUAL VVT I-4 ENGINE

This available engine also pairs with the five-speed manual transmission for a brilliant mix of an EPA-estimated 4x4 fuel economy of 23 city/28 highway mpg** with 172 hp and 165 lb-ft of torque.

SIX-SPEED AUTOMATIC TRANSMISSION

Enjoy a smooth ride regardless of whether you're traveling over road or trail. This available six-speed PowerTech automatic transmission has a low first gear for quicker takeoffs and a tall top gear for relaxed highway cruising. A stepped shift schedule across all six gears is designed for optimal city fuel efficiency. The fact that the transmission fluid's fill-for-life design helps reduce maintenance costs just adds to the pride of ownership.

FREEDOM DRIVE II® FOUR-WHEEL-DRIVE SYSTEM

This available system gives Compass its Trail Rated® chops with features like full-time 4WD with LOCK mode, Off-Road mode with Hill Descent Control and brake traction control. Torque is adjusted on demand for added fuel efficiency. Its all-weather capability expertly handles more difficult off-road situations, as well as deeper snow, mud and up to 19 inches of water.[‡]

CONTINUOUSLY VARIABLE AUTOMATIC TRANSAXLE II (CVT2)

The available CVT2 with AutoStick uses a 30-mm high-strength multilayer steel drive belt and two active V-pulleys to vary vehicle speed, resulting in an easy-gliding, quiet ride. The AutoStick shifter puts optimal vehicle performance under your command – a driver interactive manual control with six simulated stepped-gear ratios.

The available CVT2L System found on the Freedom Drive II Off-Road Group boasts a low range that provides the torque multiplication needed for water fording,[‡] steep grades and crawling slowly in off-road events. Includes an Off-Road mode that delivers an off-road capable 19:1 crawl ratio.
