EXCEPTIONAL 4x4 CAPABILITY BREEDS AN UNSTOPPABLE SPIRIT

IT'S THE RECOGNIZED STANDARD FOR OFF-ROAD PERFORMANCE. EVERY JEEP® 4x4 THAT BEARS A TRAIL RATED® BADGE PROVES IT'S PASSED A SERIES OF GRUELING OFF-ROAD CAPABILITY TESTS. REST ASSURED YOUR TRAIL RATED JEEP WRANGLER WILL WORK HARD TO SAFELY NAVIGATE THE MOST DIFFICULT CHALLENGES MOTHER NATURE SETS BEFORE YOU.

TRAIL RATED PERFORMANCE TEST CATEGORIES

TRACTION Trail Rated traction helps you maintain controlled forward motion on snowy back roads and over icy urban bridges. You can climb steep sand dunes and master muddy two-tracks. Others may fear untamed terrain, but your Trail Rated Wrangler has the traction within to master all kinds of topography and driving conditions.

ARTICULATION Wrangler's suspension systems enhance on- and off-road performance by maximizing flexibility, axle articulation and wheel travel. This standard indicates that when one or more wheels are elevated, the Jeep 4x4 system helps the others stay on the ground longer to keep you moving.

MANEUVERABILITY Every Wrangler is born with the athletic ability to navigate narrow gaps, handle emergency situations and avoid cosmetic damage to underbody sills, thanks to precision steering and optimized wheelbases.

GROUND CLEARANCE Head out knowing that your Trail Rated Wrangler has optimized approach, departure and breakover angles designed to clear logs, rocks and uneven ground. Your undercarriage is protected, too, with forged skid plates that cover your vehicle's most valuable underbody elements.

WATER FORDING® Traverse that stream with confidence, thanks to additional electrical and body seals, plus a high air-intake location. Wrangler has the capability to safely manage in up to 30 inches of water®. Always inspect all waterways before proceeding, just to make sure there are no unforeseen pitfalls.

FORGE AHEAD WITH THE HEART OF A HERO

WRANGLER'S HEROIC CAPABILITY NEVER LETS YOU DOWN. BECAUSE AT ITS VERY CORE RESIDES AUTHENTIC JEEP® BRAND DNA. IT'S HERE WHERE TRUE COURAGE IS BORN, ALONG WITH THE DESIRE TO EXPLORE THE WORLD AND ALL IT HAS TO OFFER. FORGE AHEAD KNOWING THIS MOST-CAPABLE FREEDOM MACHINE ALWAYS HAS YOUR BACK.

PENTASTAR® 3.6L V6 ENGINE WITH VARIABLE VALVE TIMING (VVT)

This engine delivers the power to match Wrangler's legendary brawn. Boasting 285 horsepower with 260 lb-ft of torque, this efficient road master is cast from lightweight aluminum and sips regular-octane gas. Standard.

5-SPEED AUTOMATIC TRANSMISSION WITH AUTOSTICK

Gain exceptional efficiency and out-of-the-gate performance. An aggressive first-gear ratio offers ample launch power without compromise. Electronically controlled engine torque helps you move smoothly through every gear. The AutoStick feature offers driver-selectable control to manually change gears. Available.

ROCK-TRAC® 4x4 SYSTEM

At the heart of the masterful capability of Wrangler Rubicon® beats one of the world's foremost four-wheel-drive systems. It delivers extreme rock-crawling ability, thanks to the 4:1 low-gear ratio. Rock-Trac's low crawl speed makes it easy to ascend or descend sharp hills and to crawl over obstacles. Available.

DIFFERENTIALS

Dana® 44 front and rear axles are equipped with Tru-Lok® locking differentials and offer the ultimate in traction. The front axle sway bar disconnect allows for better articulation off-road. Standard.

**YOUR ROMANCE
WITH MOTHER NATURE
JUST GOT SERIOUS**

THERE'S NO BACKING DOWN WHEN WRANGLER'S GOT YOUR BACK. YOU'RE FORTIFIED TO TACKLE FORMIDABLE ROCK FORMATIONS AND ANYTHING ELSE THE ROAD AHEAD SENDS YOUR WAY.

TRU-LOK® LOCKING DIFFERENTIALS

Front and rear electronic-locking differentials balance speed between left and right wheels, maintaining forward momentum for the ultimate in traction. An instrument panel-mounted rocker switch can lock either the rear or both axles. (Standard only on Rubicon.®)

ROCK-TRAC® TRANSFER CASE

A 4:1 low-gear ratio allows Wrangler Rubicon to crawl at a low speed for greater control and increases the amount of torque available at the wheels. (Standard only on Rubicon.)

ROCK RAILS

Extra-tough body-mounted rails provide additional rocker panel protection. (Standard only on Rubicon.)

HEAVY-DUTY SUSPENSION

Solid axles with locating arms, track/stabilizer bars, coil springs, front steering damper and tunable monotube shock absorbers are firm at low speeds and more relaxed at higher speeds. (Standard on Sahara.® A performance suspension is standard on Rubicon.)

TWO-PIECE STRUCTURAL OIL PAN

A two-piece oil pan provides a steel lower portion for impact resistance and an upper aluminum section for improved weight savings.

DANA® 44 HEAVY-DUTY SOLID AXLES

Durability comes from heavy shafts, stiff housings, large pinion bearings and above-center pinion mountings for smoother, quieter operation. (Rear Dana 44 standard on all models. Front Dana 44 standard only on Rubicon.®)

BEST-IN-CLASS GROUND CLEARANCE²

Wrangler Rubicon runs over the competition with 10 inches of ground clearance, helped, in part, by its standard 32-inch BFGoodrich® off-road tires.

BODY-ON-FRAME DESIGN

Built with a frame that's fully boxed for strength, stiffness and durability.

KEEP STEERING ON COURSE

Wrangler features a steering linkage and a recirculating-ball steering gear. Its robust, cross-link geometry helps provide one of the stiffest possible linkage systems in a solid-axle platform for steering precision.

FRONT SWAY BAR DISCONNECT SYSTEM

Flip a switch and the sway bar disengages when driving under 18 mph in 4WD-low (4LO) mode. This allows the front suspension to travel up to 25 percent farther on Rubicon than Sport and Sahara® models. (Standard only on Rubicon.)

TORQUE TO TOW

Wrangler Unlimited can confidently tow up to 3,500 lb when properly equipped with the factory-installed Max Trailer Tow Group.

SUPPLEMENTAL FRONT SEAT-MOUNTED SIDE AIR BAGS⁶ Deploying from the outboard side of each front seat, these air bags⁶ enhance the protection of the driver and front-seat passenger in certain impacts. SENTRY KEY[®] ENGINE IMMOBILIZER A unique embedded key code matched only to your vehicle helps keep your Wrangler safely where it belongs. Standard.

ELECTRONIC STABILITY CONTROL (ESC)¹³ This advanced system is designed to assist drivers in maintaining control of their vehicle at all times. It utilizes hydraulic brake assist, traction control, Electronic Roll Mitigation (ERM) and Trailer Sway Damping¹³ to constantly monitor driver input against the vehicle's actual course. If needed, ESC¹³ automatically brakes and/or reduces engine torque, while ERM estimates the potential for wheel lift, reducing engine power and applying brakes if needed. Trailer Sway Damping¹³ detects sway unique to trailering and engages the brakes to slow the vehicle, increasing brake force to one side of the vehicle to help counteract the sway from the trailer. ESC¹³ has three modes: Full-On, Partial-On (shuts off traction control) and Full-Off (ideal for off-road driving). Standard.

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL Standard HSA works to prevent Wrangler from rolling when starting on an uphill gradient. It holds the vehicle stationary for two seconds after the driver's foot is removed from the brake pedal, allowing time to apply the throttle. The available Hill Descent Control is packaged with the 5-speed automatic transmission and diligently works to help Wrangler navigate steep declines at a steady and consistent speed.

ENERGY-ABSORBING FRONT-RAIL EXTENSIONS Collapsible hydroformed front-rail tips offer low-speed protection and can be serviced after impact events of up to 8 mph. Standard.

ENHANCED ACCIDENT RESPONSE SYSTEM (EARS) This system makes it easier for emergency personnel to see and reach occupants in the event of an accident, turning on interior lighting, flashing hazard lamps and unlocking power doors after air bag⁶ deployment. It also shuts off the flow of fuel to the engine. Standard.

HEATED POWER EXTERIOR MIRRORS Melt snow and ice off sideview mirrors as you warm up your interior. They also help to keep your mirrors icicle-free as you drive. Available.
