

N TODAY'S incredibly shrinking world, there is still a proud place for full-size Pontiacs. After all, today's full-size Pontiacs are models of space- and fuel-efficiency.

For example, a Parisienne Coupe or Sedan offers foam-cushioned living room for six plus a trunk that can swallow almost 21 cubic feet of cargo. The 3-seat Brougham Wagon tops even that with eight-passenger comfort and, with the rear seats down, almost 88 cubic feet of cavernous storage space.

When it comes to fuel efficiency, advanced technology takes over. Like easy-rolling steel-belted radial ply tires. Low-drag front disc brakes. High-Energy electronic ignition. Standard automatic transmission with torque converter clutch (and overdrive automatic available with an optional V8). There's a standard V6 for the Coupes and Sedans. And an optional Diesel V8 you can order with any Parisienne. All these features are designed to help fuel efficiency.

Of course, you expect value for your money with a full-size Pontiac and value is what you get. Automatic transmission, power steering and power front disc brakes are all standard. So are colour-keyed, cutpile carpeting, custom seat belts, a rear window defroster, bumper rub strips. Even a maintenance-free Delco Freedom II battery. All these features come at no extra cost.

Full-size value? Nobody's got it like Pontiac.

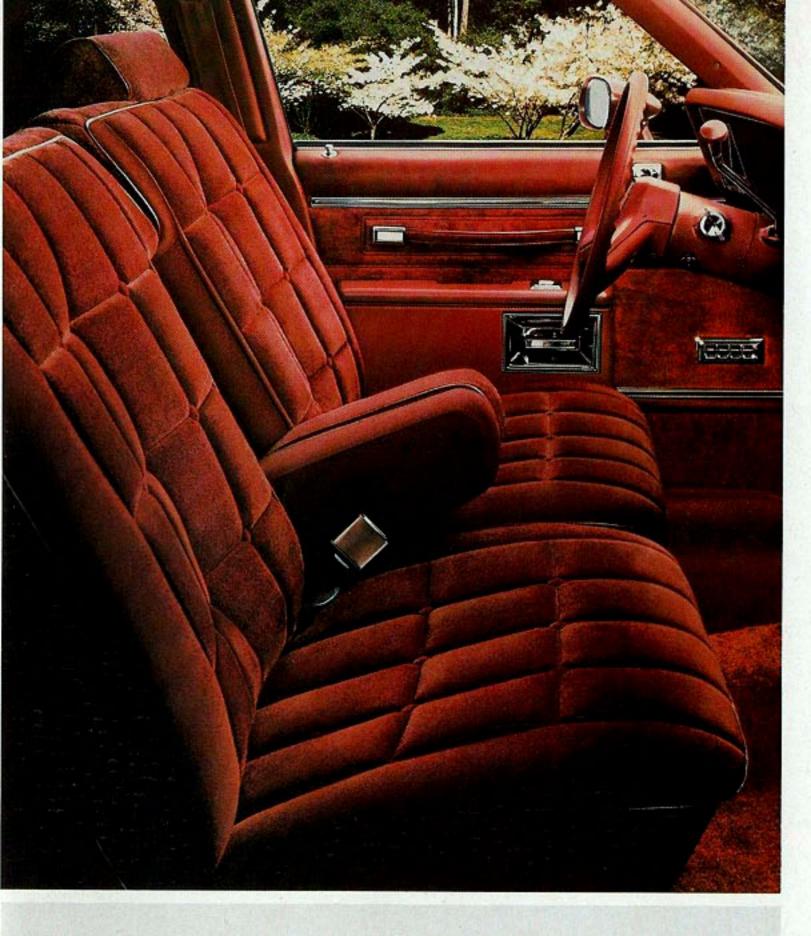

To top all this off, there are other specialties that appeal to many buyers of full-size cars. For instance, a properly-equipped Parisienne can tow up to 5,500 pounds.

All in all, even in this changing world, a family with full-size needs has many good reasons to still prefer a full-size car.

Cover: Parisienne 4-door Sedan. Top: Parisienne Brougham Coupe. Bottom: Parisienne Brougham Wagon.

It wasn't easy, but so far we haven't mentioned the built-in luxury of a full-size Pontiac. Or the smooth, quiet ride. Or the easy handling. Not even the interior appointments. And as for the pride that comes with owning a Parisienne, you wouldn't be reading this catalogue if you didn't take that for granted.

Look to your left. That's luxury,
Parisienne Brougham style. And intelligent function, Pontiac style. The
instrument panel features information
displays that are clean, clear, concise.
A glance helps you keep tab on what's
happening under the hood. While to
keep you on time, a standard quartz
electric clock counts off the seconds.

Notice that the instrument panel, like the steering wheel, glove compartment, door panels and radio-air conditioning area is trimmed with tasteful, simulated woodgrain accents.

To help give you comfort and support, every Parisienne seat features full-foam construction. The standard Brougham Coupe and Sedan 50/50 front seat includes a pull-down centre armrest. It's one of the most luxurious seats offered in a full-size Pontiac and is in soft knit velour that gives rich meaning to the term, lap of luxury.

Other satisfactions that are standard with a Brougham include headlight-on reminder chimes, extra sound insulation, illuminated ashtray, custom colour-keyed wheel covers, custom cushion steering wheel, custom pedal trim and special carpet. If you like luxury, this could be the only way to go.

Luxury is the word for the ride, too. Not only do you enjoy the longstriding benefits of a full-size, 116"
wheelbase, but road noise and vibration are minimized through computerselected coil springs, cushioned body
mounts and special acoustical materials. Some people buy full-size
Pontiacs for the ride and handling alone.
One test drive and you may agree.

Parisienne wouldn't be a Pontiac if it didn't offer a full measure of practicality. For example, the anti-corrosion measures. Two basic steps are taken to help protect your new Parisienne from the elements. First, we designed-out areas critical to corrosion damage by providing drainage and eliminating pockets that collect moisture and debris. Second, we designed-in structural materials and barriers that are especially impervious to corrosion. Plus we used many final finishing procedures like zinc-rich primers and Plastisol lower body stone-chip protection to help make sure your Pontiac is built to last. Please check with your dealer about the unlimited mileage, Three-Year Perforation-from-Corrosion Limited Warranty.

Also, see your Pontiac dealer for details and information about GM's 24-month/24,000-mile Power Protection Plus Limited Warranty on the powertrain.

For added peace-of-mind motoring, be sure to ask about the available GM Continuous Protection Plan option.

Pontiac wants you to enjoy your 1982 Parisienne as one of the best new-car investments you have ever made. And we want you to enjoy it for a long time.

A word about assembly, components, and optional equipment in these vehicles.

The vehicles described in this brochure are assembled at various Divisions of General Motors Corporation. These vehicles incorporate thousands of different components produced by General Motors of Canada Limited and related companies and their suppliers. From time to time during the manufacturing process, it may be necessary, in order to meet public demand for particular vehicles or equipment, or to meet federally mandated emission and safety requirements or fuel economy guidelines, or for other reasons, to produce vehicles with different components or differently sourced components than initially scheduled. All such components have been approved for use in our products by General Motors of Canada Limited or related companies and will provide the quality performance associated with our name.

Please note that certain optional equipment can be ordered only in conjunction with other optional equipment.

Also, upgrading from specified standard equipment may be necessary when certain optional equipment is ordered. Ask your sales representatives for details.

With respect to extra cost optional equipment, make certain you specify the type of equipment you desire on your vehicle when ordering it from your dealer. Some options may be unavailable when your car is built. Your dealer receives advice regarding current availability of options. You may ask the dealer for this information. GM also requests the dealer to advise you if an option you ordered is unavailable. We suggest you verify that your car includes the optional equipment you ordered or, if there are changes, that they are acceptable to you.

All illustrations and specifications contained in this catalogue are based on the latest product information available at time of publication approval. The right is reserved to make changes at any time, without notice, in prices, colours, materials, equipment, specifications and models, and to discontinue models. Some of the equipment shown or described throughout this catalogue is available at extra cost. Check with your dealer for complete information.

At General Motors, we're committed to leadership in fuel efficiency.

[†]The V.I.N. (Vehicle Identification Number) Engine Code is the eighth entry (letter or numeral) from the left on the vehicle serial number plate. The vehicle serial number plate is located on the top portion of the driver's side of the instrument panel and can be viewed from the exterior of the car by looking through the windshield.
