MDX

FORGET PAST AUTOMOTIVE EXPERIENCES.
LOOK BEYOND CURRENT EXPECTATIONS.
CHALLENGE. DISCOVER. ASPIRE. ADVANCE.

ADVANCE IS NOT JUST ABOUT MOVEMENT,
IT IS ABOUT PROGRESS.

It is seeing a curve in the road and envisioning a whole new way through it. It is rejecting the inevitability of traffic and instead doing something about it. It is about creating transformative technologies like Super Handling All-Wheel Drive™ (SH-AWD®) and navigation with both AcuraLink® real-time traffic and weather. It is about finding inspiration beyond the world of current automotive design. It is using premier race circuits as testing grounds for our ideas. Advance is not about reacting to the way things are today, it is about anticipating what's next. In performance. In technology. In safety. In design. All for the purpose of heightening anticipation for your next drive.

We race to win. And in our very first start as a factory team, an Acura American Le Mans car took the top spot in the 2007 Twelve Hours of Sebring. This year, as we build on all we learned, we continue a commitment to constant advancement and of testing technology at the highest level, so we can one day bring it to you.

THOUGH NOT INTENDED
FOR THE SHOWROOM,
ITS COMBINATION OF PRECISION
AND PASSION SIGNALS
THE FUTURE OF ACURA DESIGN.

INSPIRATION FLOWS FROM BEAUTY. CONFIDENCE RISES FROM STRENGTH.

WHEN ART AND PERFORMANCE WORK
TOGETHER, THE BOUNDARY BETWEEN
MOTION AND EMOTION IS BLURRED.

The 2009 Acura MDX. Every move, every response goes
beyond performance, technology and functionality to deliver
a deeply satisfying, complete automotive experience.

AN OBSESSION WITH POWER? OR A PASSION FOR INNOVATION?

Dramatic high-end horsepower.
Astonishing low-end torque.
Exceptionally smooth response.

The MDX's large powerplant delivers more than brute force. It also encompasses advanced performance technology for nearly flawless output. Accomplishments that come directly out of MDX's advanced VTEC engine design. Here, the competing demands of low-end torque and high-end horsepower are balanced through a variable valve timing system that controls engine intake for maximum performance. The result is massive force at low speeds with equally impressive horsepower at higher speeds.

To keep excitement levels climbing (along with the tach), the MDX incorporates two specialized breathing systems. A dual-stage intake manifold utilizes two separate air delivery pathways, one at low rpm and one at higher readings, for instant power. The variable-flow exhaust operates as a true performance feature, opening the valves at higher speeds to release a rush of power.

DRIVE-BY-WIRE[™] THROTTLE SYSTEM
SUPER HANDLING ALL-WHEEL DRIVE (SH-AWD)

DOMINATE ANY SURFACE WHILE MANEUVERING PAST CONVENTION.

Superior traction.
Expert cornering.
Confident control.

With Super Handling All-Wheel Drive (SH-AWD), MDX expertly negotiates the elements by actively distributing power to the wheels that need it most. Transferring torque between the front and rear wheels, as well as between the left and right rear wheel, is crucial to enhancing traction and cornering stability. Benefits that can be enjoyed whether you're taking on patches of snow or a series of S-curves. Unlike most competitive systems, SH-AWD can also send up to 100% of rear power to the wheel on the outside of the turn and increase its rotational speed for even tighter cornering. The result? An ability to track through curves with a precision unmatched by conventional all-wheel drive.

SHOWN IN ASPEN WHITE PEARL WITH AVAILABLE SPORT PACKAGE.

THE S-CURVE ADVANTAGE. WITH SENSORS THAT MEASURE EVERYTHING FROM ROAD SPEED TO G-FORCES TO WHEEL SLIPPAGE, SH-AWD DELIVERS THE OPTIMUM AMOUNT OF POWER TO EACH WHEEL. TRANSLATION: SUPERIOR TRACKING THROUGH EVEN THE TIGHTEST CORNERS.

Unleash your soul.
Finding inspiration at Nürburgring

Few places are more demanding (or gratifying) than the legendary Nürburgring track. So the fact that Acura engineers spent weeks in Germany honing MDX's edge should come as no surprise. What did raise eyebrows was the crisp, taut response from a 4-wheel independent suspension system, engineered to keep as much tire on the road as possible.

The available Sport package further strengthens this connection with the inclusion of Acura's Active Damper System. Designed to deliver a comfortable ride under normal conditions, it instantly firms up the suspension when driving conditions require high-performance handling. Equally impressive is the response afforded by the vehicle's torque-sensing power-assist steering system as well as an all-around maneuverability (courtesy of Acura's exclusive SH-AWD) that gives MDX a distinguished sense of control. But then once an MDX has been put through its paces at Nürburgring, nothing should be surprising.

Focus on the possibilities. And the clear roads ahead with an available GPS-linked navigation system.² Packed with advanced technologies like a destination database with information on over seven million points of interest and a voice recognition feature that allows for easy maneuvering via simple voice commands, MDX's navigation system has an eye on the future. Consider AcuraLink real-time traffic:³ a service that constantly monitors traffic flow as well as reports delays due to collisions, road construction or weather. All in an effort to keep everyone moving smoothly ahead.

Hands-free connectivity.
Voice Recognition

As technology advances, it becomes increasingly personal. And nowhere is that more evident than through the available Technology package with voice recognition. Simply press the steering wheel-mounted voice control button and, with just a few simple voice commands, begin accessing MDX's many advanced features. Want directions to the art galleries? Curious about the ongoing repairs to the Beltway? Craving soft-shelled crabs as only that little place off 15th Street can prepare them? Then you're in the right place. Right behind the wheel of an MDX.

DESTINATION DATABASE :::

See current information on 7,000,000 points of interest, from the nearest ATM to local hotels, right on the screen of the available navigation system.²

ZAGAT SURVEY® RESTAURANT REVIEWS :::

Get trusted recommendations, complete with food, service and decor ratings with this feature of the available navigation system.²

BLUETOOTH® HANDSFREELINK® :::

Link your compatible Bluetooth® enabled mobile phone and you can make and receive calls without taking your hands off the wheel.⁴

AUDIO SYSTEM CONTROLS :::

The MDX's ability to recognize a vast list of commands lets you verbally control most of the functions of the vehicle's Acura/Bose® audio system.

ACURALINK REAL-TIME TRAFFIC :::

The available navigation system quickly communicates traffic flow as well as collisions, road construction and weather-related incidents.^{2,3}

TRI-ZONE CLIMATE CONTROL :::

Simply voice your preference and the system will adjust the temperature to accommodate the driver as well as the front and 2nd-row passengers.

CAN RECORDED MUSIC POSSESS THE RICHNESS OF A LIVE PERFORMANCE?

Acura/ELS Surround Premium Sound System.

The Acura/ELS Surround System (with available Technology package) was specifically designed for MDX by Grammy® Award-winning engineer and producer Elliot Scheiner and a team of Acura engineers. The goal was to produce sound that is as close as possible to the original studio recording. Taking into account every element, from how sound is affected by the soft contours of the seats to how vast interior volume promotes better resonance, each speaker was strategically positioned to reproduce the depth and nuance of a live performance.

VEHICLE STABILITY ASSIST™ (VSA) IF SENSORS DETECT UNDERSTEER OR OVERSTEER, VSA WILL FIRST USE THE SH-AWD SYSTEM TO CORRECT THE SITUATION BY ALTERING THE TORQUE DISTRIBUTION AMONG THE FOUR WHEELS. IF NECESSARY, THE SYSTEM WILL ALSO AUTOMATICALLY ADJUST THE ENGINE'S TORQUE AND APPLY BRAKING TO INDIVIDUAL WHEELS TO HELP STABILIZE THE VEHICLE.

ADVANCED AIRBAG SYSTEM ACURA'S COMPREHENSIVE APPROACH TO SAFETY INCLUDES DUAL-STAGE, DUAL-THRESHOLD FRONT AIRBAGS, FRONT SIDE AIRBAGS AND SIDE CURTAIN AIRBAGS WITH ROLLOVER SENSOR. AN OCCUPANT POSITION DETECTION SYSTEM (OPDS) IS DESIGNED TO PREVENT DEPLOYMENT OF THE FRONT PASSENGER'S SIDE AIRBAG IF A SMALL-STATURED OR AN OUT-OF-POSITION FRONT PASSENGER LEANS INTO THE AIRBAG'S DEPLOYMENT PATH.*

* ALWAYS USE SEAT BELTS AND APPROPRIATE CHILD SEATS. CHILDREN 12 AND UNDER ARE SAFEST WHEN PROPERLY RESTRAINED IN THE REAR SEAT. FRONT AIRBAGS INFLATE AND DEFLATE IN A FRACTION OF A SECOND.

REARVIEW CAMERA SHIFT INTO REVERSE GEAR AND WHATEVER IS DIRECTLY BEHIND YOU APPEARS ON THE AVAILABLE NAVIGATION SCREEN. THIS AVOIDANCE FEATURE IS DESIGNED TO HELP PREVENT BACKING OVER OR INTO HARD-TO-SEE OBJECTS.

TIRE PRESSURE MONITORING SYSTEM :::
This system actively monitors and displays the air pressure of each tire.⁶

ELECTRONIC BRAKE DISTRIBUTION :::
This feature actively apportions braking force to each wheel based on dynamic loading.

HID HEADLIGHTS AND LED TAILLIGHTS :::
High-Intensity Discharge headlights create a tightly focused beam. The LED taillights illuminate quickly to indicate your intentions.

BEFORE AN ACCIDENT OCCURS, ACURA
HAS ALREADY ANTICIPATED A RESPONSE.

Safety Through Innovation is a commitment to use leading-edge technologies in the area of driver and passenger safety. Results of this approach include the Advanced Compatibility Engineering™ (ACE™) body structure that redirects frontal crash energy around the cabin, away from passengers. It also helps minimize misalignment with vehicles of differing size. Steel door beams help prevent the intrusion of impact forces. These features have helped the MDX receive 5-star crash ratings in both frontal- and side-impact tests from the National Highway Traffic Safety Administration (NHTSA)⁷ and the "Top Safety Pick" award from the Insurance Institute for Highway Safety (IIHS).⁸
