MDX

When Precision Crafted Performance is at the heart of everything you do, you don't just build an SUV, you build the car you want to drive. You break the rules and check all the boxes. And you do it because you can.

The new 2017 MDX does more than just embody what Precision Crafted Performance is all about—it defines it.

THE NEW 2017 MDX. SEE WHAT IT

CANVAS

DEP
DEALER E-PROCESS

CAN AN SUV DEFINE A

PERFORMANCE

The Acura logo was designed to depict an engineering caliper and since its inception has served as a symbol and a constant reminder of our unwavering commitment to precision and craft. The caliper is our true north and a promise of the painstaking attention to detail that goes into every Acura.

The 2017 MDX is the manifestation of that commitment.

MDX with Advance Package shown in White Diamond Pearl.

MDX shown in White Diamond Pearl.

DEALER E-PROCESS

MDX with Advance Package shown with Espresso interior.

MDX SH-AWD with Advance Package shown with Ebony interior.

Exterior Design

As athletic as it is spacious, the multifaceted MDX was designed to give you the best of all worlds. While the new MDX delivers maximum comfort for up to seven passengers, it was crucial that we didn't forget where we came from. True to our roots and Precision Crafted Performance promise, the 2017 is the most aggressively styled MDX to date, with performance to match.

Interior Design

The 2017 MDX was designed with the single-minded goal of putting the driver and passengers first, and not only did we hit our impossibly high standards, we exceeded them. With available features such as handcrafted and responsibly sourced Olive Ash Burl and Black Limba natural woods, premium contrast stitching and piping details, and your choice of seven-passenger seating or a six-passenger configuration with body-contouring second-row captain's chairs, wherever you're seated, you'll feel like the MDX was built with you in mind.

CAN AN SUV MAKE YOU FEEL

CLONES

TO THE ROAD?

Performance happens when driver and machine work together as one, when the car responds instantly and instinctively to the driver. When you no longer have to think of asserting control, and instead feel it. It's why we look beyond zero-to-sixty times and spec sheets to measure our vehicles' performance, because at the end of the day, the experience is something that can't be communicated with numbers. Rather, it's the rush. The exhilaration. The sensation of feeling simultaneously one with the car and road. When you climb into the driver's seat of the 2017 MDX, you'll know, as we do, that performance is more than a stat.

MDX SH-AWD with Advance Package shown in White Diamond Pearl.

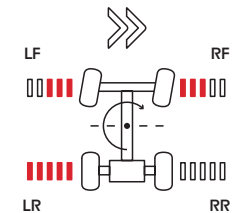

SH-AWD

PERFORMANCE YOU CAN FEEL. Super Handling All-Wheel Drive™ (SH-AWD) was designed to adapt to the driver for superior handling under almost any conditions. This innovative torque-vectoring system sends power to the wheels that need it most to match driver input, weight distribution, and available traction, providing seamless power transitions and supreme control—control that goes beyond traction and forms a direct connection between driver and car.

Cornering

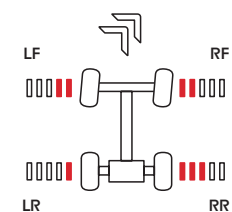

When cornering on dry surfaces, up to 70 percent of the torque is distributed to the rear. Torque vectoring allows up to 100 percent of that power to distribute to the outside rear wheel, improving control and helping rotate the MDX through the turn.

Lane Change

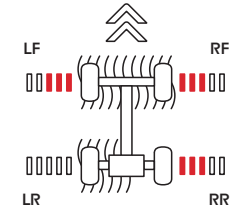

For increased stability during lane changes, the SH-AWD system transfers power to the inside rear wheel.

Slippery Road

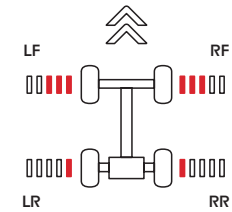

Under slick conditions, SH-AWD actively sends power to the wheel with the most traction.

Highway Cruise

For better fuel efficiency, up to 90 percent of the power is sent to the front wheels when cruising in a straight line.

Comfort

Normal

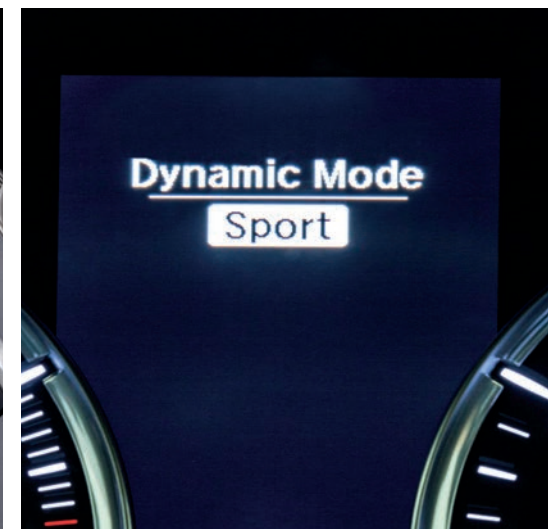

Sport

DEP
DEALER E-PROCESS

IDS

A MODE FOR EVERY MOOD. With Comfort, Normal, and Sport, our Integrated Dynamics System (IDS) delivers three modes of Precision Crafted Performance. If you're looking to raise your pulse, Sport mode adjusts Active Sound Control, dials up throttle response, and weights the steering to deliver a sports car-like feel while inciting a more aggressive response from the available SH-AWD® system. And for an even more engaging experience, put full manual control of the 9-speed transmission at your fingertips with our race-inspired Sequential SportShift paddle shifters.

MDX SH-AWD with Advance Package shown in Modern Steel Metallic.

Agile Handling Assist

ANTICIPATES YOUR EVERY MOVE. Agile Handling Assist[®] uses active braking to aid in the accurate tracing of your desired line through a turn. The system can brake individual wheels as needed, effectively using brake torque vectoring to directly control the vehicle's rotation. Working jointly with amplitude reactive dampers—dual-valve suspension technology that reacts to the road—the MDX's highly precise handling feels more like that of a sports sedan than a seven-passenger luxury SUV.

It also happens to be the lightest in its class, in some cases by more than a thousand pounds. To reduce weight and increase rigidity, the body structure features lightweight materials such as ultra-high-strength hot-stamped steel, aluminum, and magnesium. And less weight equals more performance, which is why we cut every unnecessary ounce.

MDX SH-AWD with Advance Package shown in Lunar Silver Metallic.

CAN IT

FORGET IT

LIKE IT PERFORMS?

People are more important to us than any vehicle or industry accolades, so when it comes to protecting our passengers, we ask ourselves one simple question, "Is it safe enough for our own families to ride in?"

It's our greatest goal to one day drive in a zero-collision society, and the 2017 MDX was designed and engineered with that goal in mind.

For us, safety is personal.

AcuraWatch

SEE WHAT YOU CAN'T SEE. AcuraWatch™ combines a network of next-level sensing technologies designed to increase awareness and support the driver, working to prevent, avoid, and mitigate impacts.* Sensors continuously monitor the vehicle's surroundings and can recognize not only cars, but also the shapes of motorcyclists and pedestrians—even shrubbery and mailboxes. AcuraWatch can warn of potential threats, provide steering input to help keep you in the center of a detected lane, brake to maintain a set interval from cars detected ahead, and emergency-brake to help avoid collisions.

Our available Surround-View Camera System takes it one step further, with exterior cameras that give you a 360-degree view of the space around the MDX. With six unique camera views, parking sensor information, and dynamic guidelines that show your expected path, you'll feel more connected with your surroundings than ever before.

a. Blind spot information (BSI) System²

b. Lane Departure Warning (LDW) System³
Lane Keeping Assist System (LKAS)³
Road Departure Mitigation System

c. Adaptive Cruise Control (ACC) with
Low-Speed Follow (LSF)⁴

d. Forward Collision Warning (FCW) System⁵
Collision Mitigation Braking System™ (CMBS™)⁶

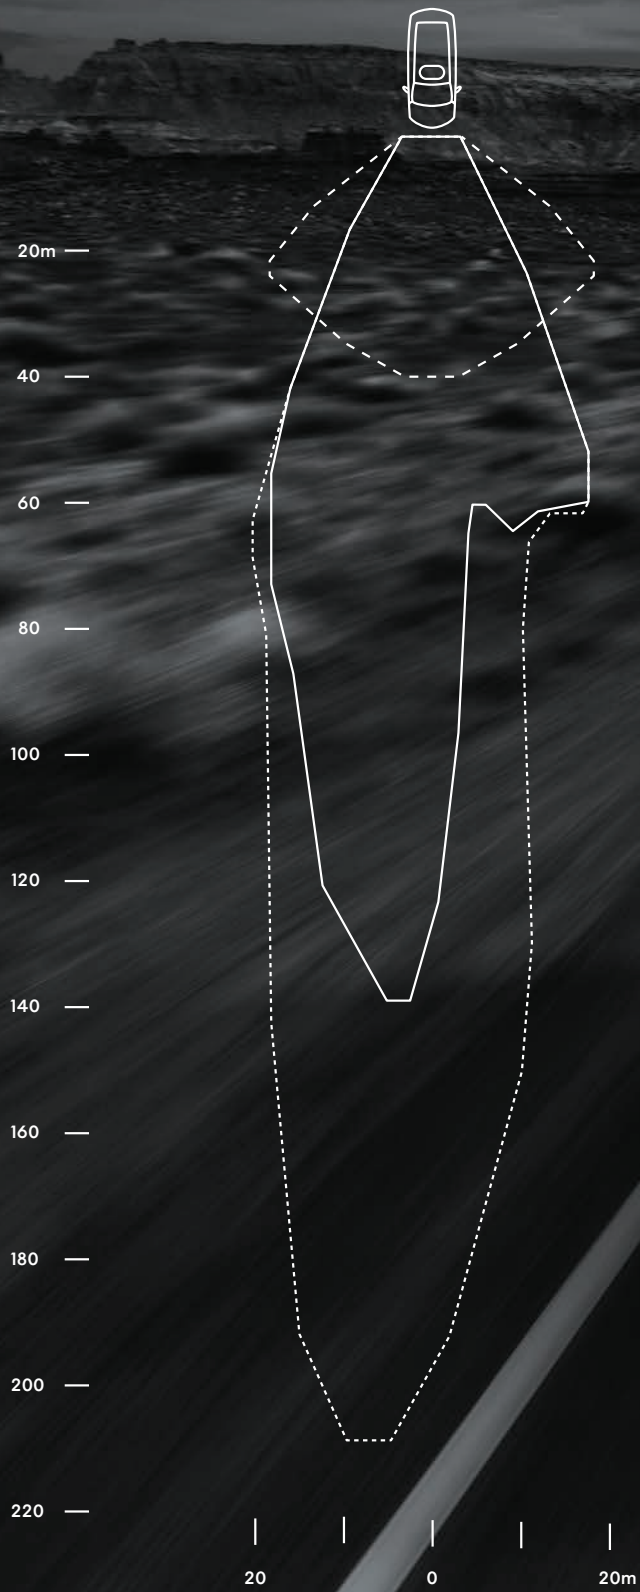

e. Rear Cross Traffic Monitor⁷

f. Multi-View Rear Camera with
Dynamic Guidelines⁸
Surround-View Camera System⁹

*Driver remains responsible for safely operating vehicle and avoiding collisions.

MDX with Advance Package shown in Lunar Silver Metallic.

LED Fog Lights

Jewel Eye LED Headlights

Low Beam

High Beam

Jewel Eye LED Headlights

PUT PERFORMANCE IN YOUR SIGHTS. Whether you're on the racetrack or on a road trip, how far ahead you can see affects everything. Jewel Eye® LED headlights are standard on every Acura and provide impressive down-road visibility with an intense, wide beam of light designed to mimic natural sunlight—the light our eyes are designed to see in. The result? Less fatigued driving, clarity, and more vivid colors, effectively turning night into day.

Auto High-Beam can further enhance vision, increasing visibility by more than two hundred feet, allowing for earlier driver reaction and braking. A windshield-mounted camera continuously monitors the road ahead, automatically switching the high beams off to avoid blinding oncoming traffic.

MDX with Advance Package shown in Lunar Silver Metallic.

3D
Crash
Test
Simulation

We're dedicated to building the safest vehicles on the road, and research is leading the way. With our advanced 3D crash test simulation software, engineers can create and manipulate a simulation with the push of a button. In addition to physical crash tests, this software allows our engineers to conduct additional tests—even running simulations while they sleep. It's this commitment to research and technology that's allowed us to elevate our understanding of vehicle safety design and pioneer solutions that have led to some of the industry's most innovative new safety features.

ACE
Body
Structure

Acura's next-generation Advanced Compatibility Engineering™ (ACE™) body structure is designed to absorb and disperse frontal impact energy so less force is transferred to what really matters: the people inside. But we didn't stop there. Crash compatibility is designed into the structure as well, so in the event of a collision, the occupants of both vehicles are more protected.

It's just one reason the MDX received the highest possible overall safety rating from both the National Highway Traffic Safety Administration (NHTSA)¹⁰ and the Insurance Institute for Highway Safety (IIHS)¹¹.

4-5X STRONGER THAN
TRADITIONAL-GRADE
AUTOMOTIVE STEEL

CAN AN SUV BE ANYTHING AND

EVERYTHING

We designed the MDX around its passengers because our definition of performance is one that extends beyond the traditional—one that encompasses ergonomics, sound, connectivity, and comfort, all working together to enhance the driving experience.

MDX with Advance Package shown with Espresso interior.

It's not enough to simply be connected anymore; we need tools that work harder for us. Beyond conventional navigation, available AcuraLink® seamlessly connects you to the information and media you want.* Pair it with your smartphone to keep up on email, texts, and tweets,¹² find a new restaurant, plan your weekend adventures, and drive with the assurance of AcuraLink Assist services.¹³

If traffic backs up, available AcuraLink Real-Time Traffic™ pulls surface-street information and can reroute you for a faster commute. And for the most demanding drivers, Live Concierge Link puts personal assistants at your fingertips, night and day, to ensure that all your journeys go off stress-free.¹³

*Drive responsibly. Some state laws prohibit the operation of handheld electronic devices while operating a vehicle. For safety reasons, always launch your audio application or perform any other operations on your phone or audio device only when the vehicle is safely parked.

Elliot Scheiner

“Acura cares, unlike some other providers that put systems in automobiles. Others come from a scientific background, meaning they tune using numbers and charts. Not ears. That’s not what music is about, and it is the key to why the ELS Studio systems are so highly regarded.”

—Elliot Scheiner

DEALER E-PROCESS

ELS Studio Premium Audio System

To build the best, you need to work with the best, which is why we collaborated with eight-time Grammy® award-winning music producer, mixer, and engineer Elliot Scheiner to create the critically acclaimed ELS Studio® Premium Audio System.

Whether you’re listening over the airwaves, streaming digitally, or enjoying your own music library, ELS Studio was designed to produce music as it’s meant to be heard, so even the most familiar tunes will become a whole new listening experience. The result is the perfect combination of engineering and artistry, and it’s totally unique to Acura. Yet another example of Precision Crafted Performance.

The full studio experience comes together with the help of acoustic spray foam and Active Sound Control, which uses the audio system’s speakers to fight unwanted sound with sound, creating a quiet listening environment.

1 Based on U.S. News & World Report Luxury Midsize SUVs segmentation. Claim based on manufacturers' lowest offered curb weight. 2 The system is not a substitute for your own visual assessment before changing lanes; system accuracy will vary based on weather, size of object, and speed. 3 LKAS (Lane Keeping Assist System) and LDW (Lane Departure Warning) only alert drivers or operate when lane drift is detected without a turn signal in use. LDW and LKAS may not detect all lane markings or lane departures; accuracy will vary based on weather, speed, and road condition. System operation affected by extreme interior heat. Driver remains responsible for safely operating vehicle and avoiding collisions. 4 Adaptive Cruise Control (ACC) with Low Speed-Follow cannot detect all objects ahead and may not detect a given object; accuracy will vary based on weather, speed, and other factors. ACC should not be used in heavy traffic, poor weather, or on winding roads. The driver remains responsible for avoiding a collision. 5 FCW cannot detect all objects ahead and may not detect a given object; accuracy will vary based on weather, speed, and other factors. System operation affected by extreme interior heat. FCW does not include a braking function. Driver remains responsible for safely operating vehicle and avoiding collisions. 6 Depending on the circumstances, CMBS may not go through all the alert stages before initiating the last stage (of collision mitigation.) 7 The system is not a substitute for your own visual assessment before backing up; system accuracy will vary based on weather, size of object, and speed. 8 Always visually confirm that it is safe to drive before backing up; the rearview camera display does not provide complete information about all conditions and objects at the rear of your vehicle. 9 Always visually confirm that it is safe to drive; the camera display does not provide complete information about all conditions and objects around your vehicle. 10 Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program. For additional information on the 5-Star Safety Ratings program, please visit www.safercar.gov. 11 MDX is a 2016 IIHS Top Safety Pick+, Insurance Institute for Highway Safety. 12 Based on compatibility. Cellular connection required. Your wireless carrier's rate plans apply. See your dealer for details. 13 Certain AcuraLink services are available only where compatible cellular and GPS coverage is available. Subscription agreement required to enroll and terms and conditions of subscription agreement apply to services. Standard text rates and/or data usage may apply to communications received by email or SMS/text message. Visit your dealer or acura.com/acuralink for more information on standard and available features. 14 Based on 2017 EPA mileage ratings. Use for comparison purposes only. Your actual mileage will vary depending on how you drive and maintain your vehicle, driving conditions, and other factors. 15 Use of lower-octane gasoline can cause occasional metallic knocking noise in the engine and will result in decreased engine performance. Use of gasoline with a pump octane less than 91 can lead to engine damage. 16 Siri® is available on iPhone® 4s or later, iPod® with Retina® display, iPod mini™, and iPod touch® (5th generation) and requires Internet access. Siri® may not be available in all languages or in all areas, and features may vary by area. Cellular data charges may apply. Some features may not be available for all countries or all areas. Siri®, iPhone®, and iPod® are registered trademarks of Apple, Inc. 17 Visit www.handsfreelink.com for a list of compatible phones and available features. Compatible with select phones with Bluetooth® technology. Your wireless carrier's rate plans apply. 18 SiriusXM services require a subscription after any trial period. If you decide to continue your SiriusXM service at the end of your trial subscription, the plan you choose will automatically renew and bill at then-current rates until you call SiriusXM at 1-866-635-2349 to cancel. See our Customer Agreement for complete terms at www.siriusxm.com. Fees and programming subject to change. XM satellite service is available only to those at least 18 years and older in the 48 contiguous United States and D.C. 19 Compatible with select smartphones. See: www.pandora.com/anywhere/mobile. Not all devices compatible with USB connection. Your wireless carrier's rate plans apply. 20 The USB Audio Interface is used for direct connection to and control of some current digital audio players and other USB devices that contain MP3, WMA, or AAC music files. Some USB devices with security software and digital rights-protected files may not work. Please see your Acura dealer for details on compatibility. Windows Media® is a trademark or registered trademark of Microsoft Corporation in the United States and/or other countries. 21 290 hp @ 6,200 rpm (SAE net) 22 19 city/27 highway/22 combined mpg rating for MDX FWD model without Idle Stop. Based on 2017 EPA mileage ratings. Use for comparison purposes only. Your actual mileage will vary depending on how you drive and maintain your vehicle, driving conditions, and other factors.
