Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomize the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

THE NEW RANGE ROVER SPORT

The New Range Rover Sport is undoubtedly our most dynamic SUV ever. Performance and capability are exceptional; and a range of advanced technologies are designed to deliver an improved driving experience. With sportier design cues and a powerful, muscular stance, this is a vehicle designed to create an impression.

INTRODUCTION

INTRODUCING THE NEW RANGE ROVER SPORT

A muscular, powerfully planted stance and distinctive rearward sloping roof endow this vehicle with a truly sporting character. A dynamic look completed by the new sleek wrap-around LED headlights.

Exceptional on-road performance and all-terrain capabilities elevate this vehicle into a class of its own. Exuding confidence, its sporty design is complemented by a new level of driving dynamics and seamlessly integrated technology. With a wide range of engines and a light aluminum monocoque body, it delivers a faster, more refined performance.

While a new level of Land Rover InControl® technology, including the Touch Pro Duo infotainment system*, 12.3" Interactive Driver Display and full color Head-up Display** delivers an even more luxurious and engaging driving experience.

LIGHTING TECHNOLOGY

All-round exterior LED lighting is standard. Designed to last the lifetime of the vehicle, LED lights are more energy-efficient and the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring. See page 43.

SEAMLESSLY INTEGRATED TECHNOLOGY

Touch Pro Duo has two 10" high-definition Touchscreens to ensure you stay connected and entertained*. This is complemented by the 12.3" Interactive Driver Display with configurable touch steering wheel controls and our optional second generation full color Head-up Display**. See page 27.

PERFORMANCE

A range of potent powertrains deliver breathtaking performance. The second-generation 5.0 liter V8 Supercharged Gas engine offers an improved output of 518HP and an even more powerful 575HP in the SVR. See pages 19-20.

DRIVING DYNAMICS

The lightweight all-aluminum body helps deliver an unrivalled balance of agility, handling and refinement. A suite of precision-engineered technologies includes Dynamic Response and Electronic Active Differential with Torque Vectoring by Braking**. See page 24.

COMPOSED TOWING

A towing capacity of up to 7,716lbs, together with a choice of optional towing features – including a tow hitch receiver and Advanced Tow Assist – ensure the New Range Rover Sport can handle the most demanding tasks. See page 49.

INTERIOR LUXURY

The meticulously designed, contemporary interior comes with enhanced comfort and well-being through optional Four-zone Climate Control and Cabin Air Ionization. The introduction of Semi-Aniline leather on the 380HP HSE Dynamic and Autobiography provides even greater levels of luxury. See page 13.

DRIVER FOCUSED COCKPIT

Designed around the driver, the signature cockpit feel of the front row seating is complemented by a range of intuitively placed features. These include the uncluttered console with CommandShift® 2 and optional gearshift paddles on the steering wheel. See page 13.

INTELLIGENT VERSATILITY

Innovative design features include flexible storage options such as the new additional upper glovebox, the front center console refrigerator compartment, flexible 5 + 2 seating and a range of charging options including up to five USB ports, four 12V power sockets, and two 110-Volt Power Outlets. See pages 44-47.

SUPREME ALL-TERRAIN CAPABILITY

Intelligent All Wheel Drive (AWD) systems and a range of standard and optional all-terrain technologies including electronic air suspension, Terrain Response®** and two-speed transfer box with electronic center differential, ensure an exceptional off-road performance. See pages 23-25.

*Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control. **These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Jaguar Retailer for more details.

BUILD YOUR OWN

INTRODUCING THE NEW 2019 RANGE ROVER SPORT PLUG-IN HYBRID ELECTRIC VEHICLE*

Capability, performance and cutting-edge technologies are at the heart of every Land Rover vehicle. Taking our vehicles into the future, electric power now propels us into an exciting new era. One of our first Plug-in Hybrid Electric Vehicles (PHEV) is driven by our most innovative powertrain yet; an advanced Ingenium gas engine and electric motor combine to give an output of 398 HP and deliver 0-60 mph in 6.3 seconds[†], together with a full electric charge, it has a range of up to 31 miles**. Drivers can select from two driving modes to best suit their needs. See pages 14-17 for details.

EV (Electric Vehicle) mode – full electric drive.[‡]

Parallel Hybrid mode (the default driving mode) – combines gas and electric drive. When in Parallel Hybrid mode, the driver can optimize battery charge or fuel economy by utilizing two alternative charge management functions:

SAVE function – prevents the battery charge dropping below the level which has been selected.

Predictive Energy Optimization (PEO) function – by entering a destination in the Navigation system[†] the driver enables the feature, which utilizes altitude data for the route selected to intelligently switch between the electric motor and gas engine to maximize fuel economy.

31 MILE EV RANGE**

PHEV is fully capable of managing many commutes in full Electric Vehicle (EV) mode, with a range of up to 31 miles. See page 14.

EASY OVERNIGHT CHARGING

PHEV can fully charge from a domestic electricity supply in approximately 14 hours[‡] so it's ideally suited to charging at home overnight, enabling emissions free commuting for up to 31 miles*. See page 14.

CHARGING SOLUTIONS

Using a dedicated 32 amp home AC charger a full charge can be achieved in as little as 2.75 hours[‡]. In addition, various charging points can be used at offices, stores, parking lots and other designated public charging places. See page 14.

REFINED DRIVE

Our quietest Range Rover Sport yet, PHEV ensures seamless transition between the gas engine and electric motor, delivering optimal refinement. See page 15.

NO COMPROMISE ON CAPABILITY AND PERFORMANCE

PHEV is precise and uncompromising. It is fully capable of handling off-road situations such as rock crawl. Its on-road performance is equally remarkable, delivering an impressive 0-60 mph in 6.3 seconds^{††} through a combination of electric motor and gas engine. See page 15.

INCONTROL CONNECTIVITY

With the Protect and Remote features, a variety of functions are available through your smartphone device, from enabling the driver to view charge status as well as controlling the charging time. See page 16.

SEAMLESS DESIGN

Integrating the charging port into the front grille provides easy connection without compromising the vehicle's dynamic design. See page 14.

*Vehicle's estimated availability is Summer 2018. **Manufacturer-estimated up to 31 miles EV range with fully charged battery. Actual range may vary. †Parallel Hybrid mode will be automatically re-engaged should the driver require more power and torque than is available, or the battery charge drops to an insufficient level to maintain progress.

Rear cargo space capacity is reduced on P400e models, please see page 45 for more detail.

Vehicle shown: Range Rover Sport Autobiography with Bright Package in Fuji White with optional equipment.

††Always follow local speed limits. ‡Charging times will vary by market, power supply and charging solution. Please refer to landroverusa.com for further information.

DESIGN

EXTERIOR

Muscular and perfectly proportioned, Range Rover Sport is designed to command attention wherever you take it. With its distinctive silhouette, rearward sloping roof and continuous waistline, the Range Rover DNA is unmistakable throughout; its presence more formidable than ever. Every aspect of the vehicle has been designed with precision for immediate impact; its lower, sportier stance is enhanced by the revised front and rear bumpers with integrated exhaust finishers.

A cleaner, more dynamic design, there's a contemporary feel everywhere you look, from the new Range Rover Sport grille, redesigned hood vents and fender vents to the refined, yet sporty wheel options such as 22" 9 split-spoke with Dark Grey Diamond Turned finish. A dramatic, modern feel is completed by the wrap-around LED headlights. This powerful, athletic vehicle is now more compelling than ever.

Vehicle shown: Range Rover Sport Autobiography in Firenze Red with Ebony/Vintage Tan interior with optional equipment.

BUILD YOUR OWN

INTERIOR

Luxurious, supremely comfortable and exceptionally functional, the Range Rover Sport is a driver's vehicle through and through. The signature cockpit has been extensively reimagined; every element meticulously designed and beautifully executed. Intuitive controls include the CommandShift® 2 gearshift providing the option of manual gear shifting and flush touch-sensitive steering wheel switches.

The sense of luxury and innovation is reinforced by the revolutionary Touch Pro Duo technology, which incorporates two 10" Touchscreens* as standard. The finest materials combine seamlessly with dynamic sports detailing such as the optional Extended Carbon Fiber veneer. The centerpiece is the bold intersection between the sportier horizontal elements of the instrument panel and the vertical lines of the center console. While the overall cleaner design is complemented by the enhanced optional Configurable Ambient Interior Lighting with a striking graphic light running the length of the console and the uncluttered feel is maintained by flexible storage solutions such as the new additional upper glovebox.

The distinctive Sports Command Driving Position elevates the driver to provide a heightened sense of confidence and control, giving sweeping views over the road ahead. And for the first time on Range Rover Sport, the seats can be specified in the finest Semi-Aniline leather with a Cut Diamond pattern in contemporary new color combinations – Ebony Vintage Tan and Ebony Eclipse – to ensure this vehicle looks and feels as good as it drives.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

PERFORMANCE AND CAPABILITY

NEW 2019 RANGE ROVER SPORT PLUG-IN HYBRID ELECTRIC VEHICLE*

Designed and engineered for an increasingly carbon conscious world, our first ever Range Rover Sport Plug-in Hybrid Electric Vehicle (PHEV), the P400e, delivers a dynamic driving experience with exceptional Range Rover Sport capability both on and off-road.

P400e uses the combination of an advanced 2.0 liter 296HP Si4 Ingenium gas engine supported by a high capacity 85kW electric motor to deliver a combined output of 398HP. The electric motor can either supply its power in parallel with the engine, or drive the vehicle in the manually selectable Electric Vehicle (EV) mode. The large 13kWh capacity battery gives the vehicle an all-electric range of up to 31 miles** from a full charge with zero CO₂ tailpipe emissions.

The P400e powertrain has been integrated seamlessly into the vehicle's design. The charging point is discreetly located in the front grille, which makes connection to a power supply both convenient and easy while lending itself to routine overnight home charging.

The battery can be fully charged in approximately 14 hours[†] using the home charging cable supplied as standard. When rapid charging, a full charge can be achieved in as little as 2.75 hours[†] at home using a dedicated 32 amp AC charger, or away from home at various public charging points. The P400e comes with a charging cable that can be stored in the vehicle's cargo space with the included storage case and retention system.

*Vehicle's estimated availability Summer 2018. **Manufacturer-estimated up to 31 miles EV range with fully charged battery. Actual range may vary. [†]Charging times will vary by market, power supply and charging solution. [‡]Always follow local speed limits. Please refer to landroverusa.com for further information. Rear cargo space capacity is reduced on P400e models, please see page 45 for more detail. Vehicle shown: Range Rover Sport Autobiography with Bright Package in Fuji White with optional equipment. Charging device shown not available in the U.S. Please contact your local Land Rover Retailer for further details.

The P400e delivers an exceptionally refined experience. The electric motor can produce its maximum torque from standstill and delivers a virtually silent drive. If engine torque is required, the system uses the Integrated Starter Generator (ISG) for virtually instant starting, enabling engine torque to be perfectly blended with electric motor torque, smoothly delivering the driver's demand using the hybrid integrated transmission.

Off-road capabilities are uncompromised and in some circumstances enhanced. The additional torque provided by the electric motor at low speed is an advantage in a variety of off-road situations.

The combination of the instant torque from the electric motor with that from the highly efficient direct injection gas engine delivers a torque profile normally associated with large capacity gas or diesel engines providing performance that takes it from 0-60 mph in 6.3 seconds^{††} with a top speed of 137 mph^{††}.

BUILD YOUR OWN

PLUG-IN HYBRID ELECTRIC VEHICLE

In Parallel Hybrid mode (the default driving mode), the electric motor supplies its power in parallel with the engine. There is a seamless transition between the 85kW electric motor and the Si4 Ingenium gas engine as the system smoothly starts the engine and then blends electric motor and gas engine power together using the hybrid integrated transmission. Intelligent battery management, which charges the battery through regenerative braking and even when the vehicle is coasting, ensures P400e always has sufficient charge to provide 398HP power output to deliver seamlessly impressive performance when required.

When in the default driving mode (Parallel Hybrid) the driver can optimize fuel economy or battery charge by utilizing one of two alternative charge management functions:

SAVE function – manually selected through the Touchscreen[†], the SAVE function prevents the battery charge from dropping below the level which has been selected. This allows the driver to provision for zero-emission travel at a later point in the trip. The vehicle will only use the electric motor if the battery has received a charge over and above the saved level through regenerative braking.

Predictive Energy Optimization (PEO) function – entering a destination in the vehicle's navigation system[†] will automatically engage the PEO function. By utilizing altitude data for the chosen route, PEO intelligently switches between the electric motor and gas engine to maximize fuel economy throughout the trip.

In addition to operating as a parallel hybrid, the large capacity battery enables the driver to operate the vehicle in **EV (Electric Vehicle) mode** – manually selected by a button on the console, EV mode enables the vehicle to run solely on the electric motor using the energy stored in the battery, the ideal solution for zero-emission trips. The system will introduce the gas engine should the driver require more power than is available through the electric motor alone, or if the battery charge drops to an insufficient level to maintain progress.

Operation of the P400e is further enhanced through specific functionality within the Land Rover InControl Remote feature (see page 30). This enables the driver to use a smartphone to view key data such as charge status as well as controlling the charging time.

COMBINED GAS ENGINE AND ELECTRIC MOTOR

| POWER (HP) | TORQUE (LB-FT) | ACCELERATION 0-60 MPH** (SECONDS) | TOP SPEED (MPH)** |
|------------|----------------|-----------------------------------|-------------------|
| 398 | 472 | 6.3 | 137 |

1 85KW ELECTRIC MOTOR

PHEV features a high power 85kW permanent magnet synchronous electric motor to deliver power effortlessly.

2 INTEGRATED HYBRID AUTOMATIC TRANSMISSION

A seamless transition from EV to the Internal Combustion Engine (ICE) is delivered via the hybrid integrated transmission.

3 2.0 LITER INGENIUM ENGINE

The aluminum 2.0 liter 296HP Si4 Ingenium gas engine is lighter and more efficient than predecessors.

4 13KWH HIGH VOLTAGE BATTERY

The large capacity battery gives the vehicle an all-electric range of up to 31 miles* from a full charge with zero CO₂ tailpipe emissions.

5 7KW ON-BOARD CHARGER

The powerful 7kW on-board charger can deliver a full battery charge in as little as 2.75 hours dependent on charging station capability.

6 INTEGRATED STARTER GENERATOR

The Integrated Starter Generator (ISG) delivers an exceptionally refined starting of the gas engine when required.

7 REGENERATIVE BRAKING

Regenerative braking uses the electric motor to harvest kinetic energy while braking, converting it to electrical energy that is used to recharge the high voltage battery.

EV SYSTEM

| EV RANGE* (MILES) | CHARGER CAPACITY (KW) | BATTERY CAPACITY (KWH) | EV TOP SPEED (MPH)** |
|-------------------|-----------------------|------------------------|----------------------|
| 31 | 7 | 13 | 85 |

16 *Manufacturer-estimated up to 31 miles EV range with fully charged battery. Actual range may vary. **Always follow local speed limits. †Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

ENGINES AND TRANSMISSION

From power and sheer driving pleasure to refinement, there is a range of engines available and each has been optimized for specific attributes to cater for all needs. All engines are equipped with Stop/Start technology and smart regenerative charging (except P400e); this feature prioritizes the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and helps to reduce fuel consumption. Ingenium technology underpins the 4-cylinder engines in the Range Rover Sport range. These low friction, all-aluminum engines have stiff cylinder blocks and twin balancer shafts to ensure inherently low levels of vibration, for smooth day-to-day performance.

8-SPEED AUTOMATIC TRANSMISSION

All engines in the Range Rover Sport are coupled with an 8-speed Automatic Transmission. With eight closely spaced ratios, the transmission ensures that you are always in the optimum gear, helping to optimize fuel efficiency and acceleration. Gear changes are almost imperceptible and shift schedules intelligently adapt to your driving style.

DIESEL ENGINES

Td6

The 3.0 liter V6 Turbocharged Diesel provides 254HP and an impressive 443 lb-ft of torque, for smooth, progressive performance.

- The switchable coolant pump improves engine warm-up by modulating coolant flow to engine demand, for improved fuel economy and emissions.
- The two-stage oil pump reduces parasitic losses by matching the flow of lubricant to engine load, increasing engine efficiency.
- Improved response due to optimized turbocharger compressor, turbine and variable nozzle designs. Turbo bearings ceramic ball-races further improve friction and reduced turbo lag.
- An eight-nozzle fuel injector design ensures perfect atomization of the fuel injected, optimizing combustion for power and emissions.
- All Td6 variants are equipped with Stop/Start to help maximum economy and reduce idling, especially during urban driving.

| | POWER (HP) | TORQUE (LB-FT) | ACCELERATION 0-60 MPH* (SECONDS) | TOP SPEED (MPH)* | CAPACITY (CC) |
|-----|------------|----------------|----------------------------------|------------------|---------------|
| Td6 | 254 | 443 | 7.2 | 130 | 2,993 |

BUILD YOUR OWN

GAS ENGINES

V6 SUPERCHARGED 340/380HP

3.0 liter V6 340/380HP Supercharged Gas engine produces 332 lb-ft of torque for exhilarating performance.

- The Roots-type Twin Vortex System (TVS) supercharger provides linear power delivery and maximizes responsiveness.
- A spray guided direct injection system carefully manages the air-fuel mixture in the combustion chamber for improved combustion, extracting more energy from the fuel injected. This results in excellent power, while helping to improve fuel economy and reducing emissions.
- The engine also features dual independent variable cam timing to vary inlet and exhaust valve operation, working alongside lightweight pistons with ultra-low friction piston rings, for increased performance and efficiency.
- Two counter-rotating balancer shaft system is employed to enhance refinement; resulting in an engine with incredibly smooth power delivery.

V8 SUPERCHARGED 518HP

With 518HP and 461 lb-ft of torque the 5.0 liter V8 Supercharged Gas engine provides stunning performance for ultimate dynamism and driver engagement.

- The V8 has a compact and lightweight all-aluminum design, with impressively low levels of internal friction.
- The engine has been optimized around a state-of-the-art Bosch engine management system. This features high-pressure direct injection with a centrally mounted, multi-hole, spray-guided injection system.
- Fitted with a sixth generation, Twin Vortex System (TVS) supercharger, the engine offers exceptional thermodynamic efficiency and extremely refined noise levels. The supercharger fully utilizes the additional capacity of the 5.0 liter engine, generating a torque profile that delivers outstanding levels of power in a linear and engaging manner.
- The result is an impressively powerful yet refined drivetrain that delivers on both sporting excitement and luxurious refinement whenever required.

V8 SUPERCHARGED 567HP

Exclusive to SVR the 5.0 liter Supercharged V8 Gas engine has been uprated to deliver 575HP and 516 lb-ft of torque. This is enabled by a recalibration of the engine and its management system to increase maximum available boost pressure. Maximum torque is delivered at 3,500-5,000 rpm.

Refer to the V8 Supercharged Gas engine for full details.

BUILD YOUR OWN

LEGENDARY BREADTH OF CAPABILITY

The new Range Rover Sport continues to offer outstanding capability on and off-road, with permanent All Wheel Drive (AWD) and the Land Rover revolutionary Terrain Response® system as standard which means this capability can be utilized by all drivers, expert and novice alike. This extraordinary capability can be extended to suit individual requirements with a range of additional, optional all-terrain technologies*.

ELECTRONIC AIR SUSPENSION

A sure-footed, composed drive is completed by the latest electronic air suspension provided as standard, which provides exceptional wheel articulation and poise. It changes the vehicle's height quickly, allowing cross-linking of the diagonal wheels to help keep all four wheels on the ground on very uneven surfaces. Added to which, it makes loading heavy objects into the cargo area easier as you can lower the vehicle's rear suspension height by +/- 2 inches to suit your needs. These functions can be operated via the 10" Touchscreen, a button in the cargo space area or remotely using the key fob.

The Speed Lowering system uses the electronic air suspension to reduce aerodynamic drag and fuel consumption at cruising speeds by lowering the vehicle by over half an inch from normal ride height when the speed reaches 65 mph**.

TWO-SPEED TRANSFER BOX WITH ELECTRONIC CENTER DIFFERENTIAL

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing. The optional two-speed transfer box system gives you precise speed and control in such instances. The heart of the two-speed system is the electronic center differential that offers a 50:50 torque split between front and rear axles with the ability to pre-emptively lock the axles before slip commences.

TERRAIN RESPONSE®

When you manually select Land Rover's unique standard Terrain Response® system, it sets the vehicle up optimally to match the demands of the terrain, by adapting the responses of the vehicle's engine, gearbox, differentials and chassis systems. There are five manual Terrain Response settings: Comfort, Grass/Gravel/Snow, Mud and Ruts, Sand, and ECO Mode*.

TERRAIN RESPONSE® 2

Terrain Response® 2 is an option that takes the capabilities of the award-winning system to a new level. This features an automatic setting which monitors the current driving conditions and systematically selects the most suitable terrain setting*. It also includes additional Rock Crawl Mode. An additional setting is available when Terrain Response® 2 with Dynamic Program is specified. Dynamic Program tunes the suspension to deliver even tighter body control with flatter handling and sharper responses. You can manually override the system should you wish.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Always follow local speed limits.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

BUILD YOUR OWN

ADAPTIVE DYNAMICS

Adaptive Dynamics* makes the miles go by virtually unnoticed. The system monitors vehicle movements up to 500 times a second, reacting to driver or road inputs almost instantaneously to give greater control and minimize body movement ensuring a composed, flat ride. The system even senses off-road conditions, and enhances damping accordingly so driver and passengers arrive at their destination refreshed and relaxed†.

CONFIGURABLE DYNAMICS

To enhance either refinement and comfort or the vehicle's performance, the Configurable Dynamics** function allows you to configure the Range Rover Sport throttle mapping, gearbox shift points, steering settings and suspension to suit your particular driving needs.

ELECTRONIC ACTIVE DIFFERENTIAL WITH TORQUE VECTORING BY BRAKING†

The Torque Vectoring by Braking system† delivers responsive, controlled cornering and handling even in tight turns. The Electronic Active Differential and vehicle's braking system constantly balances the distribution of engine torque between the four wheels when cornering.

The system is also active in off-road conditions using the relevant Terrain Response® settings. It can be very effective in conditions such as sand, where it helps the vehicle turn in and avoid excessive understeer.

DYNAMIC RESPONSE†

Dynamic Response†† improves vehicle handling through hydraulic roll control, optimizing on-road performance and passenger comfort, by reducing the amount of body lean during cornering. By controlling the front and rear axles independently, it can deliver increased low-speed agility, along with enhanced high speed stability and greater steering precision.

- 1 DRIVER ASSISTANCE
- 2 ULTIMATE CAPABILITY
- 3 COMPOSURE

ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC) is a system that enables you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including: mud, wet grass, ice, snow and dirt roads. Operating like a cruise control system, it functions at low speed between 1 mph and 18 mph, enabling you to maintain full concentration on steering and finding a path through obstacles‡.

LOW TRACTION LAUNCH

Providing you with optimum torque control when you move off from a standstill, Low Traction Launch can be activated from the Touchscreen and enhances capability in slippery conditions like wet grass and snow‡.

HILL DESCENT CONTROL (HDC®)

The Land Rover patented Hill Descent Control (HDC®) is a standard feature. It assists the driver with controlled descents of difficult slopes. It does so by maintaining a constant speed and applying braking separately to each wheel‡.

*Standard on V8, V6 Supercharged 380HP and P400e engines. Available as part of Off-Road Package on TdV6 and V6 Supercharged 340HP engines. **Fitted to vehicles with V8 engines. †Fitted as standard with V8 and P400e engines. ††Fitted as standard on V8 engines. ‡These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. TECHNOLOGY

INFOTAINMENT

Delivering a wealth of information and entertainment, every Range Rover Sport is equipped with our Land Rover InControl® infotainment system, Touch Pro Duo. It features intuitive and advanced integrated technologies to ensure everyone can make the most of their trip[†].

TOUCH PRO DUO[†]

The standard 10" dual high-definition Touchscreens allow the user to view required information while simultaneously being able to interact with additional features, for increased flexibility and efficiency of use. For instance, you can use the navigation system in the upper screen while controlling media on the lower screen[†]. Direct access to cabin and seat temperature controls are also available via the multi-function Dynamic Dials. For a truly elegant and streamlined appearance, the steering wheel also has hidden-until-lit, touch-sensitive switches as standard. One of these switches is programmable, so that it can be personalized to your preferences to accomplish a host of functions.

INTERACTIVE DRIVER DISPLAY[†]

The 12.3" high-definition Interactive Driver Display that can receive and project a vast amount of driving information, entertainment and data including navigation, phone and media. Its high resolution ensures the utmost clarity and its refined processing engine delivers smooth moving pin sharp graphics. Features can be accessed on either the Interactive Driver Display or the Touch Pro Duo Touchscreens.

HEAD-UP DISPLAY

To reduce distraction or the need for you to take your eyes off the road, Head-up Display* is an option that presents key vehicle data such as your speed, gear position and navigation directions on the windshield. It features crystal clear full-color graphics in high resolution, enabling you to see all driver inputs and information with ease, including phone/call status. The feature can be turned on and off dependent on driver preference**.

REAR SEAT ENTERTAINMENT

The optional Rear Seat Entertainment system provides two 8" screens built in to the rear of the front headrests or two 10" high-definition seat mounted articulating Touchscreens. It includes 'Trip Status', a navigation summary screen which displays a pop-up for the rear occupant detailing the time and distance to destination. Both systems come with a pair of WhiteFire® digital wireless headphones and HDMI, Mobile High-Definition Link (MHL) and USB connections.

[†]For optimal performance, solar attenuating glass may be required. Please consult your Land Rover Retailer for further information. ^{**}These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. [†]Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control.

BUILD YOUR OWN

CONNECTIVITY

Land Rover InControl® is a suite of standard features that connects you to your vehicle and links you seamlessly and securely with the outside world. With a selection of apps, even when you're away from your vehicle, some of the InControl features stay with you making sure the Land Rover experience is more enjoyable than ever*.

STANDARD FEATURES

VOICE RECOGNITION SYSTEM

So you can complete tasks without taking your eyes off the road, the Range Rover Sport offers intelligent voice recognition so you can concentrate on the road**.

PROTECT

Land Rover Optimized Assistance – If you break down you can make a direct call to the Land Rover Assistance team by pressing the button on the overhead console or from the Assistance screen within the Remote smartphone app.

SOS Emergency Call – In cases where the airbags¹ deploy, SOS Emergency Call will automatically connect you to the emergency response team who will notify the emergency services to your location.

Journey Tracking – This opt-in feature can automatically record your trip history including your route and mileage statistics. This information can be exported by email to use for expense reporting and can be imported to a spreadsheet.

Vehicle Status Check – Use your smartphone to remotely check current fuel level range, and status of door and window position and locks. See the last parked location of the vehicle and find your way back to it with on-foot directions.

NAVIGATION PRO

Navigation Pro* allows you to save your favorite places, use pinch and zoom gestures for simple map exploration and can display a choice of either 2D or 3D crystal clear map graphics. Navigation Pro functionality is further enhanced by the Connect Pro Package.

CONNECT PRO

Connect Pro* consists of Remote, Pro Services with 4G Wi-Fi Hotspot^{††} and InControl Apps, and is designed to enhance your in-car and out-of-car experience, ensuring you and your passengers enjoy the journey while remaining connected to the world.

Pro Services include:

- **Real Time Traffic Information*** – Uses live traffic data feeds to give you the most accurate picture of what the traffic is like on the way to your destination.
- **Online Search*** – Wherever you are, you can search the surrounding area for places of interest. The system can access expert destination information, travel tips and inspiration as well as online travel reviews of the local area.
- **Planning Routes and Door-to-Door Routing*** – Before setting off, use the optional Route Planner app or Online Search, save locations or set your destination. The app uses the Cloud to send your destination automatically to your vehicle's navigation screen. Once you've parked, the Route Planner app will guide you to your destination – a true door-to-door experience which includes public transportation options.

- **Share ETA*** – You can share your estimated time of arrival so your selected contact(s) will know exactly when you will arrive, as calculated by the navigation guidance system. If you're running late, Share ETA can then send automatic updates via text messages or email, without any further action from you.
- **Satellite View*** – When you want to get the context of your surroundings from overhead, simply switch to satellite view.
- **Fuel Prices*** – When you're going to fill up, the Fuel Price service not only finds gas stations along your route, it also enables you to compare fuel prices so you can keep your costs down.
- **Commute Mode*** – Allows the system to learn your commutes and automatically advises you of the expected journey time based on live and historical traffic movements without you having to input a destination. The system learns the routes you take for a given destination and then advises which of those is the quickest. The feature can be turned on and off dependent on driver preference.
- **Parking Service*** – As you approach your destination, you can see where parking is available. Simply tap on your preferred parking and the navigation system updates to direct you to it.
- **Online Routing*** – While you're on your way to a destination the system monitors live traffic conditions and takes into account typical traffic patterns for that time of day, keeping you on the optimum route.

*Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control. **Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. ¹Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat. ^{††}The Wi-Fi hotspot is intended for passenger use only. InControl features may require an additional subscription with separate terms and conditions.

REMOTE

Remote provides information on your vehicle and enables you to interact with it remotely. Compatible with most smartphones, Android Wear™ or Apple Watch®, this service includes:

- **Remote Lock/Unlock** – Lock or unlock your doors remotely with the click of a button. Simply press the ‘lock’ button on the Vehicle Security screen of the Remote smartphone app to single lock the doors, arm the alarm, fold in the side mirrors and close the windows. Press the ‘unlock’ button to unfold the side mirrors, turn on the dipped headlights and cause the hazard lights to flash twice.
- **Beep/Flash** – This feature turns on your Land Rover’s hazard lights, dipped headlights and sounds an audible alert to help you locate your vehicle.
- **Remote Start with Preheat/Precool** - Remote engine start and remotely preheat/precool your Land Rover using the climate control function.

REMOTE – PHEV ENHANCEMENTS

- **Charging Status Information** – Stay continually updated with key battery function indicators including charge state, charging status, charge rate, plug state and estimated EV range.
- **Remote Control Actions** – Use your smartphone to remotely start and stop charging, manage charging costs and even set the maximum state of charge.

LAND ROVER INCONTROL® APPS

InControl Apps technology allows vehicle-optimized apps on your Android or Apple smartphone to be controlled through the vehicle’s Touchscreen, including contacts, calendar and music player via a USB cable. You can also download third-party apps offering a vast range of services. Applications include:

- **Spotify*** – Access a library of more than 30 million songs with this seamlessly integrated app – the first true in-car, Spotify experience. Featuring all the same intuitive functionality as the Spotify smartphone app, you can search songs, stations and recommendations, create playlists and access your music in offline mode. Simply log in using your existing Spotify Free or Spotify Premium account.
- **Tile**** – Helps you find lost or misplaced items in seconds. Attach a tiny Bluetooth® tracker Tile to your keys, wallet or bag. The easy-to-use Tile app can then help you find these items should they be misplaced. The app is accessible any time through your vehicle’s Touchscreen, allowing you to make sure you have everything you need with you, before you set off on your trip.

*Only available on Apple smartphones. Not available on Android smartphones.

**Requires InControl Apps. Bluetooth tracker tiles must be purchased separately. ©2016 Tile Inc. Tile and the Tile design are trademarks of Tile, Inc.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under license. iPhone® is a registered trademark of Apple Inc., registered in the US and other countries. Please ensure iPhone compatibility is reviewed with your local Land Rover Retailer.

BUILD YOUR OWN

AUDIO

A vehicle's cabin is the ideal place within which to experience your personal choice of music and the Range Rover Sport has the option of four different audio systems to bring your music to life:

ENHANCED SOUND SYSTEM

Outstanding acoustic range through eight speakers.

MERIDIAN™ SOUND SYSTEM

Great definition, crystal clear highs and full, deep bass – delivered through the careful arrangement of 13 speakers including a dual channel subwoofer.

MERIDIAN SURROUND SOUND SYSTEM

All the fullness and clarity of a live performance delivered through an arrangement of 19 speakers including a dual channel subwoofer – seamlessly brought together using Trifield™ technology. Exclusive to Meridian, Trifield perfectly blends the center and surround channels with left and right channels ensuring an optimum, consistent sound experience for each passenger.

MERIDIAN SIGNATURE SOUND SYSTEM

This delivers truly life-like reproduction, creating a profound, personal sound experience for every seat. World-first Trifield 3D technology takes surround sound to the next level, the Signature Sound System includes 23 speakers including a dual channel subwoofer. Incredibly authentic, the sense of cabin space is expanded to a 3D experience – rendering all the instruments, performers and venues of your favorite performances in true scale and location.

SIRIUSXM® SATELLITE RADIO* AND HD RADIO™

Equipped as standard Sirius XM and HD Radio technology offers improved sound quality, and a wide choice of stations and entertainment.

MERIDIAN™

Formed in 1977 in Cambridgeshire, England, Land Rover's audio partner Meridian has pioneered many firsts including active speakers and the world's first digital surround sound processor.

Meridian's audio technology input has helped ensure that the Range Rover Sport is the most superb space within which to experience sound. Meridian Cabin Correction technology was utilized to analyze cabin shape, acoustics and resonance characteristics in order to help remove unwanted sounds.

The advanced algorithm ensures that the rhythm, punch and timing of any piece of music are heard precisely how the artist intended, providing a consistently exceptional quality audio experience for all passengers in the vehicle.

DIGITAL SIGNAL PROCESSING

Brings all elements of the audio system together as one, for performance that would otherwise require significantly larger speakers.

MERIDIAN CABIN CORRECTION

The advanced algorithm of Meridian's Cabin Correction tailors the sound experience to the precise acoustics of the Range Rover Sport's interior.

MERIDIAN DIGITAL DITHER SHAPING

To maintain the quality of musical recordings, they are converted into a common digital format. Meridian Digital Dither Shaping ensures that digital signal conversions are made smoothly and seamlessly, preserving the finest details of the audio performance. The result is authentic musical conversion, evoking the emotions of the original recording.

TRIFIELD™

Exclusive to Meridian, Trifield blends the center and surround channels seamlessly with left and right channels, delivering a consistent, concert-like experience for all occupants.

TRIFIELD 3D

Building on Meridian's proven Trifield surround sound technology – world-first in-car Trifield 3D truly brings musical performances to life. Through the addition of dedicated height channels, the sense of cabin space is expanded to a 3D experience, for a supreme sense of scale and definition to your music.

DRIVER ASSISTANCE

MAKING DRIVING EASIER

From negotiating city traffic or the highway, to providing additional assistance for you and your passengers, there's a wealth of innovative technologies available; either as standard or as part of an optional package. Whichever you choose, you'll find every single feature has been designed and engineered to heighten your enjoyment of the vehicle.

DRIVE FEATURES

Lane Departure Warning

- **Cruise Control and Speed Limiter** allows the driver to maintain the current speed of the vehicle without the need for continued use of the accelerator pedal, making driving easier and more enjoyable. The Speed Limiter will also allow the driver to pre-set a maximum specified speed which the vehicle will not exceed. Both functions can be easily turned on or off by the driver as desired*.
- **Emergency Braking** can help to prevent foreseeable collisions with other vehicles or pedestrians. If a potential frontal collision is detected, a warning is displayed giving you time to take action. A camera at the front of the vehicle monitors at speeds from 3 to 50 mph for frontal collisions and 3 to 37 mph** for pedestrians. If a collision is still anticipated and you have taken no action, this system will apply the brakes to help reduce the severity of the possible impact*.
- **Lane Departure Warning** can help make long trips more enjoyable. The system is designed to sense when your vehicle is unintentionally drifting out of your lane, and to notify you with a visual alert and a gentle vibration of the steering wheel*.

Adaptive Cruise Control with Queue Assist and High-Speed Emergency Braking

- **Adaptive Cruise Control with Queue Assist and High-Speed Emergency Braking** works when you're cruising on the highway or traveling in slow-moving traffic, it is designed to keep your vehicle a set distance from the one in front should it slow or stop. Should the vehicle in front stop completely, your vehicle is designed to come to a smooth stop*. Once the traffic moves, simply touch the accelerator and Adaptive Cruise Control will resume following the vehicle in front. The system can be activated from 12 mph up to highway speeds. If a collision is unavoidable, Adaptive Cruise Control will engage High-Speed Emergency Braking*.

OPTIONAL DRIVE PACKAGES

DRIVE PACKAGE†

Traffic Sign Recognition with Adaptive Speed Limiter

- The optional Drive Package offers a range of features that help keep you informed. The Drive Package includes:
- **Driver Condition Monitor** is designed to detect if you're starting to feel drowsy and gives you an early warning when you need to take a break*.
 - **Blind Spot Monitor** is designed to alert you to vehicles in, or quickly approaching your blind spot. When a vehicle is detected, a small warning light will illuminate in the corresponding side mirror. If you apply the turn signal in the direction of the obstacle, the warning light will flash to highlight potential danger*.
 - **Traffic Sign Recognition** keeps you informed and aware on the road, by displaying speed limits and no passing signs in the instrument cluster, where they can easily be seen. When activated, Adaptive Speed Limiter uses Traffic Sign Recognition information to adjust your vehicle's speed accordingly*.
 - **The Adaptive Speed Limiter** uses data from the Traffic Sign Recognition system to automatically select speed limit. If the system detects the vehicle is above the speed limit, such as when entering a lower limit, the accelerator will be disabled allowing the vehicle to coast down to the limit. The driver can also apply the brakes to achieve this more quickly*.

DRIVE PRO PACKAGE

Blind Spot Assist

- For an even more relaxed drive the optional Drive Pro Package contains a wide range of driver assistance features including the Driver Condition Monitor and Traffic Sign Recognition in the Drive Package, plus:
- **Lane Keep Assist** is designed to detect when your vehicle is unintentionally drifting out of your lane, and to gently steer you back*.
 - **Blind Spot Assist** is designed to help prevent foreseeable collisions. If your vehicle detects another car in your blind spot when you begin to change lanes, this system illuminates a warning light in the corresponding side mirror and provides precisely calculated steering torque – guiding your vehicle away from the approaching vehicle*.
 - **Adaptive Cruise Control with Queue Assist and High-Speed Emergency Braking** – See page 34 for description.

BUILD YOUR OWN

OPTIONAL PARK PACKAGES

PARK FEATURES

Front and Rear Parking Aid

- **Front and Rear Parking Aid** helps make maneuvering even easier. When you select Reverse, or choose to activate them manually, sensors located in the front and rear bumpers are triggered. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles*.
- **Rear View Camera** provides improved visibility when reversing. Static lines representing the vehicle's outer perimeter and predicted path are superimposed on the rearward image, to make parking in tight spots as easy as possible*. This valuable parking aid also helps when hitching a trailer.

Surround Camera System

- **Surround Camera System** uses four digital cameras discretely placed around the vehicle, providing a 360° overhead view on the Touchscreen. With the capacity to display several different views at the same time, this helps with various maneuvers from parking by a curb, to getting in and out of tight spaces and intersections*.

PARK PACKAGE**

360° Parking Aid

The optional Park Package assists you with maneuvering in tight spaces and in city environments, it features:

- **360° Parking Aid** gives you confidence when maneuvering in tight spaces. Sensors located around the vehicle are automatically triggered when Reverse is selected, or can be manually activated, with a graphic appearing on the Touchscreen showing an overhead view of the vehicle. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles*.
- **Rear Traffic Monitor** is particularly useful when reversing out of a parking spot. The system warns you of vehicles, pedestrians or other hazards, approaching from either side of your vehicle. It will alert you with both audio and visual warnings so you know what's behind you even when the view is obstructed*.
- **Clear Exit Monitor** alerts rear passengers to any approaching cars, cyclists or other hazards before they leave the vehicle. As the rear seat passenger pulls the door handle to leave your vehicle, a warning light will flash on the rear door if an incoming obstacle is detected. The light will immediately go off when the obstacle is no longer detected*.

PARK PRO PACKAGE

Park Assist

The optional Park Pro Package enables you to park and maneuver more easily in and out of tight spaces and into traffic that is obscured by buildings or other vehicles. It includes the 360° Parking Aid, Rear Traffic Monitor and Clear Exit Monitor in the Park Package, plus:

- **Park Assist** makes parallel and perpendicular parking easier than ever by steering your vehicle into a suitable space. You just have to select the appropriate gear and control the vehicle's speed with the brake and accelerator pedals. Graphics and notifications guide you through the maneuvers. Park Assist will also steer you out of a parallel space, taking the stress out of parking*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

BUILD YOUR OWN

EFFICIENT TECHNOLOGIES

SUSTAINABLE BY DESIGN

Land Rover are committed to producing vehicles that use more sustainable materials, produce less waste and use fewer natural resources as part of our approach to sustainable business. The development process of the Range Rover Sport has included a full life cycle assessment and has been designed to be 85 percent recyclable/re-usable and 95 percent recoverable at the end of the vehicle's life.

Our innovative design enables the use of a unique alloy in the vehicle body, made from up to 50 percent recycled aluminum derived from our closed loop manufacturing process, retaining quality and performance but delivering lower life cycle CO₂ emissions. Closed loop manufacturing means taking the scrap from the body pressings process, segregating it and re-melting it back into quality sheet aluminum at our supplier, to be used again to press out body panels, thereby reducing the need to use primary aluminum.

ENGINE MANUFACTURING CENTER

Jaguar Land Rover's Engine Manufacturing Center, where our Ingenium engines are developed, features the largest rooftop solar panel installation in the UK. Comprising no fewer than 22,600 individual panels, which are capable of providing up to 6.2MW. The panels have the capacity to provide up to 30 percent of the site's energy needs, which could reduce the CO₂ footprint by approximately 2,400 tons per year.

ECO MODE

ECO mode ensures the vehicle runs more efficiently and economically by using software to implement a range of actions from softening the pedal on throttle and gear changes to retuning the heating, ventilation and air conditioning when in Auto mode and switching off heated door mirrors.

SMART REGENERATIVE CHARGING

Smart regenerative charging prioritizes the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and help to reduce fuel consumption.

INTELLIGENT STOP/START SYSTEM

All Range Rover Sport powertrains incorporate low CO₂ technologies such as the advanced intelligent Stop/Start system, which helps to improve fuel consumption and reduce idling. The system automatically shuts down the engine at rest and starts it again as soon as you lift your foot off the brake. It features a Tandem Solenoid Starter with a dedicated secondary battery for instant restarting.

DRIVER ASSISTANCE

DRIVER ASSISTANCE

With its strong, powerful stature, the Range Rover Sport provides a strong all-aluminum monocoque body. While the elevated Sports Command Driving Position provides enhanced visibility. You can see more of the road and be easily seen by other road users; providing an enhanced feeling of confidence.

It has also been engineered to include a wealth of standard features to protect you and your passengers, and to help avoid accidents occurring:

Dynamic Stability Control (DSC) monitors the dynamic behavior of the Range Rover Sport intervening to enhance vehicle stability. DSC reduces engine torque and applies braking to the appropriate wheels to correct the vehicle's direction of travel by counteracting understeer or oversteer*.

Anti-lock Braking System (ABS) allows the vehicle to maintain traction with the road surface while braking and prevents wheels from locking – thereby retaining the vehicle's ability to steer. The system helps to shorten the braking distance.

Electronic Brake-force Distribution (EBD) automatically varies the braking force to each axle in order to minimize stopping distance, while still maintaining stability and the vehicle's ability to steer*.

Electronic Traction Control (ETC) enhances traction and stability by controlling wheel spin. The ETC system reduces torque to the spinning wheel, then applies braking to the wheel, if required*.

Cornering Brake Control (CBC) automatically varies the braking force to each wheel when the vehicle's brakes are applied around a corner and the limit of grip is reached. The system is designed to prevent the vehicle's wheels from locking up and skidding in this event through varying the braking force applied to each wheel*.

Roll Stability Control (RSC) is integrated with DSC and is designed to reduce the possibility of rollover, while providing agility and ability to steer around obstacles. It monitors the vehicle motion and cornering forces to detect any potential risk of rollover. When risk is detected, braking is applied to the outside front wheel to reduce forces which contribute to rollover*.

Emergency Brake Assist (EBA) understands when you apply the brakes quickly but without the necessary force to maximize stopping performance. It boosts the brake pressure through the ABS pump to help reduce the stopping distance.

Airbags and LATCH** For easier installation, LATCH points for baby/child seat restraints on the rear seats are easy to access and additional protection is offered by seat belt pretensioners which, in the event of a front impact, reduce forward movement. To further protect you, there is a comprehensive system of airbags including driver and passenger airbags, side curtain and thorax.

40 *These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. Vehicle shown: Range Rover Sport Autobiography in Firenze Red with optional equipment.

**Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.

AUTOMATIC ACCESS HEIGHT 2 INCHES

VERSATILITY

TRULY FLEXIBLE

AUTOMATIC ACCESS HEIGHT

The Range Rover Sport has the versatility to meet all your needs, while the exemplary levels of comfort are complemented by a range of innovative features which add to the convenience, luxury and ease of every journey.

Automatic Access Height, as part of the electronic air suspension, allows you to get in and out of the vehicle with greater ease and elegance as, when activated, this feature lowers the vehicle by as much as 2 inches when the vehicle comes to a halt and the door is opened. The optional Clear Exit Monitor provides an alert to rear seat passengers prior to them leaving the vehicle to prevent the door opening into approaching obstacles. The vehicle is also available with optional Soft Door Close to provide power latching on the front and rear doors.

INTERIOR CLIMATE

To prevent the cabin from overheating in the sun and minimize demands on the air conditioning, the **auto sunblind*** closes automatically when passengers have disembarked and the doors locked. When the vehicle is re-opened the sunblind returns to the position prior to it auto-closing. The **gesture sunblind*** provides intuitive forward/backward gesture control of the blind allowing the driver to concentrate on the road ahead.

CARGO SPACE

The Range Rover Sport has a generous 27.5 cubic feet of available cargo space or up to 59.5 cubic feet when the rear seats are stored flat. All models come with a 60:40 split second row seat as standard, with load through feature (ideal for long items such as skis). The versatile seating accommodates up to seven occupants. The optional 5 + 2[†] arrangement has two seats stored under the floor of the luggage compartment, which are split 50/50, with no loss of cargo space. The second row seats have forwards/backwards movement of 3.9 inches allowing for better access to the third row.

[†]Not available on P400e or SVR. On P400e variants, the cargo space capacity is reduced by up to 2.7 cubic feet and the cargo space floor is raised by 1.8 inches. Please contact your local Land Rover Retailer for more information. Nanoe™ is a trademark of Panasonic Corporation.

The third row seats are suitable for use by older children who can either use the adult belt or a booster seat in conintersection with the adult belt. They are not suitable for smaller children who require a child seat where the adult belt is not used directly to restrain the child.

BUSINESS

POWER AND STORAGE

With a flexible and contemporary interior, the Range Rover Sport is designed to enhance your business activities.

With two optional 110-Volt power outlets* and five USB ports located throughout the cabin, multiple electronic devices can be charged on the go. And to ensure your cabin is clutter-free, there is increased storage space, from a recess specifically for smartphones to the new upper glovebox and deep storage compartments.

The optional front center console refrigerator compartment provides the luxury of cooling drinks on demand. It can accommodate up to four 16 oz. bottles and maintain them at a temperature of 41°F, with the ability to achieve 23°F degrees for short periods to deliver rapid cooling. A border light indicates when the cooler has been switched on.

46 *Only one outlet available on vehicles with third row seats.

LEISURE

ACTIVITY KEY

With the optional Activity Key you can enjoy your favorite activities, and keep your vehicle key securely in the vehicle. For extra convenience, you can strap the Activity Key to your wrist. The wristband is robust and fully waterproof, allowing you to take part in a range of activities from cycling to swimming. Simply touch your Activity Key on the tailgate (behind the letter R in the Range Rover script) to lock or unlock the vehicle and deactivate or reactivate the conventional key fob.

TAILGATE

Access to the considerable rear space is now more convenient than ever. Rear Height Adjust lowers the rear suspension by up to 2 inches when the tailgate is opened. This creates a more natural ramp angle, with the lowered rear improving both cargo space accessibility and ease of loading. Powered gesture tailgate allows you to open and close the tailgate from the curb without needing to touch either the vehicle or the key fob. And as the system is compatible with optional towing solutions, you can still tackle demanding situations with the least amount of fuss.

SPECIFICATIONS

FIND A RETAILER

BUILD YOUR OWN

TOWING

With a towing capacity of up to 7,716 lbs* and by incorporating tailored technologies, Range Rover Sport can handle the most demanding of tasks.

TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualize the hitching process; it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen**. Standard with Rear View Camera.

REAR HEIGHT ADJUST

Rear Height Adjust allows the use of switches in the cargo space or on the key fob to lower the rear suspension height by up to 2 inches – useful when loading or unloading cumbersome items, or when hitching, unhitching or loading a trailer.

TOW ASSIST

On the road, the Tow Assist feature helps with reversing by predicting the trailer's direction. You can even choose your trailer's width for precise guidelines displayed on the Touchscreen. Standard with Surround Camera System**.

ADVANCED TOW ASSIST

Advanced Tow Assist allows you to control the direction of your trailer when reversing by using the rotary Terrain Response® 2 controller. The optional system will control the vehicle's steering to achieve the desired trailer trajectory**.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) gives you greater stability when towing. Should TSA detect a dangerous trailer sway situation is developing, it can help you regain control by gradually reducing the speed through lowering engine power and applying the brakes individually on each side of the vehicle to control the sway**.

*5,511 lbs limit on P400e models. 6,613 lbs limit on SVR models. **These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

RANGE ROVER SPORT SVR

SPECIAL VEHICLE OPERATIONS

Designed and engineered by Special Vehicle Operations (SVO) – the Land Rover Center of Excellence for bespoke commissions, luxury editions and performance models – the Range Rover Sport SVR is our fastest and most capable performance SUV ever. With a bold, assertive design and an even more exhilarating performance, the SVR stirs the emotions like no other Land Rover.

PERFORMANCE AND DESIGN

The 5.0 liter V8 Supercharged Gas 575HP engine delivers a powerful 516 lb-ft of torque taking it from 0-60mph in 4.3 seconds and to a top speed of 176 mph*. SVR Dynamic Response is enhanced so that the vehicle corners flatter and faster than any other Land Rover, while SVR Sport Suspension is optimized for performance and delivers improved handling. The integrated quad-tailpipes with Active Exhaust provide its distinctively throaty engine sound. And with mud and snow tires available on 22" wheels for the first time, this vehicle now delivers breathtaking SVR performance in the most challenging conditions.

The all-round enhanced capability of the SVR is accentuated by the broad shouldered, muscular stance. A look that is complemented by a unique mesh grille and new side fender vents in Narvik Black. Design is purposeful with features optimizing both form and function. Engine cooling is supported by the hood's integrated functional air vents and airflow to the brakes is maximized by the enhanced front bumper.

The exterior is now more compelling than ever with stunning 21" wheels and a unique body-colored Carbon Fiber hood as standard, which also contributes to its lighter weight and overall performance. The hood can also be specified in the striking, exposed Carbon Fiber which dramatically enhances the SVR's sporting character.

A range of options offer a high degree of personalization including new 22" lightweight SVR alloy wheels and new brake calipers in Red or Gloss Black.

*Always follow local speed limits.

BUILD YOUR OWN

INTERIOR

The fastest Land Rover SUV takes driver and passenger comfort to the very highest levels.

Providing a supreme degree of comfort and control, the new lightweight Range Rover Sport SVR Performance seats in Windsor leather are heated as standard and offer cooling as an option. These sleeker seats are available in four color combinations and Cut Diamond perforation styling.

This vehicle is unmistakably SVR. The unique, sportier steering wheel has trim matched to the interior color with SVR branding. The SVR logo is also embossed on the headrest and highlighted on the fascia center panel. More dynamic touches are delivered throughout with the use of premium finishers including Satin Brushed Aluminum and Grand Black. Further refinements are available including the Gloss Carbon Fiber trim finisher with a Gloss Carbon Fiber lower finisher on the steering wheel.

For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control. †Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

††The Wi-Fi hotspot is intended for passenger use only. InControl features may require an additional subscription with separate terms and conditions. ‡Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat. The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under license.

5 SEATS

SELECT YOUR SEAT CONFIGURATION

5 Seats

The seat configuration has been intelligently engineered to accommodate the lines of the roofline. The cabin is light and spacious, ensuring everyone has a relaxed and comfortable journey. There is generous leg, shoulder and head room throughout the contemporary cabin.

5 + 2 Seating*

The 5 + 2 arrangement has two seats stored under the floor of the luggage compartment that can be used for occasional use, enabling the vehicle to accommodate up to seven occupants.

5 + 2 SEATS

BUILD YOUR OWN

WORLD OF LAND ROVER

Your Land Rover vehicle has been designed and engineered to help you make more of your world. It can take you to places other vehicles simply can't reach in a style that cannot be matched. To celebrate the Land Rover lifestyle, we've put together a range of experiences, publications and Land Rover branded goods. There's a world to explore. Get out there and enjoy it.

ADVENTURE DRIVES

From the sheer exhilaration of the Arctic ice to the awe-inspiring dunes of Namibia, Land Rover Adventure Drives offer you once-in-a-lifetime experiences that bring the spirit and emotion of our vehicles to life.

Search 'Land Rover Adventure Travel' for full details.

EXPERIENCE DRIVES

Get behind the wheel of the latest Land Rovers under the expert guidance of our qualified instructors. From Taster Drives to advanced Full Day experiences, there's a wide range available at one of the expanding network of Experience Centers across the world.

Search 'Land Rover Experience' for full details.

MANUFACTURING TOURS

These behind-the-scenes tours are a unique opportunity to step inside our state-of-the-art manufacturing facilities where the latest Land Rover vehicles are born. This combination of unrivalled craftsmanship and cutting-edge robotics can be seen at either Halewood or Solihull.

Search 'Land Rover Behind the Scenes' for full details.

BRAND PARTNERSHIPS

Integrity, courage, pride, composure and capability; these are the values Land Rover shares with its partners. Whether the International Federation of Red Cross and Red Crescent Societies (IFRC), Land Rover Ben Ainslie Racing or Virgin Galactic, each one is driven by exceptional people prepared to face extreme challenges and push their capabilities to the very limits.

Search 'Land Rover Partnerships' for full details.

ONELIFE MAGAZINE

The official Land Rover magazine features the best in photography, authoritative journalism and expert insights. Onelife takes you right into the heart of exclusive experiences and extraordinary adventures, while keeping you up to date with the latest innovations, design and lifestyle choices.

Search 'Land Rover Featured Articles' for full details.

HUMANITARIAN PARTNERSHIPS

Since 1954, Land Rover have supported the International Federation of Red Cross and Red Crescent Societies in reaching 150 million people needing aid in 189 National Societies.

Search 'Land Rover Responsibility' for full details.

LAND ROVER COLLECTION

Our latest range of clothing and luxury leather goods is crafted with the same design excellence and attention to detail as our vehicles. We also have a collection that honours Land Rover's unique heritage and features expedition-inspired gifts and apparel.

Search 'Land Rover collection' for full details or visit your local Land Rover Retailer.

BUILD YOUR OWN

YOUR PEACE OF MIND

CUSTOMER SERVICE

When you bring your Land Rover vehicle to us, we use proprietary Land Rover diagnostic equipment to assess all your vehicle's mechanical and electronic systems. Our factory-trained Technicians use tools specifically designed for our vehicles and only fit genuine Land Rover parts and accessories. A choice of service plans are available which, together with Roadside Assistance, ensures complete peace of mind.

For further details contact your local Land Rover Retailer or search 'Land Rover Ownership'.

LAND ROVER ROADSIDE ASSISTANCE

Land Rover Assistance provides assistance in motoring emergencies, from immobilization due to breakdown or accident to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, anywhere in North America during the vehicle warranty period.

For further details please consult your Warranty Benefits handbook, contact your nearest Land Rover Approved Service Center or search 'Land Rover Roadside Assistance'.

LAND ROVER FINANCIAL SERVICES

Getting the keys to your very own Land Rover has never been so simple. And it's more affordable than you might think. New or used, for personal or business use, we have an option that puts you in complete control.

For further details contact your local Land Rover Retailer or search 'Land Rover Finance'.

FLEET & BUSINESS

Land Rover is dedicated to being the premium manufacturer of choice for fleets and businesses, by providing a highly attractive range of vehicles and exemplary customer service. Distinctive, capable and versatile, all Land Rover vehicles deliver low Total Cost of Ownership through strong residual values, competitive service and low maintenance and repair costs.

We are also committed to providing a totally customer-focused aftersales service, which will ensure every Land Rover vehicle is kept on the road and in top condition, in the easiest and most cost-efficient way for businesses.

Search 'Land Rover Fleet and Business' for full details.

IMPORTANT NOTICE: Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually.
