

Packard

FOR 1949

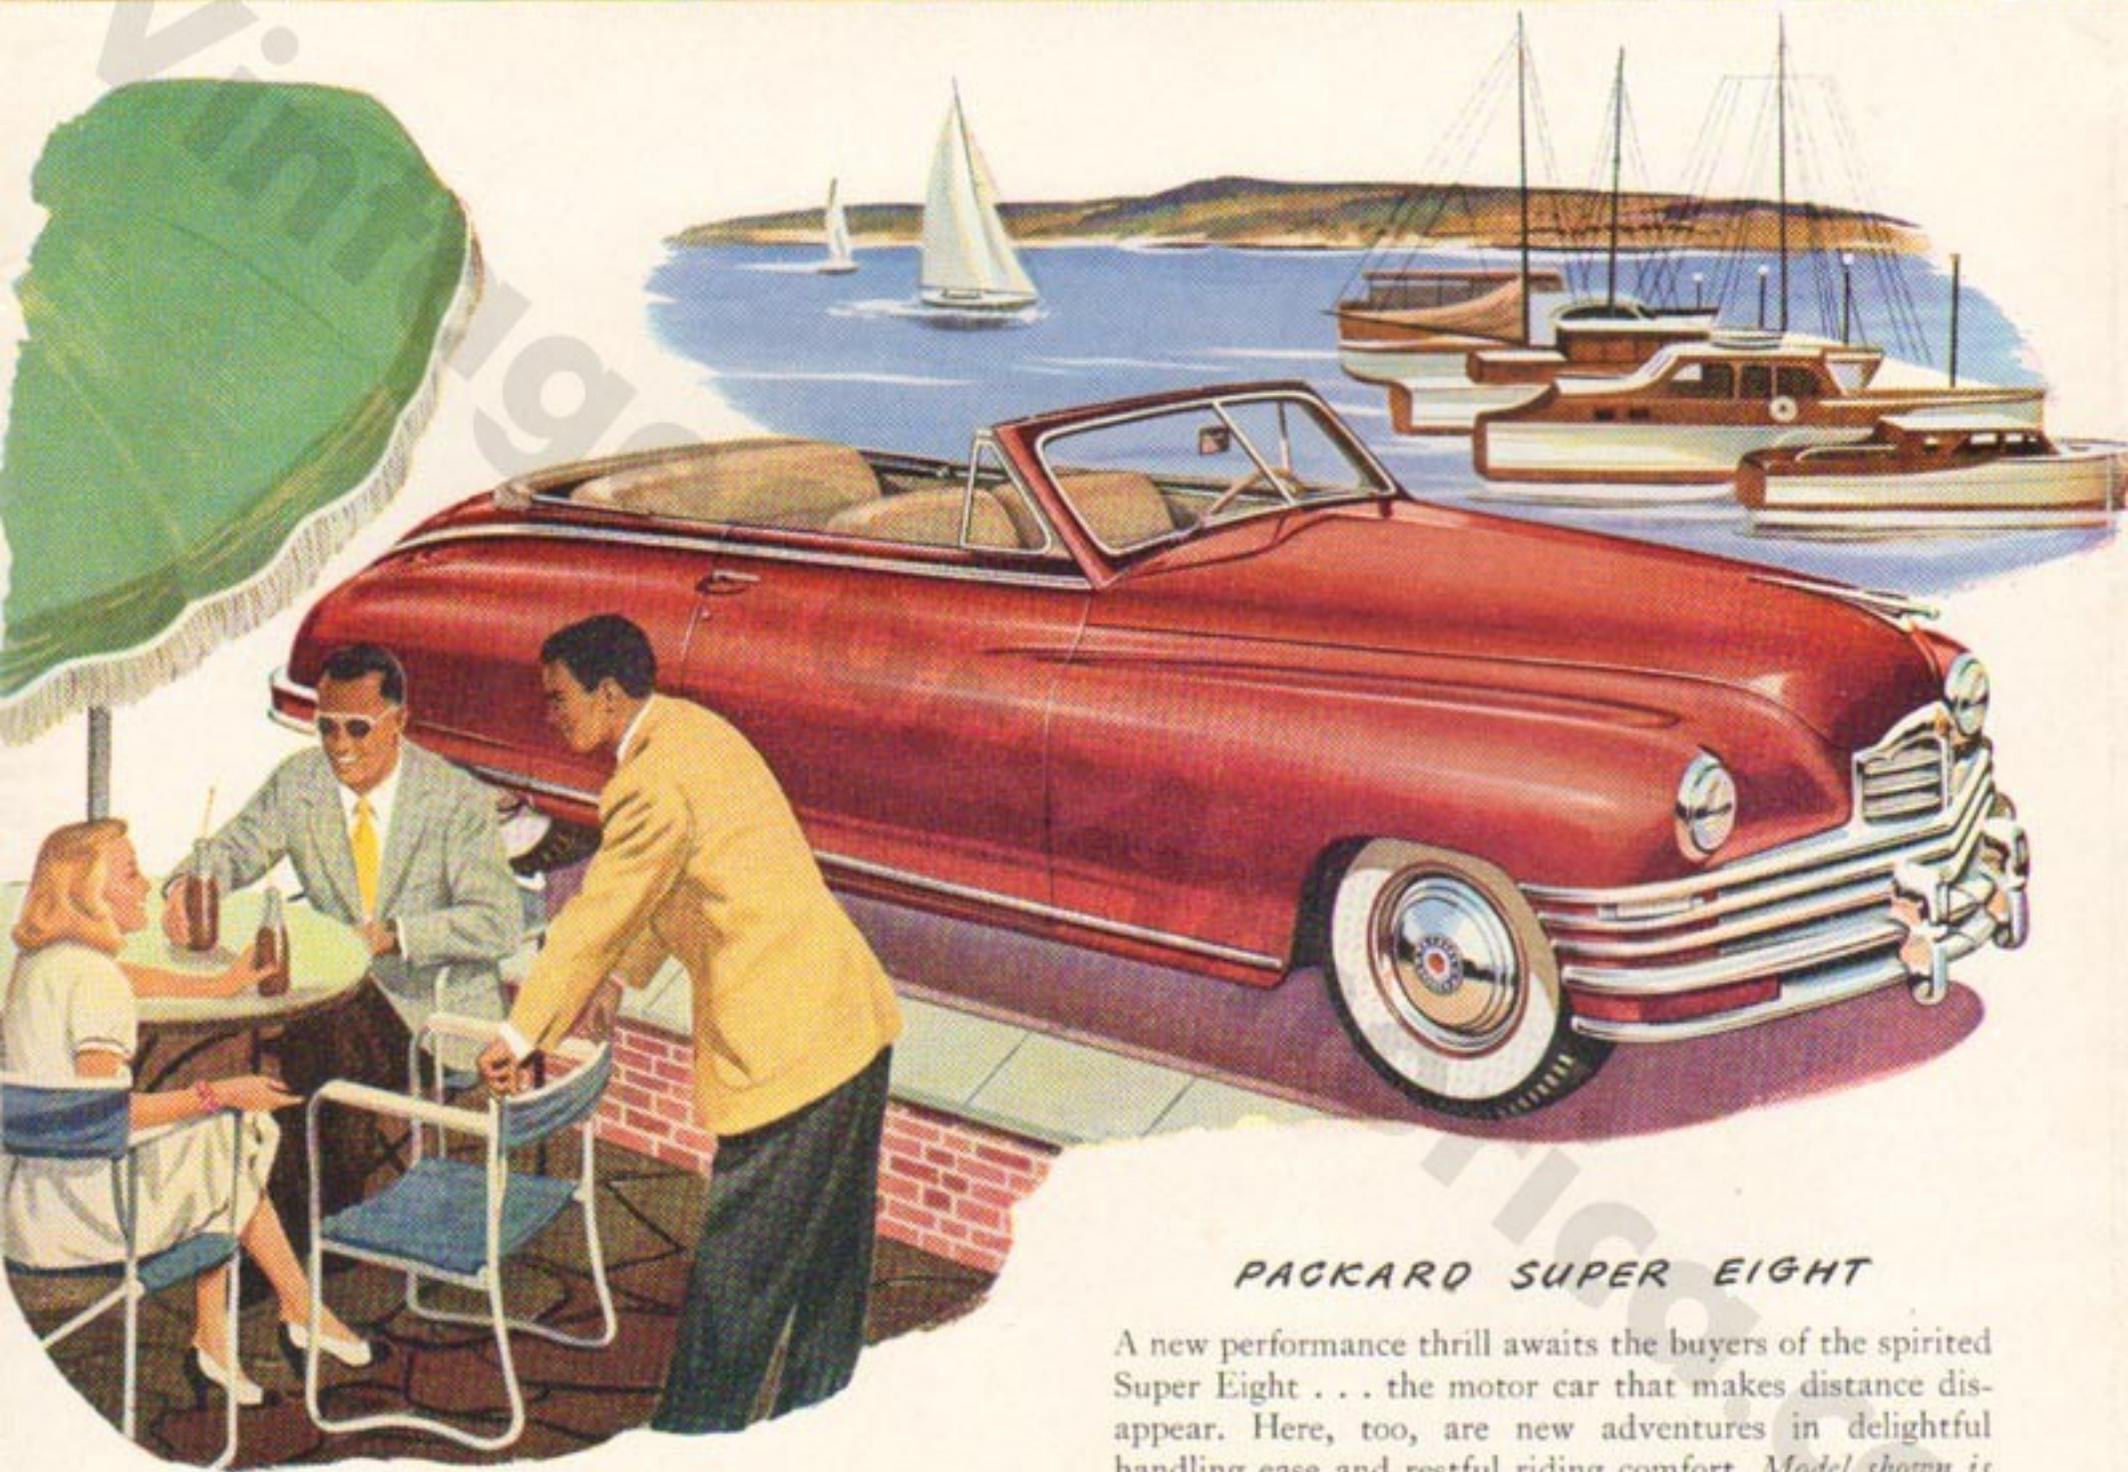

THREE NEW EIGHTS..

PACKARD CUSTOM EIGHT

This great motor car enjoys an identity all its own . . . an identity so distinctive that it requires no name-plate or series insignia. Its exterior is identical to that of the Packard Custom Limousine for seven passengers. *Model shown is the new Packard Custom Eight Sedan for seven passengers. Wheelbase: 148 inches.*

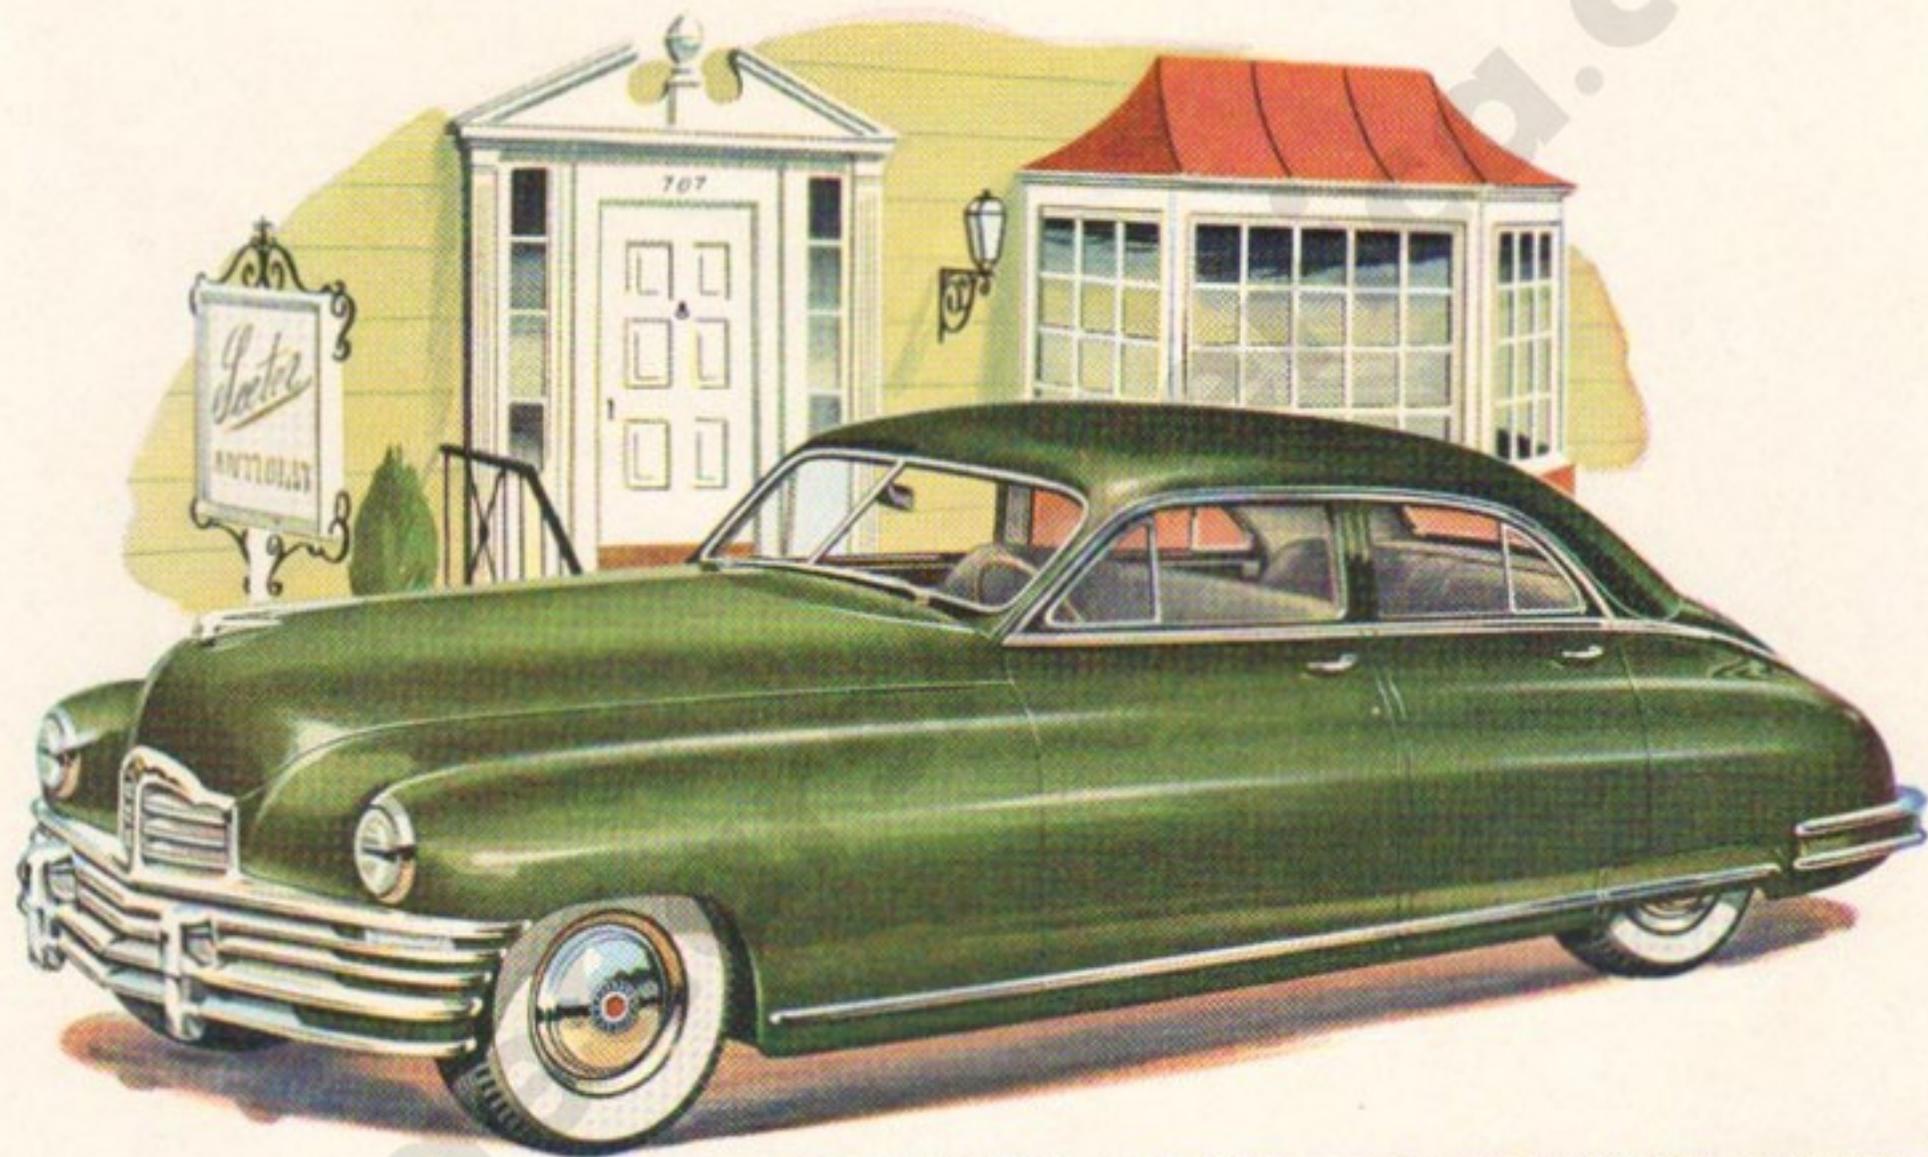

...all with the stunning new distinction of Packard

PACKARD SUPER EIGHT

A new performance thrill awaits the buyers of the spirited Super Eight . . . the motor car that makes distance disappear. Here, too, are new adventures in delightful handling ease and restful riding comfort. *Model shown is the new Packard Super Eight Convertible for six passengers. Wheelbase: 120 inches.*

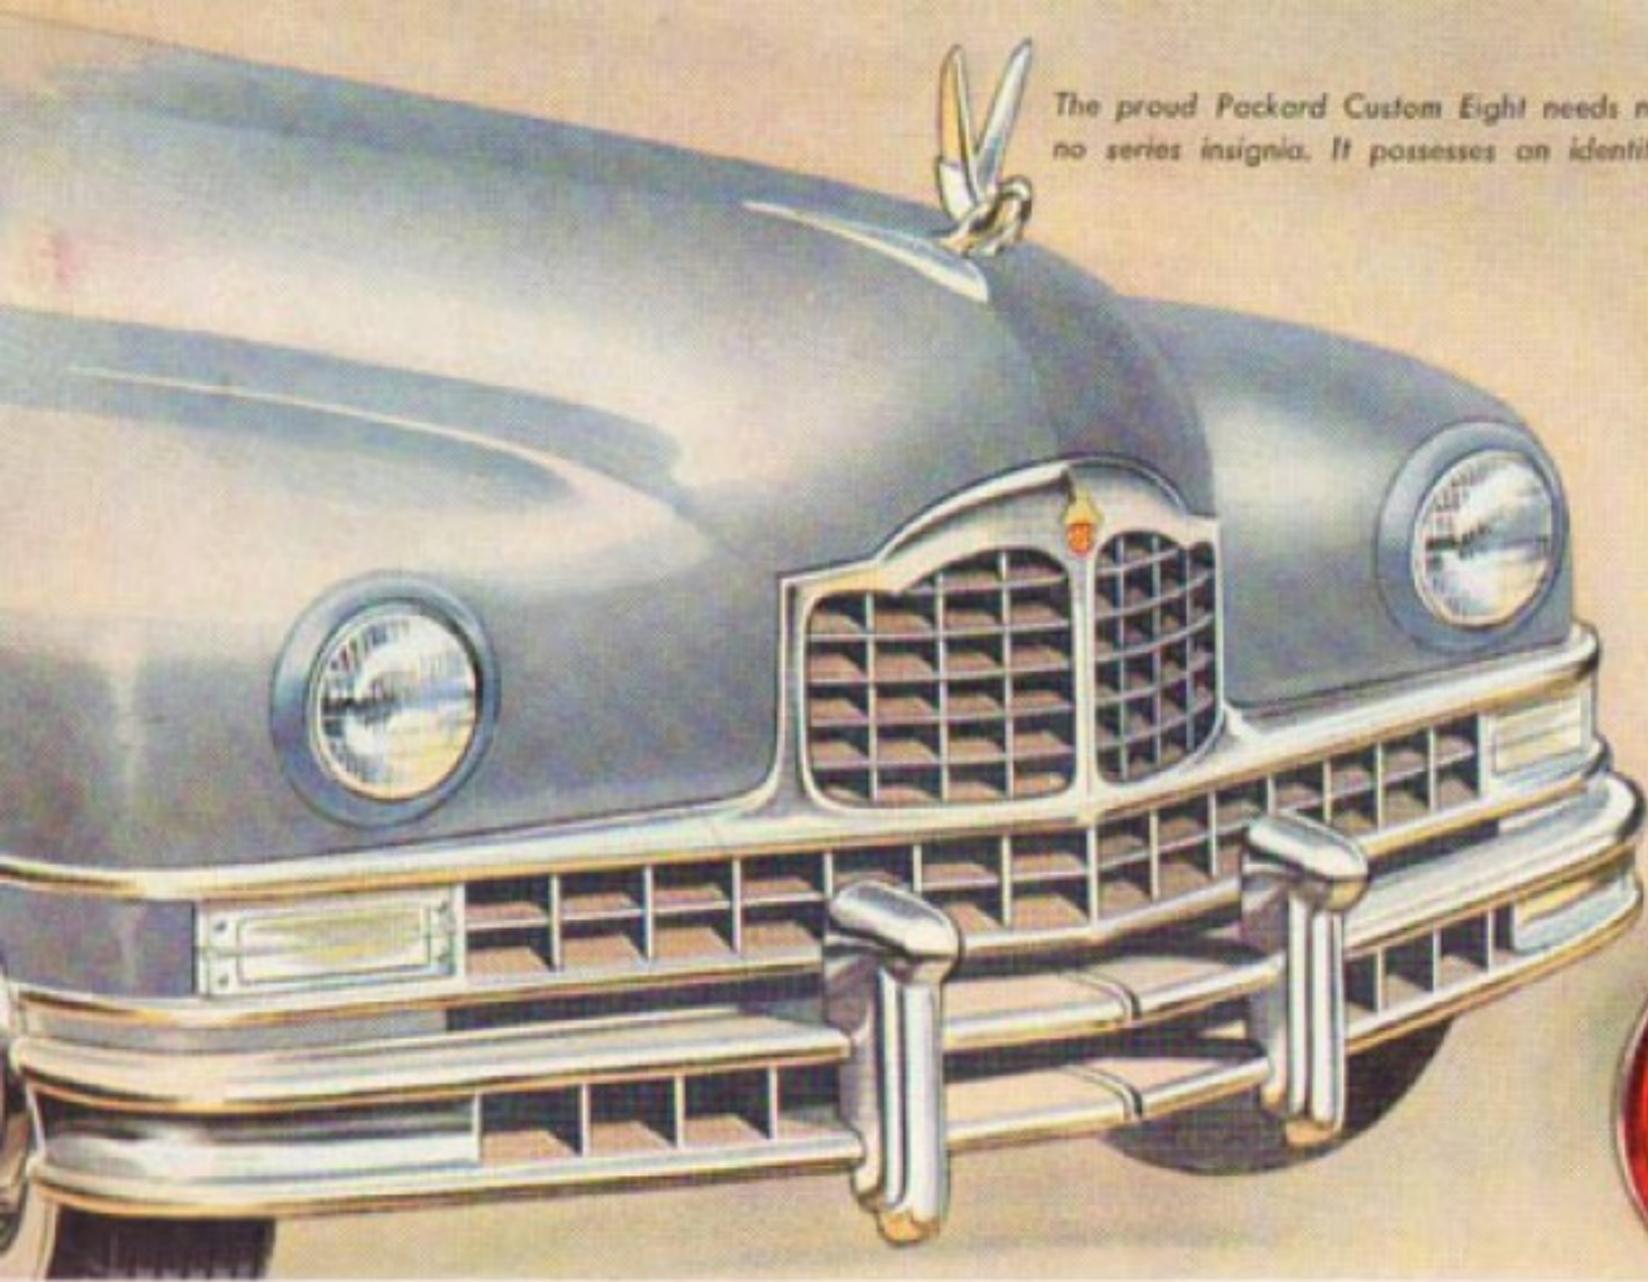

d "Free-flow" styling

PACKARD EIGHT and DE LUXE EIGHT

World-famous Packard identity acquires new distinction in the luxurious Eight and De Luxe Eight for 1949. Here's precision-built excellence in every rich detail . . . at a most attractive price. *Model shown is the new De Luxe Eight Touring Sedan for six passengers, (also available in the Packard Eight Series). Wheelbase: 120 inches.*

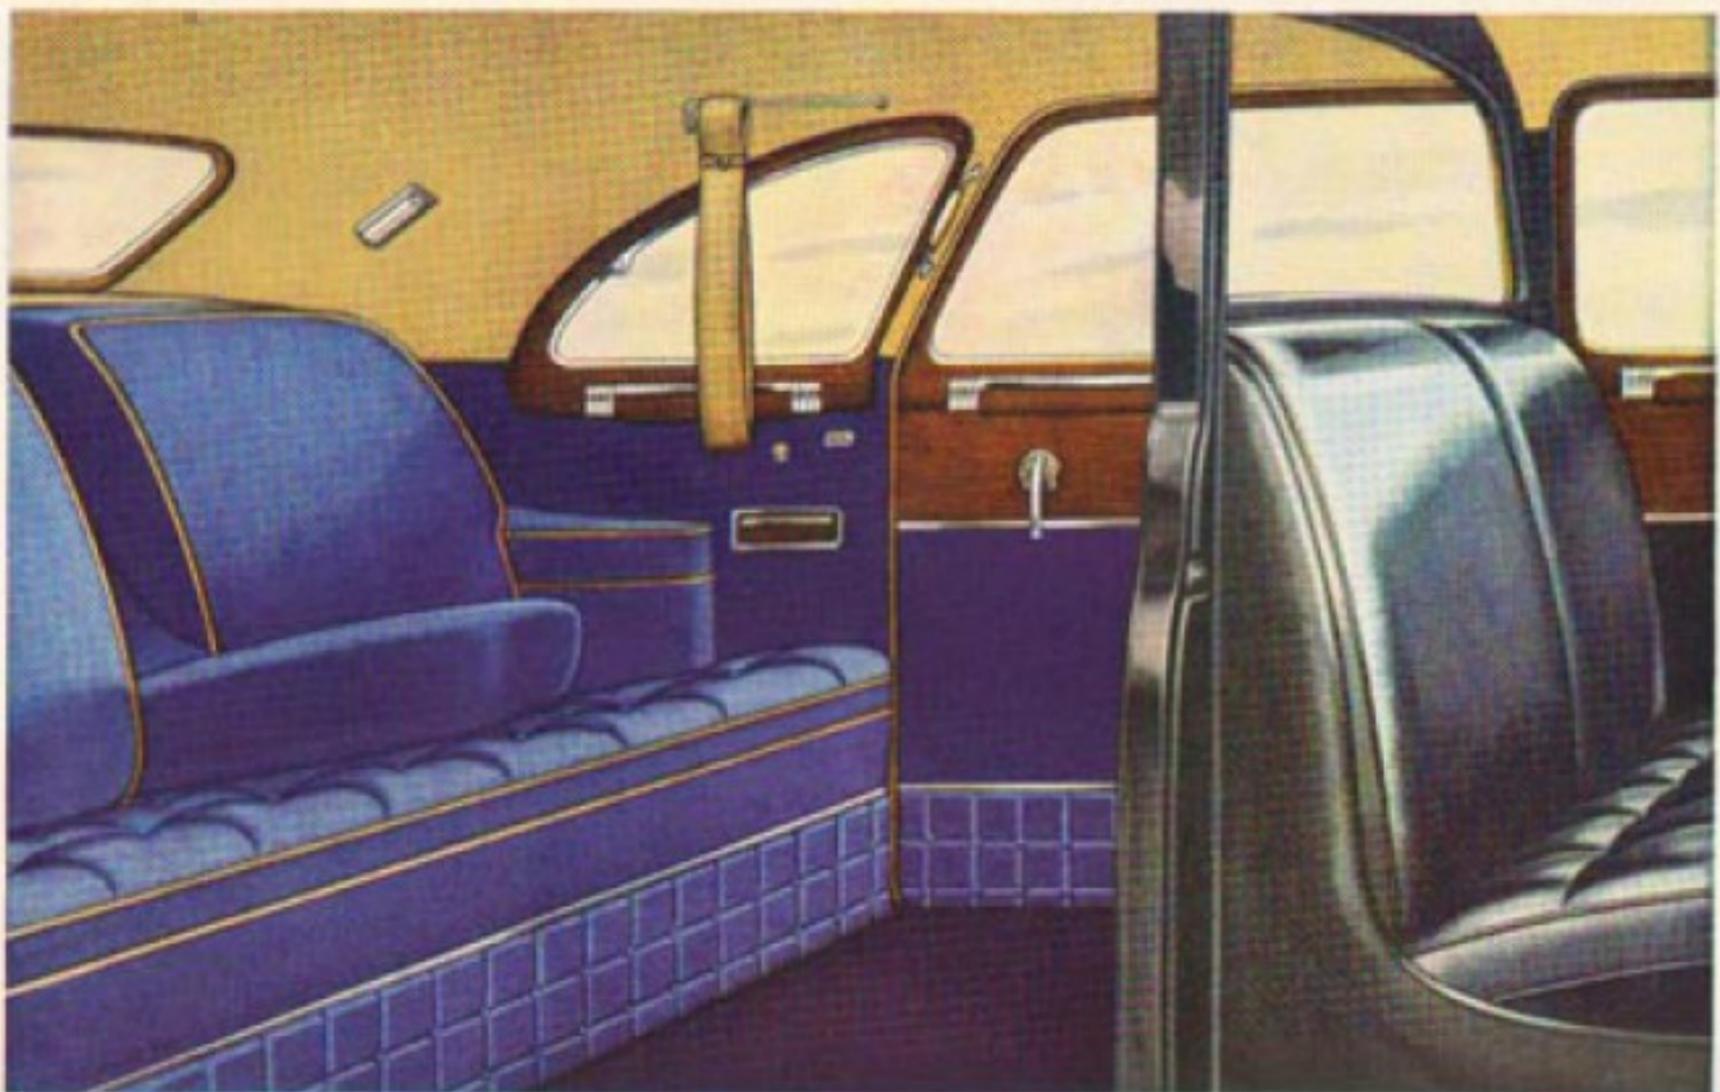

The proud Packard Custom Eight needs no name plate,
no series insignia. It possesses an identity all its own.

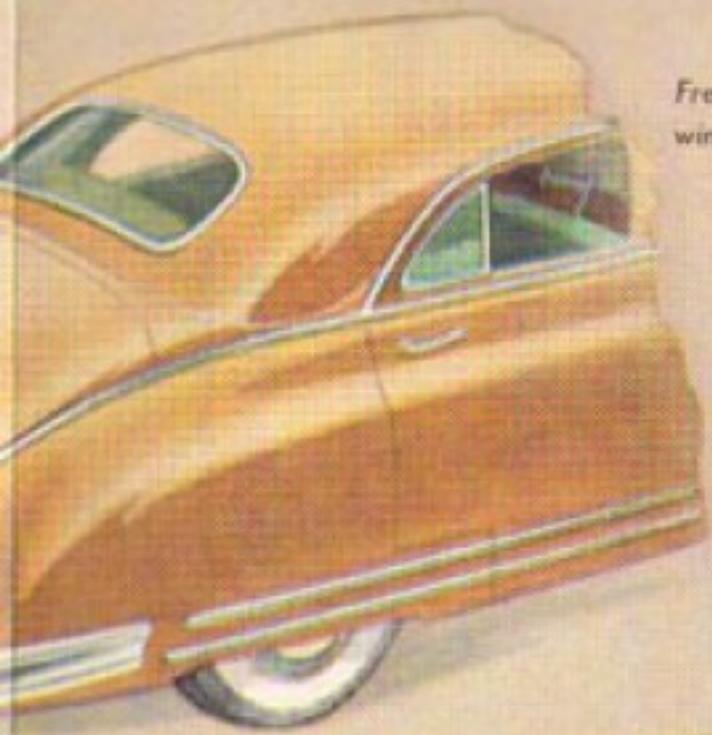

Massive
the fan

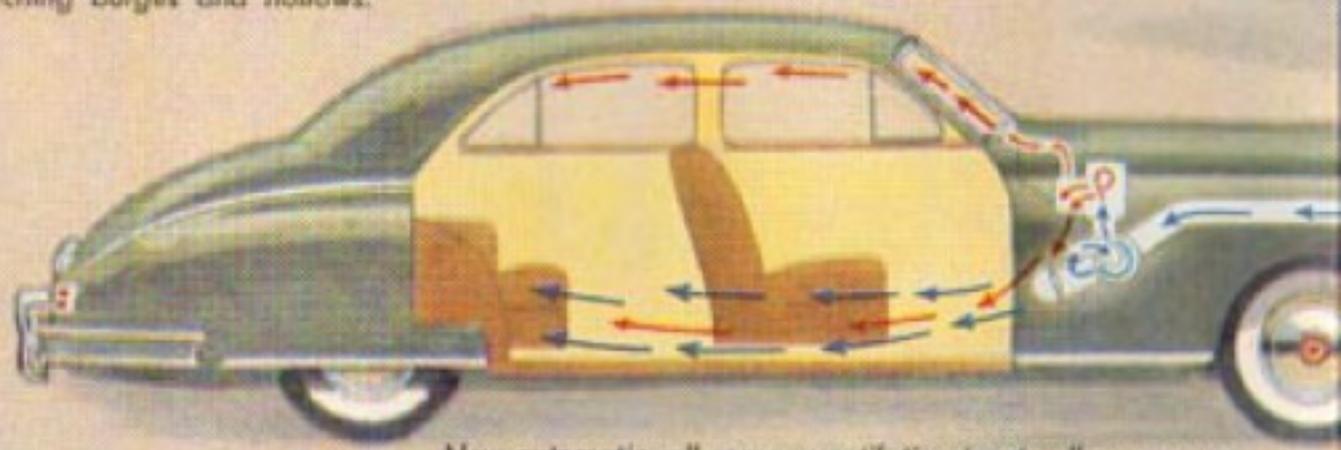

Traditionally

Free-flow contouring eliminates all wind-catching bulges and hollows.

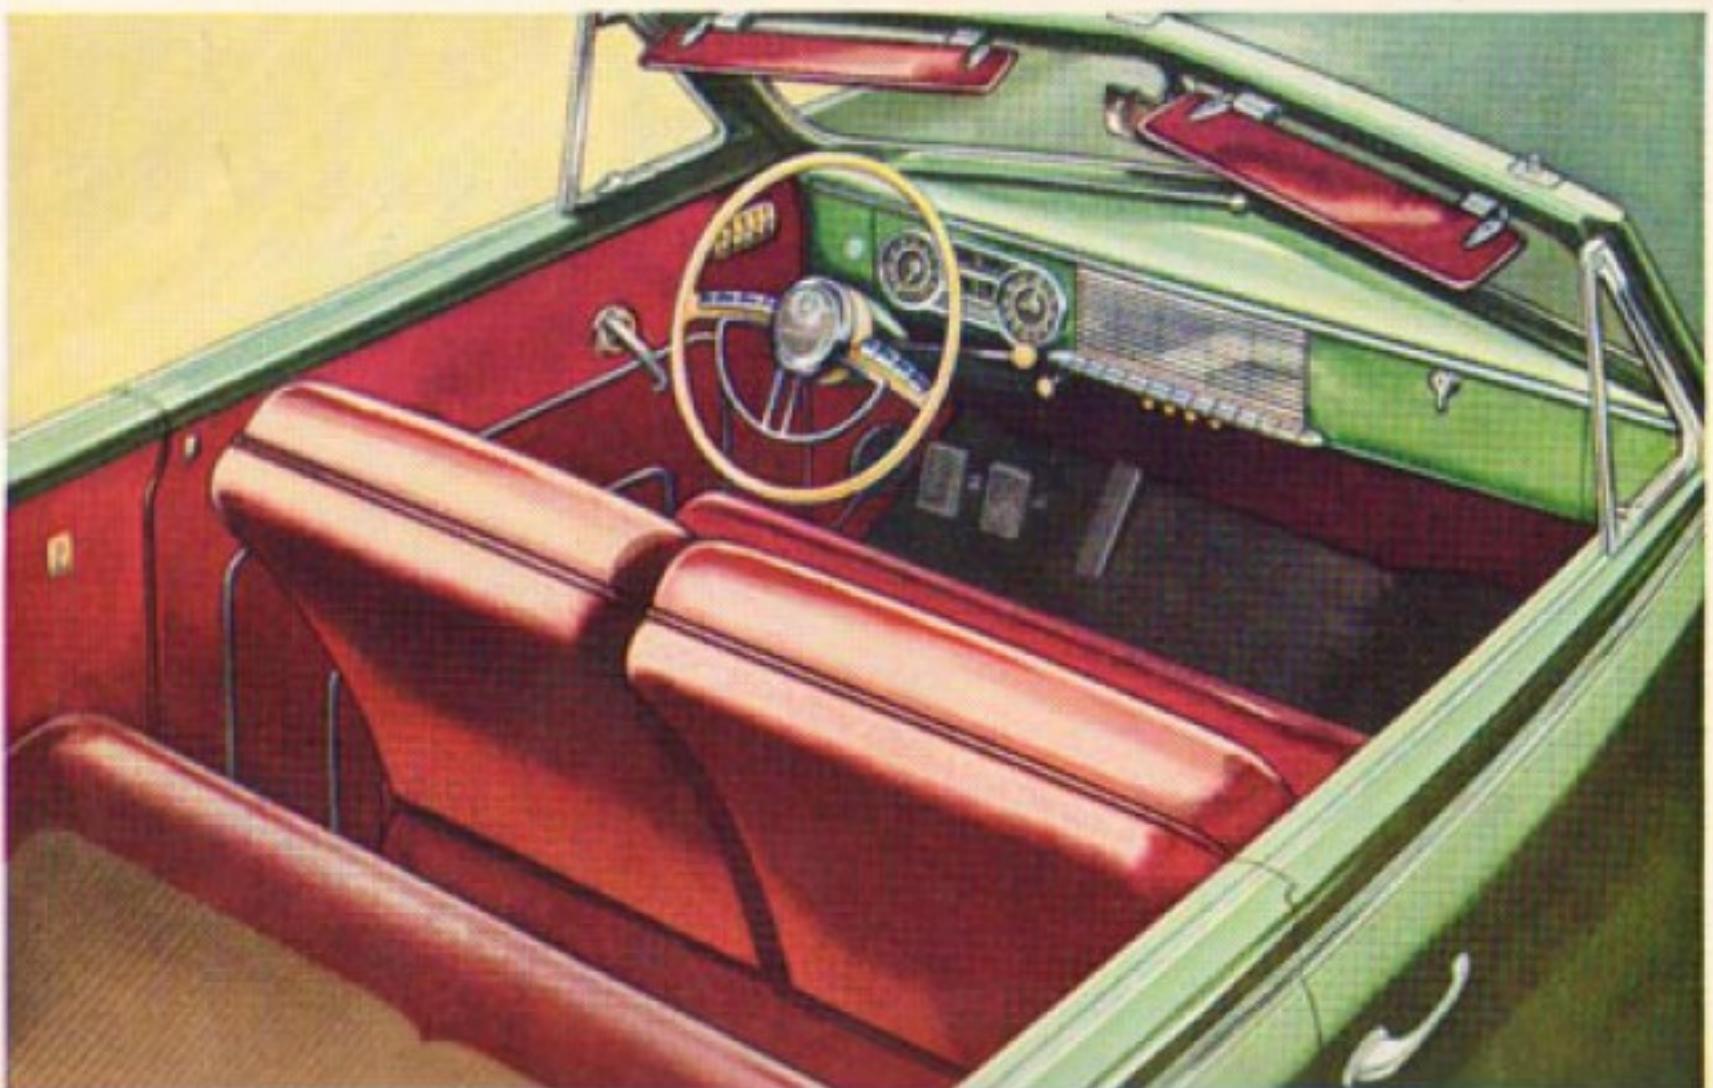

New automatic, all-season ventilation treats all passengers to a quiet, controlled flow of fresh air in any weather.

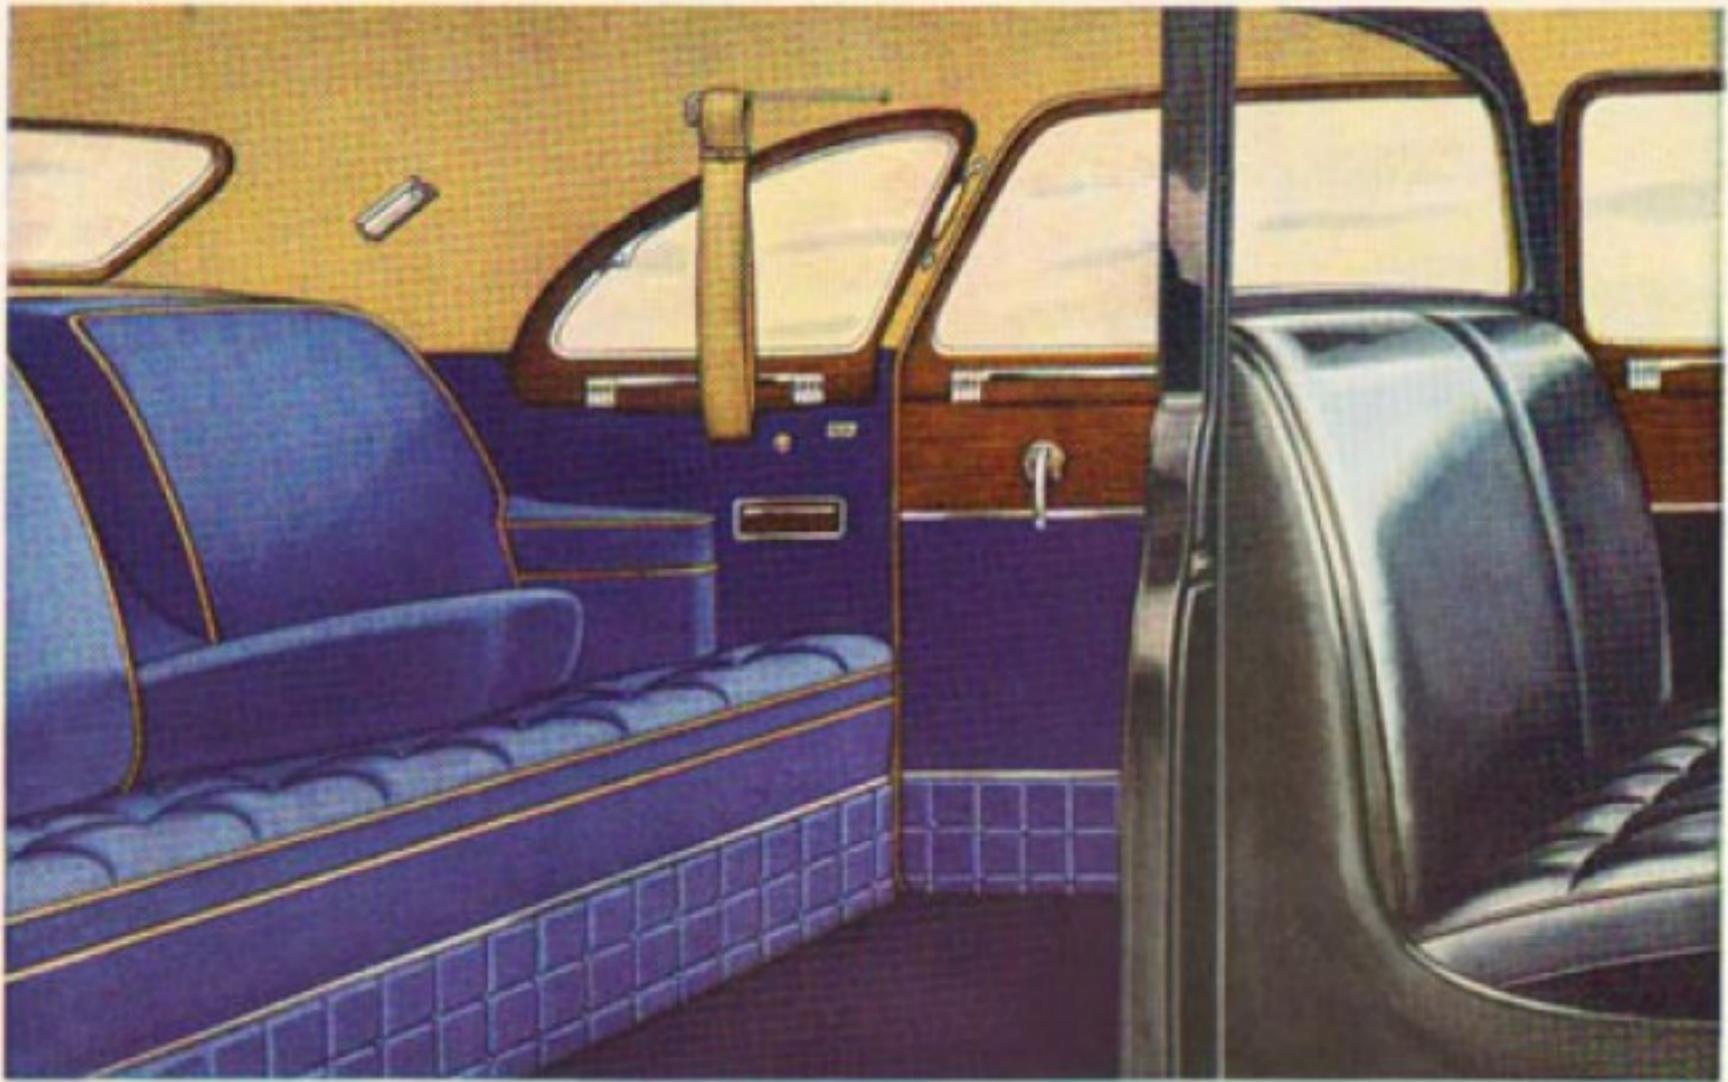

New hubcaps retain familiar red hexagon.

Presenting the new Console-Key instrument panel, with push-button switches, and "black-lighted" Flite-Glo dials.

Packard in fine car appointments. . . . inside

PACKARD CUSTOM EIGHT

Custom models are characterized by magnificent size, and a new richness of appointment. New styling concepts are reflected in such details as the cushion and seat-base design, and the deep window mouldings.

Seats are upholstered in a selection of finest quality broadcloths, with smart piping around the cushions. In the Limousine, pictured above, and in the Sedan for seven passengers, generous space is allowed for the folding auxiliary seats. The chauffeur's compartment of the Limousine is upholstered in black leather, and the partition has an adjustable window.

PACKARD EIGHT and DELUXE EIGHT

Here's deep-cushioned roominess you'll revel in . . . while you enjoy motor-dom's gentlest ride. In the De Luxe Eights, the smart new interiors are tailored in a choice of rich broadcloths, and are equipped with new luxury appointments. And convenience—the new Console-Key instrument panel has push-button control of all switches, and black-lighted Flite-Glo dials. New automatic, all-season ventilation treats all passengers to a controlled flow of fresh air in any weather, and helps guard against window fogging. Presenting

PACKARD FOR 1949

In this brochure, you'll see pictured the most complete selection of motor cars in the fine car field. Three exciting new series . . . 17 individual body styles. All styled, powered, and precision-built to be the greatest cars in Packard's historic 50 years!

PACKARD CUSTOM EIGHT

America's most distinguished motor car. Powered by the 160-horsepower Packard Custom Eight engine. Produced in five new body styles—three with 127-inch wheelbase, two with 148-inch wheelbase.

PACKARD SUPER EIGHT

An overnight sensation in the fine car field. Powered by the new 145-horsepower Packard Super Eight engine. Produced in seven new body styles—three with 120-inch wheelbase, four with 141-inch wheelbase.

PACKARD DE LUXE EIGHT—PACKARD EIGHT

They bring you traditional Packard quality in the popular-price field. The Packard De Luxe Eight is available in two new body styles; the Packard Eight in three new body styles. All are powered by the new 130-horsepower Packard Eight engine, and have 120-inch wheelbase.

*Three great new eights . . . all with
spectacular new "Safety-Sprint" acceleration*

Here's trigger-quick reserve power—ready to breeze you into the clear, ahead of highway trucks and busses. Here's real *postwar* power—with new smoothness and *efficiency* throughout the entire range of performance!

Specifications

FOR THE NEW 1949 PACKARD EIGHTS

PACKARD CUSTOM EIGHT

ENGINE—L-head, eight cylinders in line. Piston displacement 356 cubic inches. Brake horsepower 160 at 3600 r.p.m. Specially treated aluminum alloy, steel strut pistons with new coil-spring-expanded oil control rings. Bore and stroke 3½ inches x 4¼ inches. Compression ratio 7 to 1. Crankshaft weight 104 pounds. Nine main bearings. Removable precision-type main and connecting rod bearings. Hydraulic adjusted tappets. Neutropoised, five-point rubber engine mountings. Oil: seven quarts.

ENGINE LUBRICATION—Full pressure lubrication to all main, connecting rod, camshaft and piston pin bearings, and to valve tappets. Floating oil screen, oil filter.

FUEL SYSTEM—Dual down-draft carburetor with two intake jets. Automatic choke, automatic heat control, oil built air cleaner, silencer and flame arrester. Automatic idling control. Mechanical pump with filter. 20-gallon gasoline tank equipped with filling signal.

Interior View

completely surrounded by water. Cooling capacity 20 quarts.

CLUTCH—Semi-centrifugal. Single dry plate type. Diameter 11 inches. Ball throw-out bearing, permanently lubricated.

TRANSMISSION—Synchronized, carburized, helically cut gears. Nine ball and roller bearings used in the Packard Unimesh transmission.

OVERDRIVE—Optional at extra cost. Reduces engine speed 27.8% without changing car speed.

FRAME—Specially designed X-member type frame, with box section side rails. Convertible frame is specially designed.

FRONT SUSPENSION—Packard independent front wheel suspension. Double acting shock absorbers. Roll control bar.

REAR SUSPENSION—Semi-elliptic springs, 54½ inches long. Rubber and composition inserts between ends of leaves. Rubber bearing spring brackets and shackles. Direct acting, airplane-type shock absorbers. Fifth shock absorber and lateral stabilizer.

ELECTRICAL SYSTEM—Large capacity, air cooled generator with automatic control. 17-plate battery, 120 ampere-hour capacity.

DRIVE—Hotchkiss type, through rear springs. Three-inch propeller shaft with two roller bearing universal joints driving hypoid rear axle. Rear axle ratio 3.92 to 1.

BRAKES—Packard Servo-Hydraulic, self-energizing type service brakes. Mechanical hand-brake operating rear wheel brake shoes. Centrifuge brake drums provide 208.25 square inches braking area.

STEERING SYSTEM—Worm and three-tooth roller type gear, mounted on double row needle and two tapered roller bearings. 22½-foot turning radius.

CHASSIS BEARINGS—Long life assured by 50 ball and roller bearings.

WHEELS AND TIRES—Disc wheels with individual chain slots. Four-ply tires, 7.00 x 15.

COOLING SYSTEM—Thermostatic temperature control. Sealed cooling system; pressure-sealed filler cap. Five blade, 18½-inch fan; water pump permanently sealed and greased. Cylinders completely surrounded by water. Cooling capacity 20 quarts.

All-Season Ventilation

WHEELBASE—127 inches.

OVER-ALL LENGTH—212½ inches.

PACKARD SUPER EIGHT

ENGINE—L-head, eight cylinders in line. Specially treated aluminum alloy, steel strut pistons with new coil-spring-expanded oil control rings. Piston displacement 327 cubic inches. Bore and stroke 3½ inches x 4¼ inches. Compression ratio 7 to 1. Brake horsepower 145 at 3600 r.p.m. Crankshaft weight 102 pounds. Five main bearings. Removable precision-type main and connecting rod bearings. Neutropoised, three-point rubber engine mountings. Oil: six quarts.

ENGINE LUBRICATION—Full pressure lubrication to all main, connecting rod, camshaft, and piston pin bearings, and to valve tappets. Floating oil screen.

FUEL SYSTEM—Dual down-draft carburetor with two intake jets. Automatic choke, automatic heat control, air cleaner, silencer and flame arrester. Automatic idling control. Mechanical pump with filter. 20-gallon gasoline tank equipped with filling signal.

COOLING SYSTEM—Thermostatic temperature control. Sealed cooling system—pressure-sealed filler cap. Four blade, 18-inch fan; water pump permanently sealed and greased. Cylinders completely surrounded by water. Cooling system capacity: 20 quarts.

Fifth Shock Absorber

CLUTCH—Semi-centrifugal. Single dry plate type. Diameter 10½ inches. Ball throw-out bearing, permanently lubricated.

TRANSMISSION—Synchronized, carburized, helically cut gears. Nine ball and roller bearings are used in the Packard Unimesh transmission.

OVERDRIVE—Optional at extra cost. Reduces engine speed 27.8% without changing car speed.

FRAME—X-member type frame, box section side rails. Convertible frame is specially designed.

FRONT SUSPENSION—Packard independent front wheel suspension. Double-acting shock absorbers. Roll control bar.

REAR SUSPENSION—Semi-elliptic springs, 54½ inches long. Rubber and composition inserts between ends of leaves. Rubber bearing spring brackets and shackles. Direct acting, airplane-type shock absorbers. Fifth shock absorber and lateral stabilizer.

ELECTRICAL SYSTEM—Large capacity, air-cooled generator with automatic control. 15-plate battery, 100 ampere-hour capacity.

DRIVE—Hotchkiss type, through rear springs. Three-inch propeller shaft with two roller bearing universal joints driving hypoid rear axle. Rear axle ratio 3.9 to 1.

BRAKES—Packard Servo-Hydraulic, self-energizing type service brakes. Mechanical hand brake operating rear wheel brake shoes. Centrifuge brake drums provide 171.5 square inches braking area.

STEERING SYSTEM—Worm and three-tooth roller type gear, mounted on double row needle and two tapered roller bearings. 22-foot turning radius.

Specifications, designs, and prices subject to change without notice.

CHASSIS BEARINGS—Long life assured by 48 ball and roller bearings.

WHEELS AND TIRES—Disc wheels with individual chain slots. Four-ply tires, 7.00 x 15.

WHEELBASE—120 inches.

OVER-ALL LENGTH—204½ inches.

PACKARD EIGHT and DE LUXE EIGHT

ENGINE—L-head, eight cylinders in line. Piston displacement 288 cubic inches. Brake horsepower 130 at 3600 r.p.m. Specially treated aluminum alloy, steel strut pistons with new coil-spring-expanded oil control rings. Bore and stroke 3½ inches x 3¼ inches. Compression ratio 7 to 1. Crankshaft weight 95 pounds. Five main bearings. Removable precision-type main and connecting rod bearings. Neutropoised, three-point rubber engine mountings. Oil: six quarts.

Five-Oil Instruments

ENGINE LUBRICATION—Full pressure lubrication to all main, connecting rod, camshaft, and piston pin bearings, also to valve tappets. Floating oil screen.

FUEL SYSTEM—Dual down-draft carburetor with two intake jets. Automatic choke, automatic heat control, air cleaner, silencer and flame arrester. Automatic idling control. Mechanical pump with filter. 17-gallon gasoline tank equipped with filling signal.

COOLING SYSTEM—Thermostatic temperature control. Sealed cooling system—pressure-sealed filler cap. Four blade, 18-inch fan; water pump permanently sealed and greased. Cylinders completely surrounded by water. Cooling system capacity 18 quarts.

CLUTCH—Semi-centrifugal. Single dry plate type. Diameter 10 inches. Ball throw-out bearing, permanently lubricated.

TRANSMISSION—Synchronized, carburized, helically cut gears. Nine ball and roller bearings are used in the Packard Unimesh transmission.

OVERDRIVE—Optional at extra cost. Reduces engine speed 27.8% without changing car speed.

FRAME—X-member type box section side rails.

FRONT SUSPENSION—Packard independent front wheel suspension. Double-acting shock absorbers. Roll control bar.

REAR SUSPENSION—Semi-elliptic springs, 54½ inches long. Rubber and composition inserts between ends of leaves. Rubber bearing spring brackets and shackles. Direct acting, airplane-type shock absorbers. Fifth shock absorber and lateral stabilizer.

ELECTRICAL SYSTEM—Large capacity, air-cooled generator with automatic control. 15-plate battery, 100-ampere hour capacity.

DRIVE—Hotchkiss type, through rear springs. Three-inch propeller shaft with two roller bearing universal joints driving hypoid rear axle. Rear axle ratio 3.9 to 1.

BRAKES—Packard Servo-Hydraulic, self-energizing type service brakes. Mechanical hand brake operating rear wheel brake shoes. Centrifuge brake drums provide 171.5 square inches braking area.

STEERING SYSTEM—Worm and three-tooth roller type gear, mounted on double row needle and two tapered roller bearings. 22-foot turning radius.

CHASSIS BEARINGS—Long life assured by 48 ball and roller bearings.

WHEELS AND TIRES—Disc wheels with individual chain slots. Four-ply tires, 6.50 x 16.

WHEELBASE—120 inches.

OVER-ALL LENGTH—204½ inches.
