

CHRYSLER

CAN LUXURY
COME WITH A
**340 HP
HEMI[®]?**

ABSOLUTELY.

2007 300

The Chrysler 300's striking high beltline and dramatic design will make every other luxury sedan on the road look ordinary.

CLASSIC STYLE

Elegance comes standard on the 2007 Chrysler 300. An aerodynamic exterior delivers refined wind-noise management, enhancing fuel efficiency and creating a quiet interior. In addition, the 120-inch wheelbase and "wheels-to-the-corners" design provide not only a more balanced ride, they actually increase interior space for you and your passengers.

RWD

It's something you haven't seen on a Chrysler performance sedan in over fifteen years, but this rear-wheel-drive system provides a whole new driving experience. Design and engineering advancements combined with new, world-class technologies offer all the advantages of rear-wheel drive and the confidence of maximum driver control.

The All-Wheel Drive (AWD) system Available on 300C, 300 Limited and 300 Touring, means better acceleration, especially when traction is limited. It provides power to both axles at all times; 62 percent of the engine torque to the rear wheels, and 38 percent to the front wheels, to provide the rear-wheel drive feel essential for performance sedans. A planetary center differential allows the axles to rotate at different speeds, necessary for smooth cornering.

POWER

5.7-liter HEMI® V8 engine with Multi-Displacement System (MDS), 340 horsepower at 5,000 rpm, and 390 lb-ft of torque, standard on 300C—the most horsepower and torque in its class.* The MDS system allows the engine to operate on four cylinders when power demands are minimal. This provides the power of a V8 with the economy of a large V6. (EPA estimated mpg: 17 city/ 25 highway (RWD) and 17 city/ 24 highway (AWD))

3.5-liter high-output V6 single overhead camshaft (SOHC) engine with 250 horsepower at 6,400 rpm and 250 lb-ft of torque, standard on 300 Touring and 300 Limited. (EPA estimated mpg: 19 city / 27 highway (RWD) and 17 city / 24 highway (AWD))

2.7-liter double overhead camshaft (DOHC) 24-valve multipoint fuel injection (MPI) V6 engine with 190 horsepower at 6,400 rpm and 190 lb-ft of torque, standard on the 300. (EPA estimated mpg: 21 city/ 28 highway)

*Based on 2006 Ward's large regular segment.

INTERIOR

This spacious well-appointed interior features Satin Silver accents and an elegant analog clock. Its handcrafted interior feel continues with the refinement and sophistication of optional real California walnut trim. For the ultimate in luxury, 300C comes standard with industry-first tortoiseshell accents on the power tilt and telescopic steering wheel, shift knob, and door pull handles.

UCONNECT®

Available UCONNECT® voice-activated hands-free communication system allows you to talk on your Bluetooth® compatible wireless phone

SOUND SYSTEM

Cruise the streets and turn up the available AM/FM stereo with integral six-disc CD/MP3 player and full-screen navigation. For a seriously stellar sound, couple it with a Boston Acoustics® 368-watt digital amplifier and subwoofer (available only on 300C). Performance characterized by a smooth octave-to-octave tonal balance, natural frequency response, and uncolored presentation free of distortion, from the very softest to the loudest passage, identifies the Boston Sound® - a faithful reproduction of the original recording.

PARK ASSIST

The ParkSense® Rear Park Assist System uses sound waves to detect nearby obstacles in and near the rear path of the vehicle to help you maneuver in tight spaces at parking speeds. Audio-visual indicators in the overhead display in the

rear of the vehicle alert you to the proximity of most larger, stationary objects that might be outside your line of sight.

*Always check entire surroundings before backing up.

GPS NAVIGATION SYSTEM

The available integrated DVD-based GPS navigation system will give you turn-by-turn directions and a full-screen display to get you back on the right road.
