GSZBY BUICK!

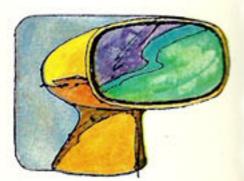

HOOD TACH! Be able to tell engine RPM's at a glance with the hood-mounted tachometer. It lets the driver know what his powerplant is doing for him and when it's the proper time to shift. Illuminating level can be varied along with other instrument lighting by adjusting the headlamp rheostat.

BILLBOARDS! Traction is improved with fat, wide-tread G60-15 tires mounted on big 15inch chrome-plated wheels that are a full 7 inches wide. Large white billboard letters provide the sporty appearance.

SPOILERS! Stylish, molded fiberglass rear deck spoiler acts with the front spoiler which is tucked under the bumper of every GSX. They help keep the front and rear end down for improved traction and handling.

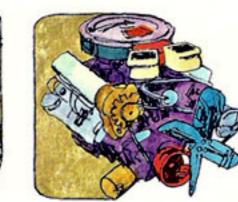

SPORTS MIRRORS! Two outside rear-view mirrors let the driver know what is going on behind. Streamlined protective covers are painted to match the car. The driver's side Sports Mirror is easily adjustable by remote control from inside the car.

nized in all forward

gears. The smooth-

BUCKETS! Soft, supple, all-vinyl, custom-padded bucket operating Hurst linkage is standard. A floor-mounted consolseats are standard on the GSX. Black Madrid- and Laredo-grain ette adds sports car flavor. Three-speed Turbo Hydra-matic vinyl are tastefully combined to create a stylish interior. Special 400 automatic transmission with operating console is available. GSX ornamentation is included.

455-4! Deep-breathing 455cubic-inch powerplant provides 350 horsepower and a new brand of Buick performance. In addition, there is the Stage 1 option available which develops 360 horsepower and a maximum torque of 510 pounds feet.

MORE! MORE! MORE!

Buick puts even more standard equipment into the GSX. A rallye clock and engine operating gauges. A 15-inch-diameter vinyl-covered rallye steering wheel. Special, quick-ratio variable ratio power steering is available. A 3.42 ratio positive traction rear axle. Power front disc brakes. Heavy duty cooling. Buick GSX performance car handling is the result of several more features like large diameter front and rear stabilizer bars, heavy duty front and rear shock absorbers, firm ride control arms and control arm bushings. And special GSX ornamentation inside and out. GSX...Something to Believe In!
