

THE BEST ROUTE TO TAKE IS YOUR

With so many auto manufacturers marching out a parade of parity products, it's hard not to blend in behind the wheel. But if you're one of the few who strive to be different, welcome. At Mitsubishi, we build cars for individuals. Drivers who choose to get where they're going in their own way. The 2017 Lancer embodies that bold spirit, offering a unique blend of our proven technologies and time-tested engineering. And while we're proud of our automotive heritage, we continue to move forward, while staying true to our independent convictions. After all, individuality is not a destination, but a journey. Drive on.

MOVING FIXATION

Go ahead. Stare. Lancer's streamlined style is captivating, but its appeal is more than skin deep. Despite the way it looks, Lancer was not designed merely to beguile the observer, but rather to cheat the wind. Its rigid, seam-welded unibody is both aerodynamic and strong. And while undeniably sleek, Lancer is also practical, with ample roof height and a proper hip point. So once you're done staring, it's easy to get in.

STREAMLINED STYLING

If you think Lancer looks like it was built for speed, you're right. But that sleek shape isn't just eye-catching. With a front fascia designed for smooth over and under airflow, Lancer enjoys enhanced stability too. Features like an available rear spoiler and standard 2-tone machine finish alloy wheels augment both its appearance and performance. In addition, the 2017 Lancer sports a boldly styled grille, available chrome beltline molding and LED Running Lights.

LED RUNNING LIGHTS

Perfectly complementing the halogen headlights on Lancer, the standard fog lights and LED Running Lights provide a bold accent to the clean lines of its front fascia.

HEATED SIDE VIEW MIRRORS WITH TURN SIGNALS

Lancer's side view mirrors provide an enhanced level of safety for you and those around you. Because they're heated, you won't have to worry about them frosting over in chilly conditions.

THE CRAFT OF COMFORT

From high-quality upholstery fabric to the soft touch upper door trim, Lancer's interior fit and finish provides a gratifying, upscale feel. The front center console offers a handy USB port. Available heated front seats provide both comfort and a commanding view. Lancer even offers the convenience of Automatic Climate Control. Indeed, the 2017 Lancer's interior is as hospitable as it is handsome.

MITSUBISHI MULTI-COMMUNICATION SYSTEM

Boasting a 7 in., high-definition touch-panel display, the intuitive Mitsubishi Multi-Communication System (MMCS) offers a host of advanced features. This available accessory includes a navigation system with 3D mapping, expanded point of interest (POI) information and road speed limit display, ECO routing and subscription-free real-time traffic, with Diamond Lane Guidance and Mapcare[®] that includes two annual map updates.

POWER GLASS SUNROOF

Sporting that blue-sky attitude is literally a breeze

PERFORMANCE

FIND YOUR MOTIVATION

Whether you're looking for practical economy or sporty acceleration, Lancer has your engine. There are two advanced aluminum-block MIVEC powerplants to choose from. The spirited 2.4-liter engine comes standard on every trim level, but for those who want higher gas mileage, the ES also offers a more fuel efficient 2.0-liter engine. Mated to either a 5-speed manual transmission (on the 2.0-liter ES) or our Continuously Variable Transmission (CVT), Lancer lets you take the winding road ahead in fast or frugal fashion.

COMMAND PERFORMANCE

When it comes to all-wheel drive systems, we've elevated the science to an art form. Lancer's available on-demand Electronically Controlled AWC (All-Wheel Control) is truly a marvel of engineering. Available on ES and standard on SE and SEL, this advanced system continually monitors the road and intelligently transfers power to the wheels with the most traction. This improves handling and performance — without compromising on efficiency. So whether you're driving on snow, in mud or simply demand topline performance on tight corners, you can rely on AWC to help keep you on track.

CONTINUOUSLY VARIABLE TRANSMISSION

Offering both performance and enhanced fuel economy, our Continuously Variable Transmission (CVT) is one of the smoothest drivetrains we have ever developed. It operates on a pulley system that allows infinite variability between the highest and lowest ratios. Instead of shifting gears, it adapts on the fly to changing vehicle speeds and keeps the engine running at optimum efficiency.

ELECTRIC POWER STEERING

On Lancer ES with the 2.0-liter engine, we've enhanced efficiency with advanced electric power steering. Without the constant burden of a belt-driven hydraulic pump, the engine is able to achieve better fuel efficiency. When the driver turns the steering wheel, the electric power steering system evaluates factors such as rate of rotation, position and vehicle speed to determine the amount of steering assist needed.

Lancer SE in Alloy Silver

2.0L MIVEC ENGINE

Standard on the ES (CVT), Lancer's base engine delivers an EPA-estimated 34 mpg highway.¹ Built on an aluminum block, the 2.0-liter powerplant features dual overhead cams. The key to its remarkable efficiency is Mitsubishi Innovative Valve-timing Electronic Control (MIVEC) technology. MIVEC varies the engine's breathing to achieve more torque, lower emissions and better fuel economy.

2.4L MIVEC ENGINE

Standard on the Lancer ES (with AWC), SE, and SEL, the 2.4-liter engine is also an aluminum-block engine with dual overhead cams, 16 valves and MIVEC. This "long-stroke" engine produces 168 hp and 167 lb.-ft. of torque. With a balanced torque to horsepower ratio, the responsive 2.4-liter engine provides quick and confident daily driving power.

ALL-WHEEL CONTROL DRIVE MODE SELECTOR

The available All-Wheel Control system allows the driver to select drive modes instantly, even while driving the vehicle. With a single touch of the Drive Mode Selector switch mounted on the console, you can choose from 2WD, 4WD AUTO or 4WD LOCK.

- 2WD This mode lets Lancer deliver performance, handling and fuel efficiency that approaches that of a conventional front engine, front-wheel drive car.
- 4WD AUTO This mode automatically distributes the proper amount of torque to all wheels for the driving conditions at hand. It helps maintain stability in strong winds, on slippery roads, and at highway speeds.

KNOWLEDGE IS CONFIDENCE

When it comes to safety, our goal is simple: continue to improve. Using this approach, we've armed Lancer with a host of advanced safety equipment, including active safety equipment to help you avoid trouble, and passive safety equipment should a collision prove unavoidable.

REARVIEW CAMERA

With visibility compromised, backing up a vehicle can be a safety concern. Lancer's standard rearview camera provides a measure of assurance as an image of the area directly behind the vehicle is displayed on the 6.1 in. display audio screen or the available 7 in. navigation screen.

ANTI-THEFT SECURITY ALARM SYSTEM WITH ENGINE IMMOBILIZER

This standard security system not only sounds off if the vehicle has been entered without the proper key, but also prevents the engine from running unless the key fob is present.

FAST-KEY PASSIVE ENTRY

Lancer's FAST-Key (Freehand Advanced Security Transmitter-Key) makes vehicle entry easy. This available feature lets you lock or unlock the doors by pressing a button on either the front door or, to open only the trunk, by pressing a button on the trunk itself. You can even start the engine with the keys tucked away in a pocket or purse.

SEVEN-AIRBAG SAFETY

Lancer's Supplemental Restraint System (SRS)² consists of seven airbags, including dual-stage front, front-seat side, and side curtain airbags. Lancer also features a standard driver-side knee airbag, which helps stabilize the legs and lower body of the driver in the event of a collision.

RISE UNIBODY CONSTRUCTION

Our Reinforced Impact Safety Evolution (RISE) unibody construction offers remarkable protection performance. The unibody is tremendously rigid and includes integrated energy absorbing crumple zones and strategically located reinforcements to help protect occupants in the event of a collision.

ACTIVE STABILITY CONTROL AND TRACTION CONTROL

One of the most significant advancements ever developed, this standard feature helps drivers maintain control in adverse conditions and during emergency maneuvers. Sensors monitor traction and work with the anti-lock braking system to counteract slipping. Applying the brakes on specific wheels, the system helps the vehicle track in the driver's intended direction.

ACCOMMODATION

SMART AND COMPATIBLE

From easy vehicle entry to hands-free functionality, Lancer is engineered to accommodate. Inside, you'll stay informed with the help of features like a color LCD multi-information display. And when it comes to entertainment, the standard FUSE Hands-free Link System™ delivers with fumble-free convenience.

AUTOMATIC CLIMATE CONTROL

Keep your hands on the wheel, and not on the AC controls. This standard comfort feature automatically helps keep the cabin temperature, fan speed and air source precisely to your liking.

TOUCH-PANEL DISPLAY AUDIO SYSTEM

This sleek system is standard on every Lancer. It incorporates a 6.1 in. touchscreen with a high-gloss black finish, uses app-like icons for easy navigation, and features HD Radio® and a rearview camera. The Touch-Panel Display Audio also lets you link to the FUSE Hands-free phone system, and features a phone dial screen and phone contact list importing.

COLOR LCD MULTI-INFORMATION DISPLAY

An easy-to-read trip computer provides you with helpful information like average speed and gas mileage, instant fuel economy, cruising range to empty, outside temperature and even maintenance reminder information.

FUSE HANDS-FREE LINK SYSTEM™ WITH USB PORT

Incorporating Bluetooth® 2.0 technology, FUSE allows you full use of your Bluetooth-enabled phone and lets you play music from your iPod® or other MP3 player and USB devices, hands free.^{4,5} Along with buttons on the steering wheel and touchscreen display, FUSE also utilizes advanced speech recognition technology, so you can operate selected features with voice commands when connected to the front center console's USB port. FUSE recognizes up to seven different mobile phones, syncing up with contact lists from each phone that's been paired with the system, and keeping the lists private to each user.

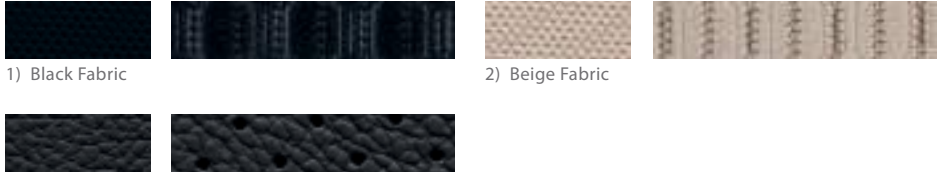

ROCKFORD FOSGATE® PREMIUM AUDIO SYSTEM

Lancer's available Rockford Fosgate® 710-watt audio system powers nine premium speakers including a 10 in., dual-voice subwoofer. The system incorporates an advanced Digital Signal Processor (DSP) and offers the listener PUNCH® control over the subwoofer, sound field control over the image and staging of the system, and the latest Neural

FOOTNOTES

- EPA estimates are to be used as a standardized comparison with other vehicles. Your actual mileage will vary depending on how you drive and maintain your vehicle.
- Airbags are part of a Supplemental Restraint System (SRS). To decrease the risk of injury from a deploying airbag, always wear your seat belt, sit upright in the middle of the seat, and do not lean against the door. Always place children 12 and under in the rear seat and use appropriate child restraints. Never place a rear-facing infant restraint in the front seat. See your Owner's Manual and instructions provided with your child restraint for additional information.
- SiriusXM services require a subscription sold separately, or as a package, by Sirius XM Radio Inc. If you decide to continue service after your trial, the subscription plan you choose will automatically renew thereafter and you will be charged according to your chosen payment method at then-current rates. Fees and taxes apply. To cancel you must call SiriusXM at 1-866-635-2349. See SiriusXM Customer Agreement for complete terms at www.siriusxm.com. All fees and programming subject to change. FIND YOUR OWN LANE

At Mitsubishi Motors, we believe not all drivers are created equal. So we build our vehicles for a different breed of driver, the fearless ones who take pride in what they drive, and refuse to drive more of the same. It's obvious to us that people who truly want distinctive styling and the latest technology see past the procession of bland imitations. We believe that every vehicle we make should stand for something. Something more than expected. And that's why we don't build Mitsubishi cars for stereotypes. We build them for you.
