

WE PUT THE ROAD LESS TRAVELED ON

In today's worldwide culture, it seems the things that are elevated in popularity are also devoid of one vital attribute: originality. If you, however, are one who favors the bold, you've come to the right place. We've been building cars that inspire individuality for more than 30 years. The 2017 Outlander Sport, with its dynamic exterior and leading-edge features, is just such a vehicle. Versatile, yet sized for around-town agility, it's a consummate model of our uncompromising tradition. And while we are proud of our heritage, we believe that our best days and best products are in front of us. The way we see it, pop fads will come and go, but originality never goes out of style.

SUPERLATIVE STYLE

Outside, it's sleek and aggressive. Inside, it aims to please. Soft touch material, with a rich pebble texture, enhances the upper door trim and dash panel, while subtle silver accents add a touch of class. High contrast meter gauges are sharp and clear. The seats have been tailored with embossed upholstery, while a host of comfortable amenities is provided in upscale fashion.

SUPER-WIDE RANGE HID HEADLIGHTS

Outlander Sport is full of bright ideas, like its available Super-wide Range High Intensity Discharge Headlights (S-HID). Using xenon gas, they project a beam that's 35% brighter than normal lights. What's more, the light they emit more closely mimics that of the sun, making for better definition and less eye fatigue.

SOUND ISOLATION / QUIETNESS

To help reduce engine and road noise, along with unwanted vibration, we maximized sound insulation thickness in key areas and engineered a special vibration-absorbing damper for the engine compartment.

LED COMBINATION TAILLIGHTS

Outlander Sport has got your back with LED Combination Taillights. These high-quality units not only look sharp, they also light up faster, are more visible and last longer than traditional taillights.

PANORAMIC GLASS ROOF

By day, the available panoramic glass roof creates a fresh, open-air feeling throughout the interior. By night, the roof's LED lighting sets the mood for endless evening drive possibilities.

DESIGNER CABIN

The Outlander Sport's spacious interior is an agreeable environment, indeed. The wide, supportive seats have been tailored with richly embossed upholstery. The upper door trim and dash panel feature soft touch material with a sumptuous pebble texture. And at key points around the cabin, subtle silver accents add that certain touch of class.

18 IN. ALLOY WHEELS

Sure, these 18 in. alloy wheels look great, but what many don't realize is that they also augment performance. Their tall profile allows for a shorter tire sidewall, which helps minimize side-to-side flex when cornering.

COLOR LCD MULTI-INFORMATION DISPLAY

An easy-to-read trip computer provides you with helpful information like average speed and gas mileage, instant fuel economy, cruising range to empty, outside temperature and even maintenance reminder information.

ACCOMMODATION

ENJOY BEING IN CONTROL

Outlander Sport has your comfort covered with amenities such as standard heated side mirrors and available heated front seats. Inside its spacious interior you'll feel not only completely relaxed, but also in complete command, with its full range of features right at your fingertips.

TILT AND TELESCOPING STEERING WHEEL

Those who share their Outlander Sport with other drivers will appreciate the tilt and telescoping steering wheel. It makes finding that perfect driving position a quick and easy operation.

FAST-KEY PASSIVE ENTRY SYSTEM

Outlander Sport's Free-hand Advanced Security Transmitter (FAST) Key makes vehicle entry easy. Unlock the doors by simply pressing the button on either front door or the trunk lever. You can even start or stop the engine with the keys tucked away in a pocket or purse.

FUSE HANDS-FREE LINK SYSTEM® WITH USB PORT

Incorporating Bluetooth™ 2.0 technology, FUSE allows you full use of your Bluetooth-enabled phone, and lets you play music from your iPod® or other MP3 player and USB devices, hands free.^{1,2} Along with buttons on the steering wheel and display screen, FUSE also utilizes advanced speech recognition technology, so you can operate selected features with voice commands. FUSE recognizes up to seven different mobile phones, syncing up with contact lists from each phone that's been paired with the system, and keeping the lists private to each user.

SIRIUSXM® RADIO

Turn every ride into a joy ride with SiriusXM. Get over 150 channels of the best commercial-free

60/40 SPLIT REAR SEATS

Outlander Sport gives you versatility your way. Its 60/40 split folding rear seat not only accommodates cargo and passengers alike, it also features a handy lever that drops the seatbacks quickly and easily.

AUTOMATIC CLIMATE CONTROL

This standard comfort feature helps keep the cabin temperature, fan speed and air source to your liking, so you can keep your hands on the wheel, and not on the AC controls.

HEATED FRONT SEATS AND SIDE MIRRORS

Nothing feels more luxurious than available heated front seats on a cold day. And while they may not enhance your physical comfort, the heated side mirrors can help provide peace of mind and clear visibility on frosty mornings.

TECHNOLOGY

MORE THAN JUST GOOD LOOKING

Outlander Sport is as smart as it is sleek. Efficiently engineered with energy-saving technologies, it achieves an estimated 30 mpg highway rating⁴ when equipped with 2WD Continuously Variable Transmission (CVT). It also offers features to enhance your own efficiency, such as touchscreen navigation and voice-activated command of both your smartphone and your music. In Outlander Sport, you'll soon be a master multitasker.

MITSUBISHI MULTI-COMMUNICATION SYSTEM

Boasting a 7 in. high-definition touch-panel display and voice command, the available Mitsubishi Multi-Communication System (MMCS) offers a host of advanced features. The system includes 3D mapping, expanded point of interest (POI) information, road speed limit display, ECO routing, subscription-free real-time traffic with Diamond Lane Guidance, and Mapcare™ that includes two annual map updates.

TOUCH-PANEL DISPLAY AUDIO SYSTEM

Available with a 6.1 in. touchscreen, this sleek system sports a high-gloss black finish and uses app-like icons for easy navigation. Features include HD Radio® and a rearview camera system. With the FUSE Hands-free Link System®, connected via Bluetooth®, it also offers a phone dial screen and contact list importing.¹

ROCKFORD FOSGATE® PREMIUM AUDIO SYSTEM

Outlander Sport's available Rockford Fosgate® 710-watt audio system powers nine premium speakers, including a 10 in., dual-voice subwoofer. The system incorporates an advanced Digital Signal Processor (DSP) and offers the listener PUNCH® control over the subwoofer, sound field control over the image and staging of the system, and the latest Neural

PADDLE SHIFTERS

Available with the Continuously Variable Transmission are rally-inspired paddle shifters that offer real hands-on performance. Simply pull the right paddle to upshift and the left paddle to downshift.

CONTINUOUSLY VARIABLE TRANSMISSION

One of the smoothest and most efficient transmissions available, Continuously Variable Transmission (CVT) operates on a pulley system, allowing infinite variability between the highest and lowest ratios. Instead of shifting gears, it adapts to changing vehicle speeds and helps keep the engine operating efficiently.

EFFICIENT MIVEC ENGINES

Whether you go with the standard 148-hp 2.0-liter engine, or the available 168-hp 2.4-liter engine, you'll enjoy smooth performance and optimized fuel efficiency. Both are dual overhead cam, 16-valve powerplants that feature resin-coated pistons and smooth-surfaced camshafts for reduced friction. Further minimizing engine load is an electric power steering system. What's more, these engines offer an advanced technology called MIVEC (Mitsubishi Innovative Valve timing Electronic Control). MIVEC employs a mechanism to vary the valve timing for optimum engine "breathing." The result is more responsive acceleration, reduced emissions, and enhanced fuel economy.

ECO LAMP INDICATOR

QUIET CONFIDENCE

Often our most impressive pieces of engineering go, thankfully, unnoticed. These would be our advanced active and passive safety features. Some – the airbags, for example – are designed to help protect you in the event of a collision, while other features, such as the Active Stability Control and Traction Control, are designed to help you avoid trouble in the first place.

HILL START ASSIST

When accelerating from a standstill on a steep incline, Hill Start Assist helps prevent the vehicle from rolling backward. This standard feature, when activated, holds the brakes for approximately two seconds to give you time to move your foot from the brake pedal to the accelerator.

REARVIEW CAMERA

With visibility compromised, backing up a vehicle is always a safety concern. Outlander Sport's available rearview camera provides a measure of assurance as an image of the area directly behind the vehicle is displayed.

ALL-WHEEL CONTROL

When it comes to all-wheel drive systems, we've elevated the science to an art form. Outlander Sport's available on-demand Electronically Controlled All-Wheel Control (AWC) is truly a marvel of engineering. Available on all trims and standard on GT, this advanced system continually monitors the road and intelligently transfers power to the wheels with the most traction. This improves handling and performance without compromising

SEVEN STANDARD AIRBAGS

A standard Supplemental Restraint System (SRS) features seven airbags: dual-stage front airbags with seat position sensors, front side airbags, side curtain airbags and a driver's knee airbag.⁶ Also standard is a Brake Pedal Recession Protection Structure to help reduce driver leg injury in the event of a frontal collision.

REINFORCED IMPACT SAFETY EVOLUTION

Utilizing high-tensile steel, Reinforced Impact Safety Evolution (RISE) engineering provides a tremendous amount of occupant protection in the event of a collision. RISE combines energy-absorbing front and rear structures with a super-rigid occupant cell, along with reinforcing bars in the doors and energy-absorbing materials in the side pillars.

ACTIVE STABILITY CONTROL AND TRACTION CONTROL

Some of the most significant advances ever developed, Active Stability Control and Traction Control help drivers maintain control in adverse conditions and during emergency maneuvers. Sensors monitor traction and work with the anti-lock braking system to counteract slipping. Applying the brakes on specific wheels, the system helps the vehicle track in the driver's intended direction.

WORLD-CLASS WARRANTIES

What we build, we stand behind. Period. The Outlander Sport is backed with a 10-year/100,000-mile Powertrain Limited Warranty, a 5-year/60,000-mile fully transferable New Vehicle Limited Warranty, a 7-year/100,000-mile Anti-Corrosion/

FEATURES AND

FIND YOUR OWN LANE

At Mitsubishi Motors, we believe not all drivers are created equal. So we build our vehicles for a different breed of driver, the fearless ones who take pride in what they drive, and refuse to drive more of the same. It's obvious to us that people who truly want distinctive styling and the latest technology see past the procession of bland imitations. We believe that every vehicle we make should stand for something. Something more than expected. And that's why we don't build Mitsubishi cars for stereotypes. We build them for you.
