Camry has always been about more than just getting you to a destination. It's been about how it can connect you to others and take you to places not always found on a map. The Camry Effect let owners share stories and talk about their love for their Camry – these cars had become a part of their life. In fact, over 90% of all Toyota Camrys sold over the last 10 years are still on the road today.¹ Some would call that legendary. Some would say it's time to take a break. We didn't; we kept going. We think this is what makes the Camry so popular. The 2013 Camry continues to offer the high-end features, rewarding interior and impressive safety technology you have come to expect. We don't believe in sitting still or compromising, and we know our drivers feel the same way. Let's keep going together. **2013 Toyota Camry.**

Let's make the interior of your car a place you want to spend some time: a space that is rewarding and enhances the driving experience. This is the inspiration behind the interior of every Camry. High-quality upholstery materials matched with refined stitching. A dashboard crafted with an attention to detail normally found in high-priced sedans. And on the XLE there are rich wood-grain-style accents. Let's make every time you drive a little more exciting, and rewarding. It's this type of dedication that makes Camry America's best-selling car.¹

We're driving the automobile to new places.

Open up a world of possibilities with available technologies that inform, entertain and connect, plus navigation systems that give you turn-by-turn directions on a beautiful color touch-screen. *Bluetooth*^{®1} wireless technology that lets you make hands-free calls and answer the phone by pushing a button on the steering wheel. And Entune,^{®2} our multimedia system that allows your compatible mobile phone to make dinner reservations, buy movie tickets or listen to music — all from your driver's seat.

Premium HDD Navigation³

An available 7-in. touch-screen display lets you access navigation, use your phone book and make hands-free calls. Also available for a trial period are SiriusXM Radio,⁴ NavWeather™ and NavTraffic™⁴ so you can listen to new music and podcasts, and get live updates on traffic and weather at your destination. Prefer your own tunes? Enjoy music from your personal library via a CD, DVD or MP3.

JBL® GreenEdge™ Audio System

Camry takes advantage of efficiencies wherever it can — and that goes for the audio system too. Using new, eco-conscious technologies, the available JBL® GreenEdge™ audio system delivers incredible sound with reduced power consumption.

Entune® Multimedia System

Make connecting to the important things in life easier than ever with available Entune.[®] It uses your compatible mobile phone and *Bluetooth*[®] wireless technology or a USB cable to access apps and services, and deliver them through the vehicle's audio system. Once connected, you can access Pandora[®] and iHeartRadio for music, make restaurant reservations with OpenTable, and buy movie tickets with MovieTickets.com. Plus, get sports scores, stocks, traffic and weather—even a guide to the cheapest fuel. Visit www.toyota.com/entune for availability of apps and services.

FIRST-CLASS SEATING

In Camry, rear-seat comfort is just as important as front-seat comfort, so the shape of front seats are designed to allow for additional knee space for rear-seat passengers.

POSITIONED TO DRIVE

Adjustable a total of eight ways, Camry's available power-adjustable driver's seat gives you plush and fully customizable comfort.

A perfect blend of science and luxury.

Whether it's interior space or interior noise, volume has got a lot to do with driving comfort. So our engineers found a variety of clever ways to increase interior volume where it matters most. They also reduced noise, vibration and harshness throughout the vehicle for a quieter ride. When you pay attention to small details like these, the result is a car that does more than transport — it transcends.

Room to Spare

Camry's interior has a space for everything, including your personal space. Lower door panels allow more knee room up front, and the headliner is made to maximize head room. Sun visors are positioned to maximize forward visibility to make sure nothing blocks your view of the world outside. All of this adds up to a spacious-feeling interior.

Crafted Quiet

You hear that sound? We didn't think you could. That's because we've pinpointed areas where road and engine noise enter the cabin, and kept it out with sound-absorbing techniques that contribute to Camry's whisper-quiet ride.

Ready Versatility

To help you transport longer items, such as skis or a new floor lamp, Camry's 60/40 split fold-down rear seat drops to create a handy pass-through into the trunk.

Rewarding Luxury

Camry offers seats made with premium materials, a refined center stack and elegant stitching throughout the cabin.

CUP HOLDERS

A place for everything, like your morning coffee. Camry's four cup holders and six bottle holders help keep spills to a minimum.

Nothing helps steady the ride like a few bumps.

No, not the bumps on the road — those are easily handled by Camry's independent suspension. The bumps we're talking about are small, specially shaped bumps called vortex generators. Positioned at key points on the body, they help enhance control by smoothing airflow and reducing drag.

HOW DO VORTEX GENERATORS WORK?

As air flows over the surface of a moving vehicle, it tumbles over and under itself, creating drag that slows you down. Vortex generators change the path of the air before it can become turbulent, reducing drag and improving vehicle stability.

INDEPENDENT SUSPENSION

Part of the reason Camry rides and handles so well comes from its independent suspension system. It uses optimized shock absorber tuning for a ride that's comfortable, yet controlled.

SE V6

Camry SE V6 comes with handsome 18-in. wheels wrapped in all-season low-profile tires for great handling year-round. These larger wheels are complemented by specially designed suspension components that are both strong and lightweight.

AERODYNAMIC FINS

The way air moves underneath a vehicle affects its performance and stability. Camry uses several broad panels on the undercarriage that feature aerodynamic fins for smoother airflow and reduced turbulence.

Ready for whatever the future brings. Including corners.

Get behind the wheel of Camry SE, and there will be no doubt about its intentions. A leather-trimmed steering wheel with paddle shifters. Sport fabric SofTex®-trimmed seats and silver interior trim. This is clearly a driver's car — and while SE's focus is on performance, its technologically advanced engine choices won't make you pay extra at the pump. Add sport-tuned suspension to the mix, and you have an impressive blend of performance and efficiency.

SE V6 Power

An available 3.5-liter V6 produces a pulse-quickenning 268 horsepower and 248 lb.-ft. of torque, while still achieving an EPA-estimated 31 highway mpg.¹ Paired with a 6-speed automatic transmission with sequential shift and paddle shifters, this powerplant delivers a driving experience that's nothing short of exhilarating.

Paddle Shifters

Camry SE's race-inspired paddle shifters deliver real hands-on performance with a manual gear selection feature. Pull the right paddle to upshift and the left one to downshift — the system will even match revs during downshifting for smoother gear transitions and better control.

Sport Handling

Handling dynamics typically involve the suspension — but in Camry SE, that's only part of the story. With a quicker steering ratio and an optimized Electric Power Steering (EPS) system that offers greater sensitivity, Camry is ready for every corner.

18-In. Alloy Wheels

Standard on Camry SE V6, these boldly styled wheels not only look great, they're also wrapped in low-profile all-season tires for improved handling.

We took America's best-selling car¹ and went even farther.

How do you improve on America's best-selling car? We started by adding our proven Hybrid Synergy Drive[®] system that offers an EPA-estimated 43 city mpg, 39 highway mpg and 41 combined mpg.² In addition, Camry Hybrid's proven combination of efficient gasoline engine and powerful electric motor produces 200 system net horsepower that makes for surprising acceleration.

EFFICIENCY EXPERTS

For more than a decade, Toyota has led the way in the development of eco-sensitive technology with our advanced Hybrid Synergy Drive® system.

ECO DRIVE LEVEL DISPLAY¹

Camry Hybrid's gauges provide you with all the feedback you need to drive efficiently, which helps you tailor your driving habits accordingly.

Hybrid XLE interior shown in available Ash Ultrasuede® with Display Audio with Navigation² and Entune.®³

ELECTRIC WATER PUMP

An electric water pump doesn't require an engine-driven belt. This design not only improves efficiency, but also shortens engine warm-up time for reduced emissions.

LIGHTWEIGHT

By engineering vehicle components and using state-of-the-art materials, mass was reduced as much as possible.

BELTLESS ENGINE

Camry's hybrid engine is completely free of engine drive belts. This design is not only more reliable, but also saves weight, reduces friction and helps improve fuel economy.

ADVANCED HYBRID ENGINE TECHNOLOGY

The engine in Camry Hybrid uses a variety of technologies that enhance performance and fuel economy. Like all Toyota engines, it uses four valves per cylinder and Variable Valve Timing with intelligence (VVT-i), a valve control system that optimizes engine efficiency throughout its operating range. But it also employs what is known as the Atkinson cycle, a method of controlling intake valve timing for reduced pumping losses. Add lightweight components and low-friction coatings, and the result is an eco-sensitive powerhouse that sacrifices nothing in the way of performance.

EFFICIENCY IN SPACE

You won't find the hybrid battery unless you're looking for it. That's because it's neatly packaged in an area ahead of the trunk but behind the seats, so it doesn't take up usable space.

Higher blue-sky thinking. (The power of efficiency.)

High efficiency and low emissions aren't the only measures of how far our hybrids have come. Camry Hybrid's engine also produces 200 horsepower — that's good for a 0-60 time of just 7.6 seconds!¹ This performance is accomplished by producing less noise, vibration and harshness, further enhancing the refined driving experience Camry is known for.

LOWER ROLLING RESISTANCE

The use of specially designed tires allows the air pressure to be increased, which reduces rolling resistance and helps improve efficiency.

ENERGY MONITOR

The Multi-Information Display helps keep you continually informed of the Hybrid Synergy Drive[®] energy flow and its efficient management.

We took a hard look at blind spots.

Being aware of what's around you not only helps increase confidence, but safety as well. The 2013 Camry offers technologies like the available Blind Spot Monitor (BSM)^{1,2} with Rear Cross-Traffic Alert (RCTA)³ and an available backup camera.⁴

Hybrid XLE shown in Cypress Pearl with available BSM with RCTA.

1. See footnote 24 in Disclosures section. 2. Available on XLE and Hybrid XLE models only. 3. See footnote 25 in Disclosures section. 4. See footnote 13 in Disclosures section.

AVAILABLE BLIND SPOT MONITOR (BSM)^{1, 2}

This year, Camry is available with a Blind Spot Monitor (BSM) featuring Rear Cross-Traffic Alert (RCTA). If BSM detects a vehicle in your blind spot, it illuminates a warning indicator on the appropriate sideview mirror to help you know when it's safe to change lanes.

REAR CROSS-TRAFFIC ALERT (RCTA)³

RCTA works in a similar way to BSM, except that it alerts you to rear cross traffic with both visual and audible warnings. RCTA uses radar to detect vehicles that may be approaching from either direction as you back out of a parking space.

With help from our 24/7 call center, available Safety Connect[®] offers subscribers helpful features such as Emergency Assistance, Stolen Vehicle Locator, Roadside Assistance and Automatic Collision Notification. Safety Connect[®] also offers the reliability of embedded cellular and GPS technology.

AVAILABLE SMART KEY SYSTEM⁵

Smart Key is a wonderful convenience. When you approach Camry with the Smart Key fob in your pocket or purse, the interior illuminates automatically; the doors unlock when you touch either front door handle; the trunk opens with the touch of its handle; and the engine starts with the push of a button.

AVAILABLE BACKUP CAMERA⁶

When backing up, the area behind Camry that's visible to the camera is displayed on the touch-screen of the audio system's display.

1. See footnote 24 in Disclosures section. 2. Available on XLE and Hybrid XLE models only. 3. See footnote 25 in Disclosures section. 4. See footnote 23 in Disclosures section. 5. See footnote 14 in Disclosures section. 6. See footnote 13 in Disclosures section.

We equipped Camry with an array of active safety systems to help keep you out of harm's way and passive safety systems to help protect you should a collision occur.

SMART STOP TECHNOLOGY® (SST)¹

At speeds greater than five miles per hour, when the accelerator is depressed first and the brakes are then applied firmly for longer than one-half second, SST is designed to help the driver bring the vehicle to a stop.

Prepared for any circumstance.

Camry comes standard with a comprehensive airbag system equipped with ten airbags.² The system includes both driver and front passenger airbags, front and rear side curtain airbags, front and rear seat-mounted side airbags, and both driver and front passenger knee airbags.

Star Safety System™

Toyota's Star Safety System™ is an advanced suite of six safety features included as standard equipment on every Camry. The system includes Enhanced Vehicle Stability Control (VSC),³ Traction Control (TRAC), Anti-lock Brake System (ABS), Electronic Brake-force Distribution (EBD), Brake Assist (BA)⁴ and Smart Stop Technology® (SST). **STAR**

1 CRUMPLE ZONES

An important element of occupant protection, crumple zones are structurally engineered to absorb and dissipate energy in the event of a collision by a process known as controlled deformation.

2 DRIVER AND FRONT PASSENGER WHIPLASH-INJURY-LESSENING (WIL)¹ SEATS

Camry's front seats are engineered to yield in a controlled fashion in certain rear-end collisions, helping to reduce the risk of neck injuries.

3 LATCH

LATCH (Lower Anchors and Tethers for CHildren) provides an added measure of safety for the smaller members of your family. LATCH includes lower anchors on the outboard rear seats and tether anchors on all rear seats.

4 TIRE PRESSURE MONITOR SYSTEM (TPMS)²

Proper tire pressure is always important for safe driving. TPMS evaluates the pressure of the tires and issues a warning if the pressure becomes critically low.

5 3-POINT SEATBELTS

Camry provides 3-point seatbelts for all seating positions. The front seats are also equipped with the added safety of pretensioners and force limiters.

DISCLOSURES

1. Toyota strives to build vehicles to match customer interest and thus they typically are built with popular options and option packages. Not all options/packages are available separately and some may not be available in all regions of the country. See toyota.com for information about options/packages commonly available in your area. If you would prefer a vehicle without any or with different options, contact your dealer to check for current availability or the possibility of placing a special order. 2. See Packages and Options section for availability, details and requirements. 3. V6 only. 4. May not be compatible with all mobile phones, MP3/WMA players and like models. 5. iPod® is a registered trademark of Apple Inc. All rights reserved. 6. The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Toyota is under license. Other trademarks and trade names are those of their respective owners. The Bluetooth® wireless technology phones listed on toyota.com have been tested for compatibility with Toyota vehicles. Performance will vary based on phone software version, coverage and your wireless carrier. Phones are warranted by their manufacturer, not Toyota. 7. 4-cylinder only. 8. Availability and accuracy of the information provided by the navigation system or any XM services mentioned (if installed) are dependent upon many factors. Use common sense when relying on information provided. Services not available in every city or roadway. Periodic navigation updates available at additional cost. See your *Navigation System Owner's Manual* or contact XM for details. 9. Always drive safely, obey traffic laws and focus on the road while driving. Apps/services vary by phone/carrier; functionality depends on many factors. Select apps use large amounts of data; you are responsible for charges. Apps identified by "TM" or "®" are trademarks or registered trademarks of their respective companies. For enrollment, cost and more details, see toyota.com/entune. 10. XM services require a subscription after trial period, and are sold separately or as a package. **Subscriptions governed by SiriusXM Customer Agreement; see www.siriusxm.com. If you decide to continue your XM service at the end of your complimentary trial, the plan you choose will automatically renew and bill at then-current rates until you call 1-866-635-2349 to cancel.** Fees and programming subject to change. Available only to those at least 18 years of age in the 48 contiguous United States and D.C. 11. HD Radio™ Technology manufactured under license from iBiquity Digital Corporation U.S. and Foreign Patents. HD Radio™ and the HD, HD Radio, and "Arc" logos are proprietary trademarks of iBiquity Digital Corp. 12. iTunes® Tagging is a registered trademark of Apple Inc. All rights reserved. 13. The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Cold weather will limit effectiveness and view may become cloudy. 14. The Smart Key System may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. 15. CAUTION! When driving a hybrid vehicle, pay special attention to the area around the vehicle. Because there is little vehicle noise in electric-only mode, pedestrians, people riding bicycles or other people and vehicles in the area may not be aware of the vehicle starting off or approaching them, so take extra care while driving. 16. HomeLink® is a registered trademark of Johnson Controls, Inc. 17. Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. 18. Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. 19. Smart Stop Technology® operates only in the event of certain simultaneous brake and accelerator pedal applications. When engaged, the system will reduce power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions and driver input can all impact stopping distance. Smart Stop Technology® is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your *Owner's Manual* for further details. 20. All the airbag (AB) systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts, sit upright in the middle of the seat as far back as possible and do not lean against the door. Do not put objects in front of an AB or around the seatback. Do not use a rearward-facing child seat in any front passenger seat. The force of an inflating AB may cause serious injury or death. See your *Owner's Manual* for further information/warnings. 21. Whiplash-Injury-Lessening front seats can help reduce the severity of whiplash injury in certain rear-end collisions. 22. The Toyota Tire Pressure Monitor alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the monitor system. See your *Owner's Manual* for details. 23. Available on select Toyota models. Contact with the Safety Connect® response center is dependent upon the telematics device being in operative condition, cellular connection availability, navigation map data and GPS satellite signal reception, which can limit the ability to reach the response center or receive emergency service support. Enrollment and Telematics Subscription Service Agreement required. One-year trial subscription available only with new vehicle purchase of Safety Connect®-equipped vehicles. Additional subscription terms available; charges vary by subscription term selected. 24. Do not rely exclusively on the Blind Spot Monitor to determine if a lane change is safe. Always look over your shoulder and use your turn signal before changing lanes. There are several limitations to the function, detection, range and clarity of the monitor. For a complete list of limitations and directions regarding use of the monitor, please see the *Owner's Manual*. 25. Do not rely on the Rear Cross-Traffic Alert system. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. To learn more, see your *Owner's Manual*. 26. The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key matches the code in the vehicle's immobilizer. Because the transponder chip is embedded in the key, it can be costly to replace. If you lose a key, your Toyota dealer can help, or you can find a qualified independent locksmith to replace your key or perform high-security key services at www.aloa.org 27. In certain areas, 4-cylinder models are equipped as Partial Zero Emission Vehicles (PZEV). Equipment causes nominal reduction in horsepower (from 178 hp to 173 hp) and torque (from 170 lb.-ft. to 165 lb.-ft.). For Camry 4-cylinder models certified as Partial Zero Emission Vehicles (PZEV), all emissions components are covered for 15 years or 150,000 miles, whichever occurs first, for performance or defect. 28. Cargo and load capacity limited by weight and distribution. 29. 2013 EPA-estimated mileage. Actual mileage will vary. 30. AT-PZEV rated by the California Air Resources Board. Meets Tier-2/Bin-3 Federal emissions standard. For more information please visit www.arb.ca.gov 31. Hybrid vehicle battery expected life is 150,000 miles based on laboratory bench testing.

WARRANTIES

Every Toyota Car, Truck and SUV is built to exceptional standards. And that's not idle boasting. We back it up with these Limited Warranty Coverages:

Basic: 36 months/36,000 miles (all components other than normal wear and maintenance items).

Hybrid-Related Component Coverage: Hybrid-related components, including the HV battery, battery control module, hybrid control module and inverter with converter, are covered for 8 years/100,000 miles. The HV battery may have longer coverage under emissions warranty. Refer to applicable *Warranty and Maintenance Guide* for details.

Powertrain: 60 months/60,000 miles (engine, transmission/transaxle, drive system, seatbelts and airbags).

Rust-Through: 60 months/unlimited miles (corrosion perforation of sheet metal).

Emissions: Coverages vary under Federal and California regulations. Refer to applicable *Warranty and Maintenance Guide* for details.

Some vehicles are shown with available equipment. Seatbelts should be worn at all times. For details on vehicle specifications, standard features and available equipment in your area, contact your Toyota dealer. A vehicle with particular equipment may not be available at the dealership. Ask your Toyota dealer to help locate a specifically equipped vehicle.

Accessories: For Genuine Toyota Accessories purchased at the time of the new vehicle purchase, the Toyota Accessory Warranty coverage is in effect for 36 months/36,000 miles from the vehicle's in-service date, which is the same coverage as the Toyota New Vehicle Limited Warranty.

For Genuine Toyota Accessories purchased after the new vehicle purchase the coverage is 12 months, regardless of mileage, from the date the accessory was installed on the vehicle, or the remainder of any applicable new vehicle warranty, whichever provides greater coverage, with the exception of car covers. Car covers are warranted for 12 months from the date of purchase and do not assume any coverage under the Toyota New Vehicle Limited Warranty.

You may be eligible for transportation assistance if it's necessary that your vehicle be kept overnight for repairs covered under warranty. Please see your authorized Toyota dealership for further details.

For complete details about Toyota's warranties, please visit www.toyota.com, refer to the applicable *Warranty and Maintenance Guide* or see your Toyota dealer.

All information presented herein is based on data available at the time of posting, is subject to change without notice and pertains specifically to mainland U.S.A. vehicles only. Prototypes shown. Actual production vehicles may vary.
