Drive your Ambition

2018 MODEL LINEUP

100 YEARS OF AUTOMOTIVE INGENUITY

Over our century-long history, we've maintained our passion for designing cars that inspire individuality. Cars for those who have the confidence to choose their own path. Whether you want the most fuel-efficient gas-powered non-hybrid vehicle on the road, demand the utmost in advanced safety systems, or crave the topline performance of our Super All-Wheel Control, you'll find our commitment to progressive design in every product we make. And we continue to move forward, pushing the boundaries of innovation with our line of crossover utility vehicles (CUV), like the all-new Eclipse Cross* and Outlander PHEV. So no matter what lane you choose on the road of life, we have a vehicle for you.

MITSUBISHICARS.COM

*Coming early 2018

TECHNOLOGY OVERVIEW

YOUR MOST ADVANCED MOBILE DEVICE MAY BE YOUR CAR

From touch panel ease to hands-free convenience, our forward-looking vehicles are equipped with some of the most advanced technology in the market today. Available on select models, these features can help you make the most of your drive while not distracting you from the road ahead.

01 TOUCH PANEL DISPLAY AUDIO SYSTEM

With a standard 7.0 in. touch panel, this sleek system sports a high-gloss black finish and uses app-like icons for easy navigation. Features include HD Radio® and a rearview camera. Plus, its Bluetooth® wireless system offers a phone dial screen and phone contact list importing.¹

02 SMARTPHONE LINK DISPLAY AUDIO

With all the communication and entertainment options offered by our smartphones these days, our available Smartphone Link Display Audio helps you to maintain caution behind the wheel while enjoying your smartphone's convenience features in your car. This system includes SiriusXM® Satellite Radio² and HD Radio® (on select models), and supports Apple CarPlay™ to let you access Apple Music® and Maps, make phone calls, and send messages, all through the touch panel or Touchpad Controller (Eclipse Cross) — or with your voice, using Siri®.³ The system also supports Android Auto™. Simply press the Push To Talk button to connect to Google and access all the most commonly used features on the Android™ platform, such as Google Play Music, Google Maps, and Hangouts.⁴

03 COLOR LCD MULTI-INFORMATION DISPLAY

An easy-to-read trip computer provides you with helpful information like average speed and gas mileage, instant fuel economy, cruising range to empty, outside temperature, and even maintenance reminder information. On models equipped with All-Wheel Control (AWC) or Super All-Wheel Control (S-AWC), the display gives performance information such as current road surface mode and real-time torque distribution.

04 ROCKFORD FOSGATE® PREMIUM AUDIO SYSTEM

The available 710-watt Rockford Fosgate® audio system powers nine premium speakers, including a 10 in. dual-voice coil subwoofer. The system incorporates an advanced Digital Signal Processor (DSP) and offers the listener Punch Control® over the subwoofer, sound-field control over the image, and staging of the system, as well as the latest DTS® Neural Surround technology. The system is loaded with state-of-the-art technologies, such as Dolby® Volume, PremiDIA HD®, and PremiDIA-WIDE® surround for dynamic audio performance on the road.⁵

05 BLUETOOTH® WIRELESS TECHNOLOGY

The hands-free Bluetooth® system seamlessly connects your car with your smartphone and most audio-streaming devices, allowing you to wirelessly play music from your media player. It recognizes up to seven different mobile phones, syncing up with contact lists from each phone that's been paired with the system, and keeping the lists private to each user.¹

06 TOUCHPAD CONTROLLER

Available for the first time in the Eclipse Cross, our Touchpad Controller allows for simple tap-and-swipe operation of the Smartphone Link Thin-Display Audio system and functions of Apple CarPlay™.³ Located in the center console and within easy reach, this advanced feature plays an important role in minimizing driver distraction.

07 HEAD UP DISPLAY

The Eclipse Cross' available power-retractable, full-color Head Up Display helps make driving safer by presenting vehicle speed, data from the active safety systems, and other necessary information close to the driver's line of sight, keeping the driver informed and both eyes on the road.

SAFETY OVERVIEW

SAFETY IS NO ACCIDENT

Your safety is our top priority. That's why we equip our vehicles with a truly comprehensive array of active and passive safety features. And on select models, you'll find some of the most advanced safety features ever developed. It's simple, really: We believe you can never be over prepared for the unexpected.

01 AUTOMATIC HIGH BEAM HEADLIGHTS

To increase your visibility during nighttime driving, available Automatic High Beam (AHB) headlights⁶ sense the intensity of proximate light sources and automatically adjust between low beam headlights and high beam headlights accordingly. If a vehicle is detected ahead of you, the headlights remain in low beams, and if the system does not detect any vehicles ahead of you, the headlights change to high beams.

02 MULTI-VIEW CAMERA SYSTEM

This available feature displays what's seen by cameras mounted on the front, rear, and sides of the vehicle. Views from these multiple angles — including a bird's-eye view — can be shown in various combinations on the Outlander, Outlander PHEV, and Eclipse Cross audio display screens, revealing what's in your blind spots and helping you park more safely.⁷

03 SUPER ALL-WHEEL CONTROL

With a long history of all-wheel drive systems, our road-handling credentials are legendary. The Super All-Wheel Control (S-AWC), available on Outlander, Outlander PHEV and Eclipse Cross, is an integration of several advanced technologies that together take full advantage of the engine's power. With the push of a button, the driver can select from multiple S-AWC modes to achieve maximum traction regardless of surface conditions.

04 BLIND SPOT WARNING WITH LANE CHANGE ASSIST AND REAR CROSS TRAFFIC ALERT

These three active safety features help keep you out of harm's way. Blind Spot Warning (BSW) uses radar to help monitor hard-to-see areas behind your vehicle.⁸ If a vehicle enters your driver-side or passenger-side blind spot, an indicator lights up in the corresponding side view mirror. Should you signal a lane change while the other vehicle is still there, the system flashes the indicator light and sounds an audible alert.

Lane Change Assist (LCA) helps you safely enter an adjacent lane by measuring how quickly vehicles in that lane are approaching.⁹ If it's not safe for you to change lanes or merge, it issues both an audible alert and a visual warning in the side view mirror.

Rear Cross-Traffic Alert (RCTA) helps you safely back out of a parking space.¹⁰ When you're in reverse, the system can detect traffic approaching the rear of your vehicle from the driver's or passenger's side. If the system senses cross traffic, it flashes side-mirror indicators and sounds an audible alert.

05 FORWARD COLLISION MITIGATION

The available Forward Collision Mitigation (FCM) system utilizes both Laser radar and camera technology to determine if a frontal collision with a vehicle or pedestrian is imminent. If so, it warns the driver with audible and visual signals, and automatically applies moderate to emergency braking to help reduce the severity of the collision and, if possible, avoid the collision.¹¹

06 LANE DEPARTURE WARNING

The available Lane Departure Warning (LDW) feature helps reduce the potential dangers associated with drifting out of your lane, warning you with both a display and an audible warning if the system senses your vehicle departing from its established lane.¹²

Outlander GT in Diamond White Pearl

OUTLANDER

PASSION NEVER RESTS

The 2018 Outlander comes packed with standard safety and convenience features at an affordable price point. From the 7.0 in. Touch Panel Display Audio system with rearview camera — standard on the ES — and Smartphone Link Display Audio system — standard on SE, SEL, and GT trims — to its eye-catching exterior and array of state-of-the-art technology, the 2018 Outlander is an exemplar of our commitment to quality and tradition of innovation. And with its impressive interior and exterior qualities, you're sure to have a thrilling ride every time.

THIRD-ROW SEAT VERSATILITY

The standard third-row seats enhance not only vehicle occupancy, but also versatility. They're split 50/50 and can be easily stowed with the pull of a single fold-and-store strap, or quickly returned to their upright position by raising the seatback. Additionally, the 60/40 split and fold second-row seat gives you numerous passenger and payload configurations to choose from.

ADVANCED SAFETY

Outlander has a long list of available advanced safety technologies. One of these is the Adaptive Cruise Control (ACC) system, which uses laser radar to help maintain a preset distance between you and the car ahead.¹³ The available Forward Collision Mitigation (FCM) system utilizes both laser radar and camera technology to determine if a frontal collision with a vehicle or pedestrian is imminent. If so, it warns the driver with audible and visual signals, and automatically applies moderate to emergency braking to reduce the severity of the collision and, if possible, avoid the collision.¹¹ Adding to your confidence behind the wheel is a Lane Departure Warning (LDW) system.¹² It monitors the lane position in front of your vehicle with a camera, cautioning you with both a display and an audible warning if your vehicle begins drifting from its established lane. There's also a Blind Spot Warning (BSW) system with Lane Change Assist (LCA) and Rear Cross Traffic Alert (RCTA).^{8,9,10} Whether you're driving straight, changing lanes or backing up or out of a parking space, these features provide additional confidence by continually monitoring your proximity to approaching vehicles. And standard on every Outlander is a handy rearview camera, which displays an image of the area directly behind the vehicle.

Outlander Sport SEL in Octane Blue Metallic

OUTLANDER SPORT

DESIGNED TO IMPRESS

With its dynamic exterior and advanced features, the 2018 Outlander Sport continues our crossover lineage. It is agile, adventurous, and versatile. We've restyled our front grille and enhanced the rear fascia design with a carbon-type pattern. And new LED Running Lights — standard on SE and SEL trims — not only look impressive, but they also increase your Outlander Sport's visibility to oncoming drivers, making them eye-catching for all the right reasons.

PANORAMIC GLASS ROOF

Outlander Sport's available panoramic glass roof will enhance any journey. By day, it creates a fresh, open-air feeling throughout the interior. By night, the roof's LED lighting sets the perfect mood for endless evening-drive possibilities.

FORWARD COLLISION MITIGATION

To help you avoid accidents, the available Forward Collision Mitigation (FCM) with pedestrian detection utilizes both laser radar and camera technology to determine if a frontal collision is imminent, then warns you with audible and visual signals, and automatically applies moderate to emergency braking to help reduce the severity of — or, if possible, avoid the collision.¹¹

LANE DEPARTURE WARNING

Outlander Sport's available Lane Departure Warning (LDW) feature helps reduce the potential dangers associated with drifting out of your lane, warning you with both a display and an audible warning if the system senses your vehicle departing from its established lane.¹²

MIRAGE G4

FUN AND ECO-FRIENDLY

The Mirage G4 is a subcompact, four-door sedan designed for free-spirited, eco-conscious drivers. Offering one of the best fuel economy ratings in its class and CO₂ emissions ratings, it not only saves you at the pump, but it also does its part to keep the world green.^{14,15} With available amenities such as Smartphone Link Display Audio — and with room to comfortably seat five, the Mirage G4 is as ready for fun as you are.

INTERIOR SPACE

While it may be a subcompact car, the 2018 Mirage G4 has ample interior space for five adults. In fact, you and your friends will enjoy a full 101.8 cubic feet of interior space. And if the five of you are going out of town, you'll also find plenty of room in the trunk for all your luggage.

IMPRESSIVE LEGROOM

The Mirage G4 doesn't just accommodate five adults; it also does so with class-leading total legroom as well as the often overlooked category of rear seat legroom.¹⁵

Mirage G4 SE in Mercury Gray Metallic

Mirage GT in Pearl White

MIRAGE

HYBRID-LIKE MILEAGE WITHOUT THE HYBRID PRICE

Delivering up to a remarkable 43-mpg highway (39-mpg combined), the 2018 Mirage gives you class-leading fuel efficiency without the exorbitant cost of hybrid technology.^{16,15} The compact Mirage is nimble for around-town practicality, but also offers comfortable seating for up to five adults. And with available features such as FAST-Key passive entry with push button start, Smartphone Link Display Audio, and automatic climate control, it's surprisingly well appointed. Factor in the 10-year/100,000-mile Powertrain Limited Warranty and it's clear that this Mirage is one of the best-value vehicles on the market.

STANDARD TECHNOLOGY

The standard rearview camera helps let you view the area directly behind your vehicle on the audio display screen, so you won't back into any surprises. And, to help you concentrate on the road ahead, the standard Bluetooth® wireless technology allows you to play music from your Bluetooth-enabled phone and most audio-streaming devices.¹

STANDARD EXTERIOR FEATURES

Mirage's standard LED taillights not only look sharp, they also light up faster, are more visible both day and night, and they last longer than their conventional counterparts. And, sure, the standard rear spoiler looks cool, but it also genuinely enhances aerodynamic performance by reducing air turbulence behind the vehicle.

European Model Shown

OUTLANDER PHEV

THE BEST OF BOTH WORLDS

The all-new Outlander PHEV is everything you love about a CUV, only better. With its versatile driving dynamics made possible through its high-performance twin motors and 4WD capabilities, it can operate in any of three driving modes — EV, Series Hybrid, or Parallel Hybrid — allowing you to go anywhere without having to compromise on power or worry about the environmental impact. Thanks to its plug-in capability, Outlander PHEV can handle most of your short, local trips on electricity alone. But, it can also operate as a regular hybrid, utilizing its gas engine and electric motors to provide more range and less anxiety than a pure electric vehicle offers.

CUV PRACTICALITY

The sophisticated, premium interior of the Outlander PHEV delivers the versatility you'd expect in a CUV — with five-passenger seating, 60/40 split fold-down rear seats and up to 78.0 cubic feet of cargo space.

With a maximum towing capacity of 1,500 pounds, the Outlander PHEV has the capability to get you and all your gear to your next adventure.

Providing excellent driving stability and intuitive, linear handling is Mitsubishi's legendary Super All-Wheel Control (S-AWC). Standard on the Outlander PHEV, S-AWC incorporates a full-time, twin-electric motor 4WD system that provides quick and optimized torque distribution. The motors are mounted separately at the front and rear axles to deliver precise, responsive 4WD performance.

CHARGING OPTIONS

There are three ways to charge the Outlander PHEV: The Level 1 option allows you to fully charge the vehicle by simply plugging the included 8A/12A switchable charging cable into a standard 120V outlet, like one you'd find at home. Level 2 lets you plug into a public J1772 charging station, or you can use a 240V charging station installed at your home. Level 3 is the DC Fast Charging system for rapid charging. Either way, the more frequently you charge, the more money you save.

European Model Shown

ECLIPSE CROSS*

RUGGED, WITH FUNCTIONALITY TO MATCH

The all-new Eclipse Cross is a sight to behold. Its stalwart physique and polished coupe lines unite to create one of our most revolutionary vehicles to date. The ultimate celebration of our signature dynamic crossover form, it is distinguished by its wedge profile with accentuated beltline and sharp character lines. It features a forward-raked rear window, sharply cut off rear gate, short overhang, and beefy fenders. It is also available with our highly touted Super All-Wheel Control (S-AWC). Its durable body and optimized suspension provide for precision handling and enhanced vehicle stability. And inside, it can be equipped with our Smartphone Link Display Audio system, Touchpad Controller, and Head Up Display. Dare we say it's the ultimate package?

POWER AND CONTROL

Our legendary 4WD system is built into the Eclipse Cross, allowing for the optimum amount of torque to the rear wheels. S-AWC incorporates brake-activated Active Yaw Control (AYC), and the increased body rigidity is made possible by the addition of a 3-point strut tower brace at the front and the strategic use of structural bonding. The new 1.5L direct-injection, turbocharged gasoline engine is mated to a CVT with new shift control and 8-speed Sport Mode.

INTERIOR CONVENIENCE FEATURES

Inside, the Eclipse Cross can be fitted with our Smartphone Link Thin-Display Audio system, Touchpad Controller, and Head Up Display, allowing the driver to view vehicle information more easily and safely. The Touchpad Controller, conveniently located in the center console, lets the driver operate the Smartphone Link Thin-Display Audio system, as well as other features. The Head Up Display unit makes for a safer drive by helping you keep your head up and your eyes on the road, while presenting vehicle speed, data from the active safety systems, and other necessary information.

*Coming early 2018

MODEL LINEUP

VEHICLES BUILT WITH YOU IN MIND

One look at the Mitsubishi model lineup and it's immediately clear how truly unique each vehicle is. There's the comfort and versatility of the Outlander, the fun and adventure of the Outlander Sport, and the style and efficiency of the Mirage and Mirage G4 sedan. And, all-new to the 2018 crossover lineup, the revolutionary eco-conscious Outlander PHEV and the stylish Eclipse Cross. Really, there's no denying that we offer a vehicle for nearly every taste and destination.

Since the day we sold our first U.S. vehicle back in 1982, we've been committed to building vehicles that offer a unique blend of style, durability, and performance. Our vehicles are more than a means of transportation. They are a moving expression of the driver within. And backed by some of the most comprehensive warranties in the industry, our cars are built to help you drive your ambition for many years to come.

OUTLANDER

STANDARD FEATURES

166-hp 2.4L I4 or 224-hp 3.0L V6 MIVEC engine
18 in. two-tone alloy wheels
7-passenger seating
Continuously Variable Transmission (CVT) or 6-speed automatic transmission
Electric Power Steering
Hill Start Assist (HSA)
7 SRS airbag safety system including driver's knee airbag¹⁷
30 EPA-estimated hwy mpg (ES/SE/SEL CVT 2WD)¹⁸
Bluetooth® wireless technology and USB port¹

- Apple CarPlay™ and Siri® are trademarks of Apple Inc., registered in the U.S. and other countries.

The 10-year/100,000-mile Powertrain Limited Warranty coverage terms are from the original in-service dates, and are applicable only to the original owner of new, retailed models purchased from an authorized Mitsubishi dealer. Subsequent owners receive the balance of the New Vehicle Limited Warranty of 5 years/60,000 miles. In addition, the Mitsubishi Outlander PHEV has a fully transferable 10-year/100,000-mile warranty on PHEV components and the Main Drive Lithium-ion battery. See retailer for limited warranty and roadside assistance terms and conditions.

Technical data, equipment, and options shown are based on the latest information available at the time of printing and are subject to change without notice. Colors may vary due to the printing process. Exterior and interior lights on vehicles shown may be illuminated for illustration purposes only. Vehicles are shown with optional equipment. Not all equipment is available on every model. For more complete details about equipment configuration and Mitsubishi Genuine Accessories, please contact your Mitsubishi Retailer.

Log on to our website and browse our full lineup of new vehicles, get MSRP and customer rebate information, and “build” the Mitsubishi that’s right for you. The site can help you locate your nearest dealer — or even have a dealer contact you.

FOOTNOTES (CONTINUED)

- Google, Android, Android Auto, Google Play, and other marks are trademarks of Google Inc. To use Android Auto on your phone screen, you’ll need an Android phone running 5.0 (Lollipop) or higher and the Android Auto app.
- ©2017 Rockford Corporation. All Rights Reserved. ROCKFORD FOSGATE, PUNCH and associated logos where applicable are registered trademarks of Rockford Corporation in the United States and/or other countries. Specifications subject to change without notice.
- The Automatic High Beam (AHB) headlights system is a driver aid only. Factors such as a dirty windshield, variable weather, changing light conditions, or hilly terrain may also affect system performance.
- The Multi-View Camera system is a driver aid only and is not a substitute for visual confirmation. The view on the screen is limited and objects outside that view will not be seen.
- The Blind Spot Warning (BSW) system is a driver aid only and is not a substitute for safe and careful driving. Under certain circumstances, this system may not detect other vehicles correctly.
- The Lane Change Assist (LCA) system is a driver aid only and is not a substitute for safe and careful driving. Under certain circumstances, this system may not detect other vehicles correctly.
- The Rear Cross Traffic Alert (RCTA) system is a driver aid only and is not a substitute for safe and careful driving. Under certain circumstances, this system may not detect other vehicles correctly.
- The Forward Collision Mitigation (FCM)/Pedestrian Detection (PD) system is a driver aid only and is not a substitute for safe and careful driving. Under certain circumstances, the system may not detect other vehicles and/or pedestrians correctly.
- The Lane Departure Warning (LDW) system is designed to read the lane marks under certain conditions. It is not a collision avoidance system and is not a substitute for safe and careful driving.
- The Adaptive Cruise Control System is not a collision avoidance system or an automatic driving system. It is designed to use only limited braking and is never a substitute for safe and careful driving. Never rely solely on the Adaptive Cruise Control system.
- Claim based on EPA estimated combined mileage of 37 mpg (Mirage G4). EPA estimates are to be used as a standardized comparison with other vehicles. Your actual mileage will vary depending on how you drive and maintain your vehicle.
- All claims based on available data for 2017 model year competitors at time of publication.
- 39 mpg combined (37/43 city/hwy) CVT-equipped model. Actual mileage may vary.
- Airbags are part of a Supplemental Restraint System (SRS). To decrease the risk of injury from a deploying airbag, always wear your seat belt, sit upright in the middle of the seat, and do not lean against the door. Always place children 12 and under in the rear seat and use appropriate child restraints. Never place a rear-facing infant restraint in the front seat. See your owner’s manual and instructions provided with your child restraint for additional information.
- Based on EPA highway mileage rating. Actual mileage may vary.

ALL WEATHER FLOOR MATS

At Mitsubishi Motors, we believe not all drivers are created equal. So we build our vehicles for a different breed of driver, the fearless ones who take pride in what they drive, and refuse to drive more of the same. It's obvious to us that people who truly want distinctive styling and the latest technology see past the procession of bland imitations. We believe that every vehicle we make should stand for something. Something more than expected. And that's why we don't build Mitsubishi cars for stereotypes. We build them for you.
