SAFETY

INNOVATION

SPECS

Among seven-passenger utility vehicles, there are those designed primarily for on-road and those for off-road. Seldom is there one engineered specifically to excel on both—until now. More powerful, versatile and capable than ever before, consider the paradox solved.

ITS AVAILABLE SEMI-ANILINE  
LEATHER IS THE ONLY  
THING REMOTELY SEMI ABOUT IT.

IMAGINE, A UTILITY VEHICLE  
THAT'S DESIGNED TO BE  
UTILIZED.

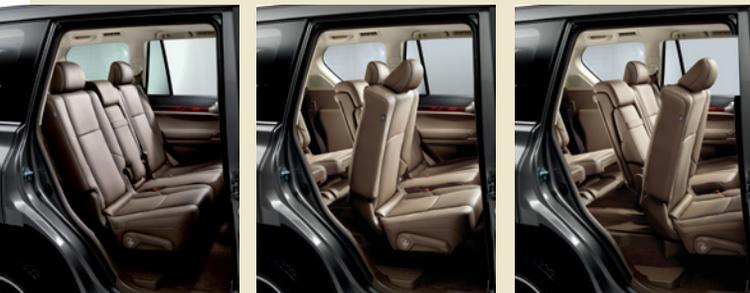

A utility vehicle shouldn't solely be measured by how much it can carry, but rather how easy it is to use. For instance, the GX features a rear window that flips open for convenient loading of smaller items. As well as third-row seats that can easily fold flat by pressing a button located in the cargo area or adjacent to the second-row seat. And, with a passenger-side second-row seat that tilts and slides forward, accessing the third row and accommodating cargo<sup>4</sup> of all shapes and sizes is every bit as effortless as it should be.

Optional equipment shown. See disclaimers on page 61.

## A FRESH TAKE ON FRESH AIR.

One dual-zone climate-control system in the front and another available climate-control system in the rear. To most automobile manufacturers, these systems would be more than enough. But in here, they're just the beginning. The GX is the first V8 in its class to come standard with heated and ventilated front seats. And, because not all air is good air, the GX also includes a system that can detect smog and certain pollutants outside of the vehicle. If it determines the outside air to be contaminated, the system automatically recirculates the cleaner air inside the cabin.

SPECS

# TWO SCREENS. OTHERWISE KNOWN AS 'PEACE' AND 'QUIET.'

At last, something both siblings can agree on. The available dual-screen Rear-Seat Entertainment System in the GX enables two video sources to be viewed at the same time. Using a single remote control, one can be used, for instance, as a DVD player and the other as a game console or audio player. Wireless headphones<sup>5</sup> are also graciously included, leaving the driver free to enjoy something entirely different: silence.

PERFORMANCE  
SUSPENSION  
POWER  
RIDE  
CAPABILITY

Whether it's a bouldery incline or a parallel-parking space that's tighter than you'd prefer, every day is filled with obstacles. Fortunately, the new GX 460 is filled with answers. To name a few: a suspension system that helps enhance your capability on- and off-road, among the tightest turning circles in its class and an engine that's more powerful and fuel-efficient than ever before.

ANYTIME, ANYWHERE.

[VIEW DEMO >>](#)

On-road. Off-road. Suspension systems are typically designed for one or the other. The notable exception: the Kinetic Dynamic Suspension System on the GX. On-road, the system automatically holds the front and rear stabilizer bars in place, helping to minimize body lean while cornering. And off-road, it reacts to uneven surfaces by automatically adjusting the bars, increasing wheel articulation. This helps the GX keep its wheels in contact with the ground for improved traction and control.

# A SIXTH GEAR THAT QUIETS THE ENGINE. AS WELL AS THE SKEPTICS.

Add an intelligent six-speed automatic transmission to a more powerful, 301-horsepower,<sup>6</sup> 4.6-liter V8 engine and you don't just turn heads, you silence critics. Because, in addition to reducing the amount of engine noise and vibration you'll experience in the cabin, the addition of the sixth gear also improves fuel efficiency. So much so that the GX offers best-in-class V8 fuel economy.<sup>7</sup>

Optional equipment shown. See disclaimers on page 61.

WHEN IT COMES TO ON-ROAD  
HANDLING, SILENCE  
SPEAKS VOLUMES.

To provide a nearly unparalleled level of quietness, the frame of the GX is designed to absorb noise and vibration before it enters the cabin. And even then, unwanted sounds must pass through a gauntlet of floor-to-ceiling dampening and insulation measures. Additionally, to ensure your quiet ride is also an enjoyable one, an available Adaptive Variable Suspension enables you to customize the degree of road feel to one of three settings.

A SLIGHTLY DIFFERENT TAKE ON THE WORD.  
'INSURMOUNTABLE.'

AMENITIES

PERFORMANCE

SAFETY

INNOVATION

SPECS

Conquering the most intimidating terrain is second nature in the GX. In addition to full-time 4WD and a TORSEN® limited-slip center differential,<sup>9</sup> it features what can be thought of as the off-road equivalent of cruise control. With the press of a button, available Crawl Control<sup>9</sup> carefully manages the throttle and brakes to help you maintain a slow, consistent speed up, down and over rugged terrain. All without your feet ever touching the pedals. Enhancing your traction and leaving you with a far less daunting task: steering.

Optional equipment shown. See disclaimers on page 61.

SPECS

SAFETY  
PRE-COLLISION  
HEADLAMPS  
AIRBAGS

THEY SAY NOBODY **EVER**  
**PLANS** TO BE IN AN ACCIDENT.  
ON THE **CONTRARY.**

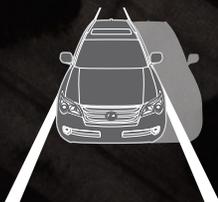

We've spent years preparing for an event we hope never takes place. Developing technology to help you see more and react faster to potentially avoid a collision. And if one is unavoidable, you can be assured that we've planned for that, too. The GX is equipped with 10 airbags<sup>10</sup>—more than any vehicle in its class.

Optional equipment shown. See disclaimers on page 61.

# JUST A FEW OF THE WAYS WE'VE THOUGHT ABOUT THE UNTHINKABLE.

When time is of the essence, distraction can be a danger. That's where the available Pre-Collision System<sup>11</sup> with Driver Attention Monitor<sup>12</sup> comes in. A first in its class, it uses a front-mounted radar sensor that can help detect an object ahead and a camera attached to the steering column that can discern the position of your face. If you're not facing forward when a potential collision is detected, it sounds a warning and, if necessary, lightly taps the brakes to get your attention.<sup>12</sup> And, in some cases, when it deems a collision is imminent, it can even automatically apply the brakes to help reduce speed.

## LANE DEPARTURE ALERT

Using a camera that monitors the lane markings, the available Lane Departure Alert<sup>15</sup> is designed to detect if the GX is beginning to drift out of its lane. If so, it can warn you with a series of audible and visual alerts.

YOUR FOCUS: ONE THING THAT SHOULD NEVER GO OFF-ROAD.

#### INTELLIGENT HIGH-BEAM HEADLAMPS

The GX also offers available intelligent high-beam headlamps.<sup>16</sup> They operate in high-beam mode until the system detects the headlamps from an oncoming vehicle or other vehicles traveling closely ahead, and then temporarily enters into low-beam mode until vehicles are no longer detected.

AMENITIES

PERFORMANCE

SAFETY

INNOVATION

SPECS

When you're rounding a turn in the dark, unidirectional headlamps that illuminate the area adjacent to the curve aren't nearly as effective as the advanced Adaptive Front Lighting System available on the GX. It can help illuminate the road by rotating the right headlamp up to 10 degrees and the left headlamp up to 15 degrees into a turn.

Optional equipment shown. See disclaimers on page 61.

# THE MOST AIRBAGS

IN ITS CLASS; ONE MORE REASON IT'S  
AT THE HEAD OF IT.

When you own a GX, you're surrounded by our finest thinking. Literally. With 10 airbags<sup>10</sup> and a host of safety systems, the GX helps to protect you and your passengers in a myriad of ways. Among them: driver and front-passenger airbags<sup>10</sup> that deploy, in

AMENITIES

PERFORMANCE

SAFETY

INNOVATION

SPECS

part, based on the severity of impact and/or seat-track position, driver and front-passenger knee airbags,<sup>10</sup> side-curtain airbags<sup>10</sup> that nearly run the length of the interior and standard second-row outboard seatbelt pre-tensioners.

Optional equipment shown. See disclaimers on page 61.

Optional equipment shown.

# THERE'S MORE THAN ONE WAY TO FORGE NEW PATHS.

Being groundbreaking doesn't necessarily require brute force. For example, one of its many innovations: available voice command. One of the most tested voice-recognition systems on the market, it's designed to understand the way people actually speak. To raise the temperature, for instance, you need only say, "It's too cold," and the interior will warm by four degrees. And, from the destination menu, if you say, "I need an ATM," the closest locations will be displayed.

## VISIONARY. IN EVERY SENSE OF THE WORD.

You can't avoid what you can't see. So the GX offers an available Wide-view Front and Side Monitor.<sup>17</sup> At low speeds, a small camera on the front grille and one under the passenger side-mirror can help provide greater visibility, which makes navigating blind intersections, narrow passages and parking spaces even more convenient. The GX also features a standard backup camera.<sup>18</sup> When placed in reverse, an inconspicuous camera lens located above the rear license plate transmits a wide-angle view behind you to a dash-mounted screen. Explore the areas on the left to see what you otherwise might have missed.

SAFETY CONNECT™

DESIGNED TO HELP  
SAFEGUARD YOUR LIFE.

With available Safety Connect<sup>1,3</sup> you can request emergency help, whether that means assisting the police with locating your stolen vehicle or requesting Enhanced Roadside Assistance<sup>20</sup> for a flat tire. The Safety Connect<sup>1,3</sup> service also features Automatic Collision Notification, which automatically sends a call for help the moment the system senses the vehicle has been in a severe rear-end collision or the airbags<sup>10</sup> have been deployed.

Subscription required. One-year trial  
subscription included

## NAVIGATION SYSTEM/MARK LEVINSON<sup>®</sup> PREMIUM SURROUND SOUND AUDIO SYSTEM PACKAGE

Includes all Navigation System features plus:

Mark Levinson 17-speaker 330 watts, all  
channels driven, @ less than 0.1% THD,  
20-20,000 Hz<sup>41</sup> Premium Surround  
Sound Audio System<sup>22</sup> with Automatic  
Sound Levelizer (ASL), 7.1 architecture  
and in-dash, single-feed, six-disc DVD/CD  
auto-changer

Optional equipment shown.

# WARRANTY

Four-year/50,000-mile Lexus Limited Warranty. Six-year/70,000-mile Powertrain Warranty. Six-year/unlimited-mileage Corrosion Perforation Warranty. All warranties with zero deductible. See the *GX Warranty and Services Guide* at your Lexus dealer for details.

**1.** Available on select 2010 Lexus models. Contact with the Lexus Enform response center is dependent upon the telematics device being in operative condition, cellular connection availability, navigation map data and GPS satellite signal reception, which can limit the ability to reach the response center or receive support. Enrollment and Telematics Subscription Service Agreement required. One-year trial subscription available only with new vehicle purchase of Lexus Enform-equipped vehicles. Additional subscription terms available; charges vary by subscription term selected. **2.** Lexus Enform premium services Destination Assist and eDestination will function in the contiguous United States and Washington, DC. These services may also function in Hawaii and limited areas of Alaska for vehicles that contain map data for those states. They will not function in Canada or in other countries outside the United States. **3.** Safety Connect services will function in the United States, including Hawaii and Alaska, and in Canada. The services will not function outside of the United States in countries other than Canada. **4.** Cargo and load capacity limited by weight and distribution. **5.** Headphones are for passenger use only. Do not use while operating vehicle. **6.** Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. If premium fuel is not used, performance will decrease. **7.** Based on 2010 EPA MPG ratings of middle-luxury V8 SUVs. Actual mileage will vary. **8.** TORSEN® is a registered trademark of Zexel Torsen, Inc. **9.** The GX 460 is designed to meet most off-road driving requirements, but off-roading is inherently dangerous. Abusive use may result in bodily harm or vehicle damage. Lexus encourages responsible operation to protect you, your vehicle and the environment. Seatbelts should be worn at all times. **10.** All the airbag (AB) systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts, sit upright in the middle of the seat as far back as possible and do not lean against the door. Do not put objects in front of an AB or around the seatback. Do not use a rearward-facing child seat in any front passenger seat. The force of an inflating AB may cause serious injury or death. Please see your *Owner's Manual* for further information/warnings. **11.** The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your *Owner's Manual* for further information. **12.** The Driver Attention Monitor is designed to alert the driver if a potential hazard is detected ahead and the driver's face appears to be turned away. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your *Owner's Manual* for further information. **13.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. **14.** Active headrests can help reduce the extent of whiplash in certain types of rear-end collisions. **15.** Lane Departure Alert is designed to read the lane markers of certain roads. If the vehicle approaches the outer limits of its lane, the system warns the driver that corrective action may be required. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your *Owner's Manual* for further information. **16.** The intelligent high-beam headlamps can help improve vision at night. However, conditions such as a dirty windshield, rapidly changing light conditions or hilly terrain will limit effectiveness so the driver may need to manually change the high beams from on to off. Please see *Owner's Manual* for details. **17.** The Wide-view Front and Side Monitor does not provide a comprehensive view of the front and side areas of the vehicle. You should also look around outside your vehicle, and use your mirrors to confirm clearance. Cold weather will limit effectiveness and view may become cloudy. **18.** The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Cold weather may limit effectiveness and view may become cloudy. **19.** The Navigation System is designed to assist in locating an address or point of interest. XM® Radio, XM NavTraffic®, XM NavWeather™ and XM® Sports and Stocks require a monthly service fee and hardware. XM NavTraffic is designed to provide real-time traffic or alternative routes of travel; XM NavWeather is designed to provide real-time weather and forecasting information in your general vicinity and along your route of travel. Discrepancies may be encountered between the system and your actual location. Road system and weather changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage not available in every city or roadway. Periodic Navigation updates available at an additional cost. Please see your *Navigation System Owner's Manual* for further details. **20.** Coverage only available in the continental U.S. and Canada. Please see your Lexus dealer for details. **21.** XM NavTraffic® and XM NavWeather™ each require a separate XM subscription. XM® Sports and Stocks is available with an XM® Radio subscription. After a 90-day complimentary trial, you must set up the appropriate XM subscription(s) to continue receiving these services. The XM NavTraffic, XM NavWeather and XM Sports and Stocks services are available in the 48 contiguous United States and DC. For details about the XM service coverage areas, visit [www.xmradio.com](http://www.xmradio.com) or call the XM Listener Care Center at 1-877-515-3987. To receive XM NavTraffic, XM NavWeather and XM Sports and Stocks services, XM service must be activated. To activate the service, call the XM Listener Care Center. Subscriptions are governed by the XM Customer Agreement available at [xmradio.com/service/terms](http://xmradio.com/service/terms). XM Radio fees, services and programming are subject to change. **22.** Mark Levinson® is a registered trademark of Harman International Industries, Inc. **23.** Functioning XM® Radio requires a monthly service fee. Please see your Lexus dealer for further details. Reception of the satellite signal may vary depending on location. All fees and programming subject to change. Subscriptions governed by the XM Customer Agreement available at [www.xmradio.com/service/terms](http://www.xmradio.com/service/terms). Available only in the 48 contiguous United States and DC. **24.** iPod® is a registered trademark of Apple Inc. All rights reserved. **25.** 18-in performance tires are expected to experience greater tire wear than conventional tires. Tire life may substantially be less than 15,000 miles, depending upon driving conditions. **26.** Performance figures are for comparison only and were obtained with prototype vehicles by professional drivers using special safety equipment and procedures. Do not attempt. **27.** The SmartAccess system may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. **28.** The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch or bring a SmartAccess fob into the vehicle, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key or SmartAccess fob matches the code in the vehicle's immobilizer. Because the transponder chip is embedded in the key or SmartAccess fob, it can be costly to replace. If you lose a key or SmartAccess fob, your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local *Yellow Pages* or by contacting [www.aaoloa.org](http://www.aaoloa.org). **29.** The Lexus Personalized Settings (LPS) can be programmed in two ways: For most models equipped with the available Navigation System, the driver can modify the settings themselves; for other models, including those without a Navigation System, programming is done by your Lexus dealer via a one-time, complimentary offer during their first 12 months from the date the vehicle is sold. Please see your Lexus dealer for more information. **30.** Accessory roof rack with rails not recommended for luggage. **31.** Bluetooth® audio device must be enabled with A2DP and AVRCP. **32.** Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **33.** HAC is designed to help minimize backward rolling on steep ascents. It is not a substitute for safe driving judgment and practices. Factors including grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **34.** DAC is designed to help the driver maintain vehicle control and speed on steep downhill descents. It is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether DAC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **35.** The Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the monitor system. Please see your *Owner's Manual* for details. **36.** Roof rack with CrossBars is not recommended for luggage. **37.** Currently available PPO. Ask your Dealer Sales Consultant for vehicle application. **38.** Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your *Owner's Manual*. The maximum you can tow depends on the total weight of any cargo, occupants and available equipment. **39.** Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving practices. Please see your *Owner's Manual* for important instructions and cautions. **40.** Bluetooth® technology phones listed on [lexus.com](http://lexus.com) have been tested for compatibility with Lexus vehicles. Performance will vary based on phone software version, coverage and your wireless carrier. Phones are warranted by their manufacturer, not Lexus. **41.** Continuous average power, all channels driven, at less than 0.1% THD; 20–20,000 Hz.

\*Lexus strives to build vehicles to match customer interest, and thus they typically are built with popular options and option packages. Not all options/packages are available separately, and some may not be available in all regions of the country. See [lexus.com](http://lexus.com) for information about options/packages commonly available in your area. If you would prefer a vehicle without any or with different options, contact your dealer to check for current availability or the possibility of placing a special order. Specifications, features, equipment, technical data, performance figures, options, and color and trim are based upon information available at time of printing, are subject to change without notice, are for mainland U.S.A. vehicles only. Some vehicles shown with available equipment. See your Lexus dealer for details. Lexus reminds you to wear seatbelts, secure children in rear seat, obey all traffic laws and drive responsibly. For more information, call 800-USA-LEXUS (872-5398) or visit [lexus.com](http://lexus.com). To learn more about your financing options, contact your Lexus dealer or call Lexus Financial Services at 800-874-7050.
